Catalogue Features

Going Green

It is more important than ever to consumers and businesses to make smart buying choices. This includes choosing products that are environmentally-friendly and sustainably sourced. From recycled and recyclable products, to those backed by national and international accreditations, we support products that help reduce our impact on the environment.

Green borders

Green borders and the green hand designate products that meet our environmentally-friendly criteria, including all third-party accreditations. This is also used for recycled and recyclable products along with their specific icons.

Stat.

Stat.

simply... products that perform!

The Stat. range delivers uncompromised value and quality on key stationery items that quite simply, are products that perform! The extensive range will feature over 200 products that deliver genuine value and savings on must have stationery and workplace essentials. Red borders designate our new private label products.

Sovereign Essentials

SOVEREIGN
STATIONERY

Look for blue borders to easily identify our familiar Sovereign branded products throughout the catalogue.

What's New?

The NEW icon makes it easy for you to identify products that are new to the catalogue. You can find this icon next to any new product additions to familiar brands and ranges, as well as accompanying some new brands to our range.

How to use this catalogue

We have designed this catalogue with you in mind, to enable you to find what you're looking for quickly and easily, with the most up to date information available. This means each product is complete with its respective order code, description, image and additional product information, at the time of publishing. Product images are placed in the order that they are listed, left to right, unless indicated otherwise. Minimum order quantity and selling unit are the same, unless indicated otherwise as in the example below.

ISO Paper Sizes

The dimensions of the A series paper sizes, as defined by the ISO 216 standard, are shown in the table below. All sizes are in millimeters (cm measurements can be obtained by dividing mm value by 10). The A Series paper size chart (right) gives a visual representation of how the sizes relate to each other – for example, A5 is half the size of A4; and A2 is half the size of A1.

The A series paper sizes are defined in ISO 216 by the following requirements:

- The length divided by the width is 1.4142
- The A0 size has an area of 1 square metre. Each subsequent size A(n) is defined as A(n-1) cut in half parallel to its shorter sides. This means you get the A1 by folding an A0 paper in 2, as shown in the right hand side diagram
- The standard length and width of each size is rounded to the nearest millimeter
- 'A' sizes are used to define the finished paper size in commercial printing. A4 is for office documents, A5 is for notepads & A6 is for postcards

ISO C Series Envelope Sizes

ISO (International Organization for Standardization) envelope sizes are the official international metric envelope sizes. This envelope series was designed to accommodate ISO 'A' size papers. Although DL is not part of the ISO C series, it is a very widely used standard size for the reason

that it is suitable for A4 paper folded into thirds. DL, probably at one time the abbreviation of DIN Lang (Deutsche Industrie-Norm, Long), is now identified as "Dimension Lengthwise" by ISO 269.

Double A

Better Paper, Better World

Our purpose-grown 'Paper-Tree' means forests remain untouched. It captures CO₂ and creates 30 million fibres per gram for smoother, thicker and more vibrant printing.

Experience the *Double A* difference!

Double A Premium Copy Paper

Crafted for quality and sustainability, Double A paper is made from the fast-growing Paper-Tree, grown on unused land with zero deforestation. Backed by 35 years of research and produced in a fully integrated, eco-conscious mill, it's our way of delivering Better Paper for a Better World.

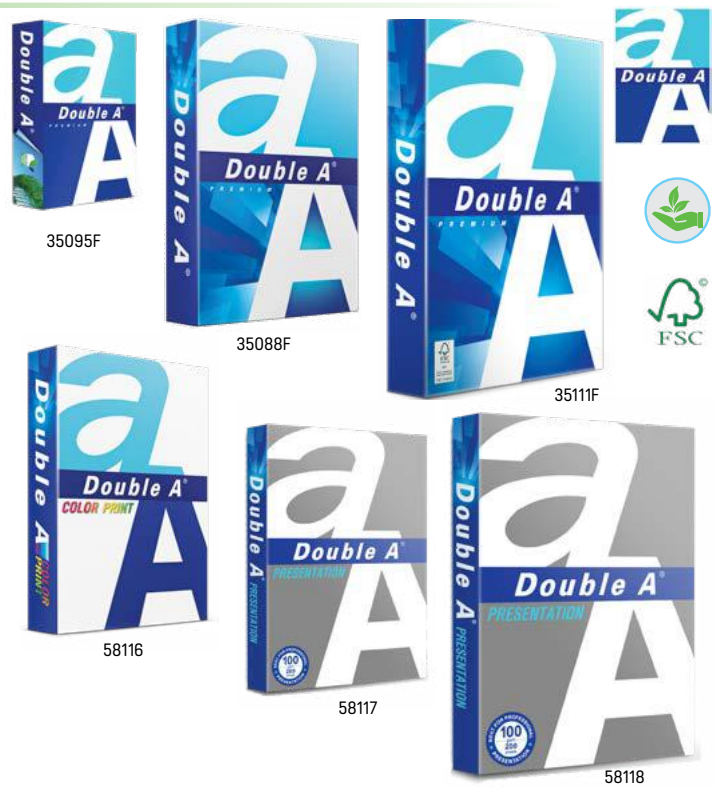

30 million fibres per gram, coupled by state-of-the-art production process, deliver a premium feel and exceptional performance:

- Superior thickness for a professional, no see-through finish.
- Smoother and more vibrant prints & copies
- Reliable results across all types of copiers, inkjet, and laser printers.

All paper used is carbon-neutral and produced under ISO 9001 and ISO 14001 standards. Papers marked FSC® are certified by the Forest Stewardship Council and are marked as such.

Derwent Artists Pencils

Derwent Artists Pencils have been the choice of professional artists since 1938. They have a highly pigmented core which creates a smooth and rich colour laydown. The larger core is ideal for creating broad, expressive strokes, while the strong point can sustain layering and blending techniques. Artists pencils are ideal for a wide range of drawing styles; from bold landscapes through to more detailed illustrations.

Derwent Watercolour Pencils

Combine the control of a pencil with the subtle beauty of the watercolour medium. Great to use and you can mix them with water to create interesting colour flows. Ideal if you want to create more subtle painting as the colour range is broad. Of course, you can use them dry and because they have such a soft texture you will find them easy to blend and layer. The Derwent Watercolour range is not permanent so once the colour is dry you can re-wet it and move it about again.
