

HOLIDAY PARK BROCHURE

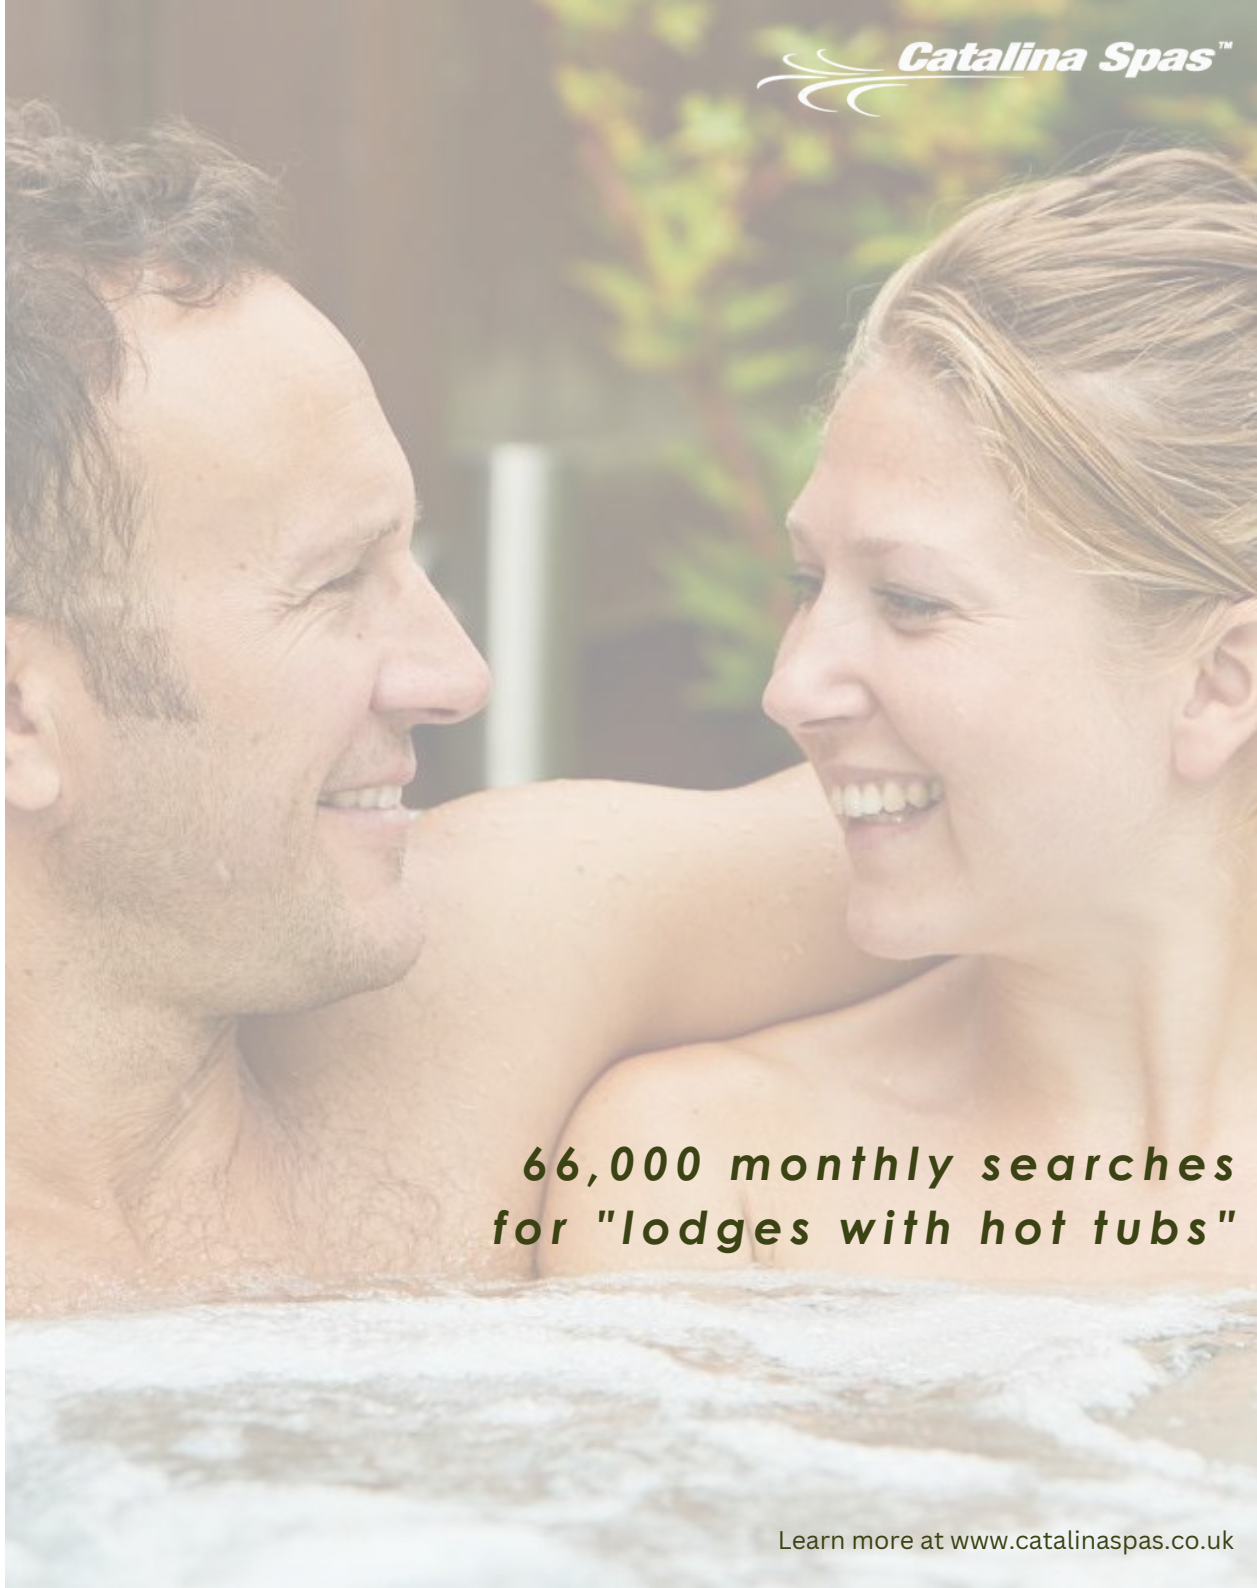

Catalina Spas™

INCREASE BOOKINGS

As of March 2025, the demand for UK holiday properties with hot tubs continues to rise. According to Sykes Cottages, properties equipped with hot tubs can earn 54% more than those without.

Additionally, search volume statistics for the UK indicate an average of 66,000 monthly searches for "lodges with hot tubs," with a peak of over 95,000 searches in January 2023.

These trends highlight the growing popularity and financial benefits of offering hot tub amenities in holiday accommodations.

***66,000 monthly searches
for "lodges with hot tubs"***

A woman and a man are relaxing in a hot tub outdoors. The woman is in the foreground, smiling and looking towards the man. The man is in the background, also smiling. The hot tub is white and has a wooden deck around it. The background is a blurred green landscape.

A Hot Tub can make the difference between a good holiday and the holiday of a lifetime.

THE CATALINA DIFFERENCE

Catalina Spas™ were one of the first companies in the UK to supply Hot Tubs and Swimspas for use in holiday homes and lets.

Our management team were instrumental in the establishment of BISHTA (British and Irish Spa and Hot Tub Association) and still on the technical committee, they were involved in the production of the HSE/HPA hand book on the management of spa pools that offers guidance to professional businesses using and hiring spa pools, the precursor to HSG282.

A Hot Tub can make the difference between a good holiday and the holiday of a lifetime. By adding a Catalina Spa™ to your rental properties, you not only make them highly marketable and more attractive to customers, but you also make owning holiday lets a more lucrative venture with a premium selling tool that not only pays for itself, but increases profit too.

CS-3 HP

Seating up to 3 people, the CS-3 is suited for smaller rentals. The dual lounger makes this model ideal for socialising and meets all HSG282 compliant regulations. Fitted with an inline sanitiser, anti-tamper controls and additional drains this Hot Tub is ideal for rental owners who has adequate space and require simple maintenance.

Dimensions: 1600 x 2030 x 860mm

Pumps: 1

Heater: 3kW

Seating Capacity: 3 (1 Lounger)

Total Jets: 25

Filter: 50 Sq. Ft

Water Capacity: 760 Litres

Power Supply: 20 Amps

Features Include:

Basic 2 Button Control Panel For Users – stops clients from changing the settings or temperature of the spa.

Master Control Panel Located Inside Spa Cabinet – main control panel placed inside cabinet for the use of trained spa operators.

Built In Chemical Feeder – built in erosion feeders, reduces that amount of chemicals needed to be dosed during lets.

Larger Drain Valve - for quicker drain down between lets.

No Topside Air Venturi's – reduces broken fittings from misuse.

Correct Water Capacity – of at least 250 litres of water per seat.

REDUCE ENERGY COSTS

Air Source Heat Pumps for Hot Tubs and Swims spas are one of the most efficient methods of heating systems available and can save up to 80% in heating costs.

Unlike traditional heating methods that rely solely on electricity or gas, heat pumps utilise the ambient air to extract and transfer heat into your hot tub. This process is highly efficient and environmentally friendly, making it a cost-effective solution for long-term energy savings.

If you are considering adding a Heat Pump, please contact us for a free no obligation quote.

Looking for lower running costs and faster spa heating? Think about adding an Air Source Heat Pump to your Hot Tub installation.

CX-6 HP

With the ability to seat up to six people, the CX-6 HP is designed for rentals that cater for larger bookings. If comfort is what you're after, this HSG282 compliant spa features a comfortable lounger and offers straightforward maintenance.
