HANDY INFORMATION FOR YOUR STAY AT THE MARATHON COACH SERVICE DEPARTMENT

## Tailored Detailing by Those Who Know Your Coach Best.

**1. Wheel Polish** – Aluminum wheel polishing removes oxidation and buildup to restore a bright, reflective finish. It also helps protect against future corrosion, keeping your wheels looking like new.

**2. Coach Wash** – A meticulous hand wash using ultra-purified water (under 20PPM) to eliminate dirt, grime, and road debris — leaving your coach spotless and streak-free.

**3. Cut and Buff Paint Correction** – A multi-step process that removes surface imperfections like swirls, oxidation, and light scratches to restore a smooth, flawless finish. It's the ideal prep step before applying wax or ceramic coating for lasting protection.

**4. Wax** – A high-gloss wax application that adds shine and provides a layer of protection against the elements.

OR

**4. HydroSilex** – A durable, long-lasting coating that chemically bonds to the paint, offering superior protection against UV rays, oxidation, and contaminants.
