Quality and Longevity

Luonto Furniture crafts high-quality furniture designed to last more than 10 years. The focus is on repair-ability in both materials and assembly methodology, significantly reducing product waste.

Zero Wood Waste

The company practices zero wood waste. Wood dust collected at the sawmill is pressed into pellets, which are used to heat production lines during Finland’s harsh winters.

High-Quality Raw Materials

Luonto Furniture sources only the highest quality raw materials. These materials have world-renowned certifications for wood, foam, fiber fill, and upholstery.

Recycled Materials

The fibers used in cushions are made with recycled PET water bottles. The R-PES upholstery collection contains 100% polyester from recycled bottles.

Sustainable Manufacturing Practices

Sustainability is built into the manufacturing practices. This includes re-purposing wood dust and partnering with local artisans to use scraps, rather than considering them waste.

Our Quality Standard

Quality is the cornerstone of the business, permeating all processes from design to delivery, with rigorous testing at each stage. A culture of excellence is fostered through performance-based incentives, promoting high-quality production and occupational wellbeing, all while upholding the vision of offering high-quality furniture at fair prices.

Foam, Fiber and Filling

All comfort can be credited to Cold Cured High Resilient foam, its the premier choice due to its superior durability, resilience, and pressure distribution. Every cushion is chamber-filled, by weight for consistent comfort.

Recycled Polyester (R-PES)

Performance Fabric : SMART Fabric

SMART Fabrics are designed with a special protective coating that **resists the absorption of spilled liquids**. Instead of soaking in, liquids condense on the fabric's surface, enabling easy clean-up. This water-repellent feature makes SMART Fabrics ideal for preventing rapid fluid seepage.

Performance Fabric : AquaClean

Aquaclean® Technology, a revolutionary fabric treatment that's **PFC-free** and integrated into the fabric's fiber, enables **stain removal using just water**. It's not a surface application, but a part of the fabric itself. Additionally, the fabric features **SAFE FRONT®**, an intrinsic barrier that provides over **91% protection against viruses and bacteria**. This technology ensures safety and high performance without the need for harmful PFCs.

Cleaning Instructions

1. Clear any leftover residue from the upholstery.
2. Dampen the stain with water, wait briefly.
3. Gently rub the stain in circular motions with a damp cloth. Repeat if necessary.
