ABOUT US

ALE International LLC

Since 2002, ALE INTERNATIONAL LLC, part of the holding company Barnsley Universal Inc., which owns the ATCO brand, specializes in providing comprehensive solutions in the Middle East region, focusing on:

- Turnkey Projects** : Managing projects from start to finish.
- Consultation** : Offering expert advice tailored to client needs.
- Designing & Drafting** : Creating detailed plans and layouts.
- Supply & Installation** : Delivering and setting up products.
- Service** : Offering ongoing maintenance and support.

Our areas of expertise include Intralogistics, Packaging Equipment, and Commercial Kitchen Equipment. Being part of Barnsley Universal Inc., ALE benefits from access to a vast stock of its core products, positioning it as one of the largest stockiest in the industry.

SPACE = MONEY

Every square meter in warehouses, logistics centers, distribution centers, manufacturing facilities costs money.

The effective utilization & optimization of vertical and horizontal space in a facility, results in huge savings & increase in efficiency.

We at ATCOLIFT provide innovative & integrated solutions for your Storage, Material Handling & Flow and Loading Station requirements.

Our solutions range between a complex warehouse automation system to a simple selective racking system. Apart from providing the standard high quality, cost effective equipment, our team of designers and engineers work closely with our clients to understand their needs and to develop customized solutions in line with the latest technology, to ensure an optimum solution.

Having served the Middle East region for over 22+ years, we are the vendor of choice for the biggest companies in almost every industry. We have achieved this, by getting our basics correct - supplying quality products, ensuring the best after sales service & customer satisfaction, ensuring the customer has the best ROI on the equipment/solutions purchased from us.

Our core products include:

- Racking & Storage solutions
- Warehouse Automation & Software solutions
- Material Handling Equipments & AGV's
- Loading Bay solutions
- Industrial Floor Cleaning Equipments
- Aerial Work Platform's
- Order Picking & Fulfillment solutions
- Dimensioning Equipments
- Conveyor Automations & Cargo lifts

WHY US ?

- Our product meets the **VALUE FOR MONEY** which has been tried and tested in the GCC market for over 22+ years
- Professional management
- Streamlined business processes
- Large inventory of finished goods and spare parts
- Know-how of the industry & market as a whole to provide the right solution & product for the right application
- Team of professionally trained sales & service engineers who ensure a smooth experience for the customers, right from project consultancy, to supply of the right product, to installation, training and after sales service.

Productivity, Performance, Safety, Stability, Durability - remain the hallmarks of our products

DESIGN, CONSULTATION, AND INSTALLATION OF INTEGRATED STORAGE SOLUTIONS

(Racking Systems, Shelving System, Mezzanine Systems and Automated Systems)

Racking & Storage Solutions

Elevate your warehouse efficiency with our comprehensive range of Racking & Storage Solutions. We understand that optimizing supply chain and storage solutions are integral part of any business, hence we offer versatile selection of racking storage solutions as per your business needs. Our racking systems are designed and manufactured as per FEM, SEMA and other international standards.

Selective/Double Deep Racking System

Our Selective Racking System offers great flexibility, as it is fully adjustable and easily installed. This means that you can customize the system according to your specific storage needs, accommodating various pallet types, sizes, and weights.

Mezzanine System

Our Mezzanine System designed to utilize the vertical space in your facility. By adding a mezzanine level, you create an additional floor that can be used for storage, offices, workstations, or other operational needs. Multilevel mezzanine system is more suitable for activities such as E-Commerce, Autoparts, distribution companies etc whose business is majorly into order picking and case picking.

VNA Racking System

It is designed to maximize storage capacity while maintaining excellent accessibility and goods protection. This highly efficient system is ideal for businesses seeking quick picking rates and flawless stock rotation with minimum AISLE of 1.7m - Max height of 17+m. Our VNA Racking system can provide optimized space planning.

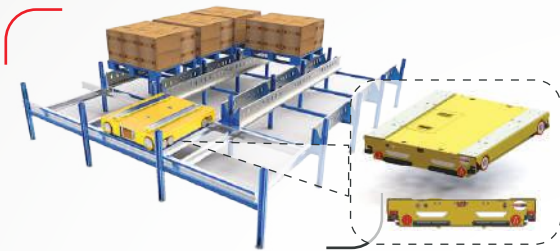

Drive-In/Drive-Through System

It is designed to optimize the storage of homogeneous products in large quantities. This specialized system is ideal for businesses looking to maximize storage capacity while streamlining picking and storage processes. Drive-in/Drive through racking is designed for First-in-First-Out (FIFO)/First-in-Last-Out storage activities majorly in manufacturing industries and FMCG companies

Warehouse Automation - 2/4 Way Shuttle

With cutting-edge features that enable seamless movement in four directions - horizontally, vertically, diagonally, and even customizable patterns. It offers an unprecedented level of freedom and adaptability by Authorising your warehouse operations.

Mobile Racking System

An ideal solution for businesses that operate on a First-in, First-out (FIFO) goods storage setup. It is particularly well-suited for industries such as the drinks industry or as a buffer storage facility in manufacturing.

Cantilever Racking System

This System is usable for loading long goods like Timber, Pipes, Panels etc. Designed to store long or bulky materials of virtually any length. Unlike any other pallet rack system, cantilever racks offer no vertical obstructions in the storage area.

Carton/Pallet live storage

Pallet live storage, also known as gravity flow racking or pallet flow racking, optimises warehouse efficiency by utilising gravity and a dynamic storage system. Pallet live storage eliminates the need for workers or forklifts to travel within storage bays to retrieve pallets.

Bolt Free/Long Span Shelving System

Our System offers a range of sizes and configurations, both open and closed, to efficiently store a wide variety of items. From small components to large cartons and boxes, this system provides the perfect solution for organizing your inventory.

Guide-Rail Lifting Platform(Cargo Lifts)

Guide-Rail Lifting platform is suitable for heavy loading, high floors and the ground can not have foundation pit. this machine operates smoothly, has high safety factor and long using time.

Material Handling Equipment

In the ever-evolving world of industry and warehousing, ATCOLIFT stands out as a beacon of Innovation and Quality. Our diverse suite of Material Handling Equipment are meticulously designed to cater the unique requirements of day to day warehousing operations. ATCOLIFT equipment are designed, manufactured and tested as per the guidelines of European safety standard(CE Certified)

Motorized Pallet Truck

Base capacity: 1500/2000kg @ 600mm load centre
Battery: Lithium
Lift height: 115mm

Powered Pallet Truck (Pedestrian)

Base capacity: 1.6 - 2.5 Ton
Battery: Lead Acid/Lithium
Lift height: 200mm

Powered Pallet Truck (Ride-On)

Base cap: 2 - 10 Ton
Battery: Lead Acid/Lithium
Lift height: 200mm

Electric Stacker (Pedestrian)

Base capacity: 1.5 - 2.0 Ton
Battery: Lead Acid/Lithium
Lift height: 3.5 - 6.2m

Electric Stackers (Ride-On)

Base capacity: 1.5 - 2.0 Ton
Battery: Lead Acid/Lithium
Lift height: 4.5 - 6.2m

Power Reach Stacker (Ride-On)

Base cap: 1.5 - 2.0 Ton
Battery: Lead Acid/Lithium
Lift height: 4.5 - 5.5m

*Options Available: Cold Store verified up to -25°C, Anti Slip tyres, Weight System, and many other accessories.
*Special application Pallet Trucks and Stackers can be made on request.

Reach Truck

Base capacity: 1.6, 2.0 & 2.5 Ton
Battery: Lead Acid/Lithium
Aisle width: 2.8 - 3.2m
Lift height: 4.5 - 13.5m

Order Picker

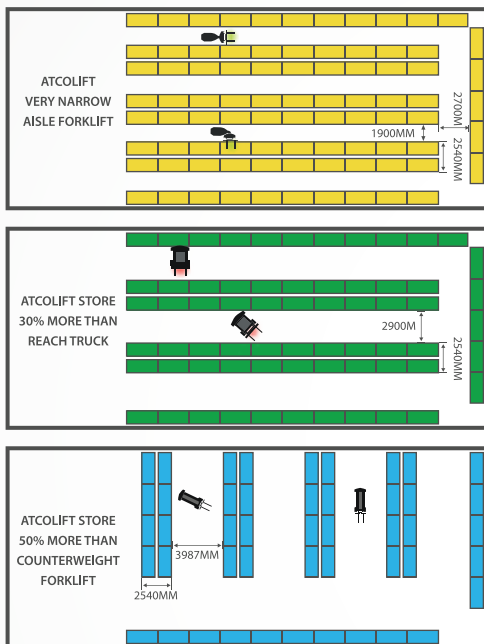

Base capacity: 1 - 1.5 Ton
Battery: Lead Acid/Lithium
Platform Height: Up to 15 m
Cabin width: Up to 3m

INCREASE WAREHOUSE CAPACITY

220° Rotate angle + 50% Extra space

- Aisle width as narrow as 1800mm.
- Stores 30% more pallets than reach trucks.
- Stores 50% more pallets than counterbalanced forklift.
- All the work of counterbalanced forklifts and reach trucks can be done by only one articulated forklift.
- Increase storage and reduce warehouse costs.

Articulated Forklift 1.5 - 3.0 Ton

Articulation angle: 220°(Right/Left)
Battery: Lead Acid/Lithium
Aisle width: 1750 - 2200mm
Lift height: 6.0 - 15.5m
80V Full AC

RICH CONFIGURATIONS

Standard parts

- Joystick armrest (standard)
- LED lights
- Guiding lasers
- Li-ION battery
- 80V dual-core controller
- 80V lifting & driving motor
- Waterproof cable
- Backup Alarm
- OPS System
- Integral side shifter
- Black solid tires
- Adjustable suspension seat

Optional parts

- Fingertip Armrest & Mechanical levers
- Non-marking solid tyres
- Height preselector
- Wireless camera system
- Dual cameras
- Double Deep forks

Stack to left

Rotate angle 220°

Stack to right

Man UP VNA

Base capacity: 1.1 - 2 Ton
Battery: Lead Acid/Lithium
Aisle width: 1.7 - 2m
Lift height: 19m
Navigation: Rail Guide/Wire Guide/
Permanent magnetic navigation

Man Down VNA

Base capacity: 1.2 - 1.6 Ton
Battery: Lead Acid/Lithium
Aisle width: 1.6 - 1.9m
Lift height: Up to 12m
Navigation: Rail Guide/Wire Guide/
Permanent magnetic navigation

Electric Forklifts

3 Wheel Counterbalance Electric Forklift
1.6 - 2.0 Ton

Lift height: 3.0 - 6.0m
Battery: Lead Acid/Lithium
Aisle width: 3.0 - 3.5m

4 Wheel Counterbalance Electric Forklift
1.6 - 3.5 Ton

Lift height: 3.0 - 6.5m
Battery: Lead Acid/Lithium
Aisle width: 3.5 - 4.5m

Heavy Duty Counterbalance Electric Forklift
4.0 - 6.0 Ton

Lift height: 3.0 - 6.5m
Battery: Lead Acid/Lithium

Tow Tractors
5.0 - 6.0 Ton

Desire Speed: 7/12 KM
Battery: Lead Acid/Lithium

**Higher Capacity available on request*

Diesel Forklifts

2.5 - 3.5 Ton

Lift height: 4.0 - 6.5m
Engine: Mitsubishi-S4S EUIII (Japan)
Engine Power: 35.3Kw
Aisle width: 4180mm

4.0 - 6.0 Ton

Lift height: 4.0 - 6.5m
Engine: Mitsubishi-S6S (Japan)
Engine Power: 53Kw
Aisle width: 5050mm

7.0 - 10.0 Ton

Lift height: 4.0 - 6m
Engine: ISUZU-6BGI (Japan)
Engine Power: 82Kw
Aisle width: 5380mm

Forklift Attachments

Paper Roll Clamp

Carton Clamp

Bale Clamp

**Other options:*
Slip Sheet Attachment
Double Deep Fork Attachment
Other Specialised Attachments

Heavy Duty Diesel Forklift

Capacity
12 - 32 Ton

Multidirectional Forklift

Capacity
3 - 5 Ton

REACH STACKER FOR HANDLING CONTAINER CRS4532 **45TON**

Loading Bay Equipment

Welcome to our comprehensive range of Loading Bay Equipment, where efficiency and operational streamlining meet top-tier quality. Our product lineup, including Dock Levelers, High-Speed Doors, Cold Storage Doors, and Dock Shelters, is meticulously designed to elevate the productivity and safety of your loading processes. (CE Certified made as per International Standards)

Dock Levelers

Premier destination for high-quality Dock Levelers. We offer a wide range of innovative and reliable solutions designed to optimize your loading and unloading processes. With our extensive selection of Dock Levelers, we ensure that your loading bay operates efficiently, safely, and seamlessly.

Swing Lip Dock Leveler

This innovative design allows the leveler to rest firmly on the loading bay, providing a stable platform for seamless loading and unloading processes.

Telescopic Dock Leveler

With Telescopic Dock Levelers, you can optimize your loading and unloading operations, regardless of the specific requirements of each situation.

Mini Dock Leveler

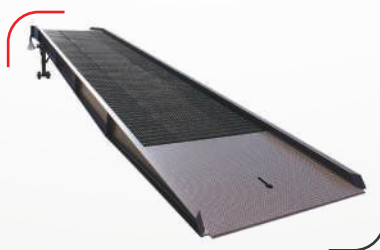

The Mini Dock Leveler is a versatile solution that combines durability and affordability. Available in various lengths, widths, and dynamic capacities, this leveler offers a cost-effective option for your loading bay needs.

Manual Dock Leveler/ Sliding Loading bridge

Constructed with durable steel, the Manual Dock Leveler is built to withstand heavy loads and provide reliable performance. Its sturdy design ensures stability and safety during the loading and unloading process.

Yard Ramp

The Yard ramp is a popular choice for those seeking to easily, and quickly, load and unload containers. The fixed swivel clamp allows the ramp to easily be moved to the desired location whilst the hydraulic allows the load height to be amended swiftly.

Dock House

The dock houses and free-standing frame system couples the building to the vehicle. The standard dock house roof is formed by a special anti-drip ribbed panel. Depending on each need, it can be supplied in different versions.

High Speed Doors / Sectional Doors

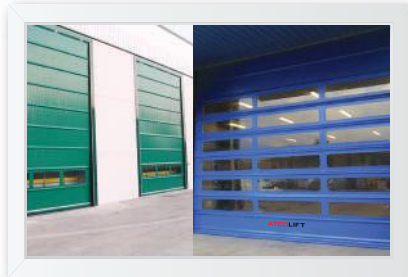

Our Rolling High-Speed Doors offer rapid opening and closing speeds, minimizing heat loss, reducing energy consumption, and improving traffic flow. Designed for high-traffic areas, these doors are built to withstand demanding environments while providing enhanced security and efficiency.

High-Speed Rolling Door

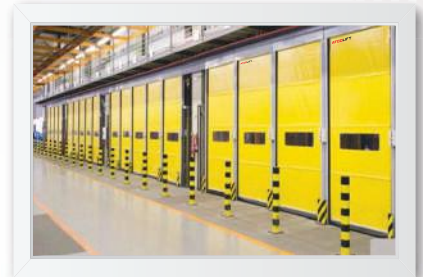

This unique design ensures smoother and quicker operation, allowing for rapid opening and closing cycles, ideal for areas with high traffic volume.

Folding High-Speed Door

A combination of a PVC canvas and a sturdy steel frame. Its versatility, durability, and safety features make it the ideal choice for various applications.

Self Repairing High-Speed Door

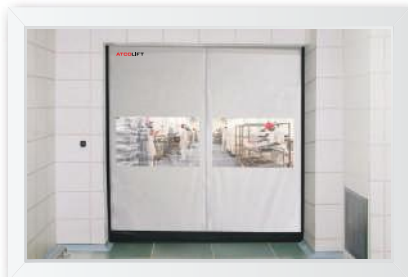

It provides a solution for the division of work areas, both indoors and outdoors, with high traffic of people and vehicles requiring rapid opening and closing maneuvers.

Dock Sectional Doors

These doors are specifically designed to offer exceptional durability and easy operation. Each section of the door is relatively thick and contains insulation. It will maintain optimal temperature control, reducing energy consumption and improving overall efficiency.

Prime Food Fast Roll Up Doors

We understand the importance of compliance in the food industry, which is why our fast roll-up doors come with FDA-approved Polystone® M-Natural guides as a standard feature.

Hard High-Speed Door

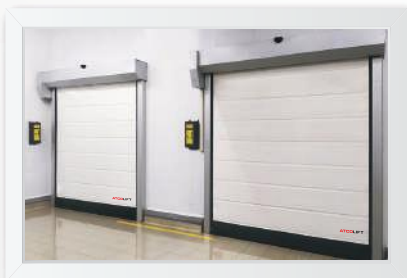

High-speed doors are door systems, mainly used in industrial applications. They are technical enhancements of the generally known sectional doors, PVC fabric doors or roller shutters.

Cold Storage Doors

Range of premium products designed specifically for cold storage environments. With our selection of high-quality doors, you can ensure efficient temperature control, superior insulation, and optimal performance for your cold storage facilities.

Prime Cold Reset

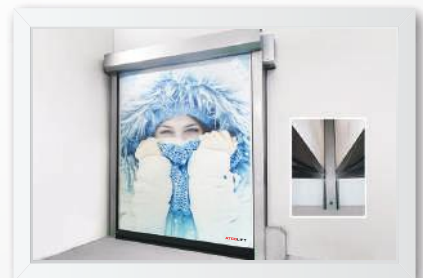

The ultimate destination for Prime Cold Reset High-Speed Doors tailored specifically for temperature-controlled warehouses and fresh & cold logistics facilities.

Prime Freezer

The ultimate solution for cold storage environments with temperatures as low as -18°C.

Prime Freezer Duo

The ultimate solution for cold storage environments requiring temperatures as low as -35°C.

Dock Shelters

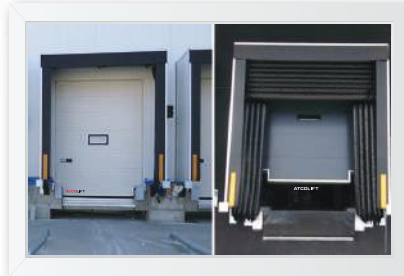

We are offering a selection of top-quality products to enhance your loading dock operations. Choose from our Retractable Dock Shelter, Inflatable Dock Shelters, and Dock Seals for reliable protection and secure seals between the dock and trailer.

Retractable Dock Shelter

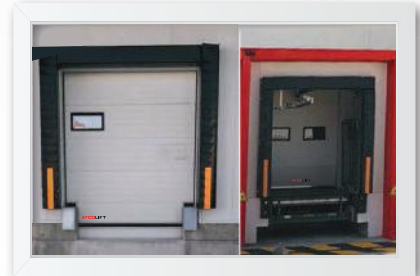

Designed with a sloping roof and a perimeter structure, this shelter features a set of adjustable canvases that conform to the shape of the truck body.

Inflatable Dock Shelters

These shelters feature an inflatable coupling system, powered by an air turbine, to ensure a tight and secure seal during the loading and unloading process.

Dock Seals

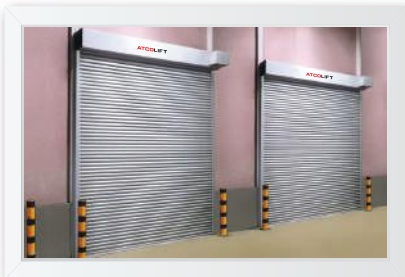

Superior insulation and impact absorption with our Refrigerated Dock Seals. It is engineered to ensure a perfect adaptation to the vehicle box, effectively blocking the entry of air and external elements.

Fire Rated Rolling Shutters

Explore our diverse range of fire-rated rolling shutters and uncover the exceptional options we provide. We prioritize the paramount aspects of safety, durability, and functionality, ensuring that our products surpass even the most stringent fire protection requirements.

Fire Rated Rolling Shutters

The ultimate destination for top-quality fire-rated rolling shutters. Our fire-rated rolling shutters act as essential physical barriers, preventing the spread of fire through wall openings.

Aircraft Hangar Doors & Shipyard Doors

We specialize in providing high-quality, reliable, and innovative door systems designed specifically for the aviation and shipbuilding industries. Whether you need a custom hangar door or a robust shipyard door, we have the expertise and products to meet your unique requirements.

Aircraft Hangar Doors & Shipyard Doors

We specialize in providing high-quality, reliable, and innovative door systems designed specifically for the aviation and shipbuilding industries. Whether you need a custom hangar door or a robust shipyard door, we have the expertise and products to meet your unique requirements.

Telescopic Belt Conveyors

ATCO Telescopic Belt Conveyors are extensively utilized in logistics, shipping and distribution centers, ports, docks, stations, airports, and warehouses. These conveyors are straightforward to set up and require minimal training for operation. The length of the extension part of the conveyor can be easily adjusted to accommodate different vehicle sizes.

Fixed Telescopic Belt Conveyor

Mainly used for loading and unloading of trucks in logistics/3PL distribution centers, eCommerce fulfillment centers, postal express, food manufacturing, electrical appliances industries and warehouses

Mobile Telescopic Belt Conveyor

Non-Motorised Expandable Roller Conveyors best fit into many applications that require versatility, durability and quick conveying solutions.

Inclined Telescopic Belt Conveyor

Hydraulic lifting device can be added to control the height of the conveyor. It can be operated in forward or reverse direction depending your loading unloading needs.

Vertical Conveyors

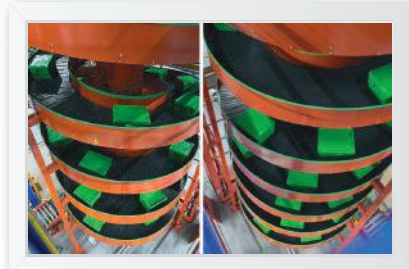

ATCOLIFT offers a superior range of Vertical Conveyors designed to efficiently transport materials between different levels within your facility.

Gravity Spiral Conveyor

This is a vertical transport solution which does not require drive system, includes simple low-friction rollers for allowing gravity to let the materials flow downwards.

Motorized Spiral Conveyor

It can be used for bi-directional movement of goods between floors with a multi in – multi out capability. With a small foot-print it will help you optimize the available space efficiently.

Reciprocating Vertical Conveyor

It is the electro-mechanical lift which transports items in a reciprocating manner on horizontal conveyors.

Cargo Elevator Lifting Platform

The Cargo Elevator Lifting Platform can lift items up to 3,000 kg and comes with a range of safety features such as a safety valve to prevent overloading and an emergency stop button.

Continuous Vertical Lifting Conveyor

Continuous Vertical Lifting Conveyor (CVLC) is mainly used to move materials from one floor to another floor in factories, warehouses & multi-tier mezzanines with great safety.

Conveyors & Automation

ATCO Business Solutions provides top-tier Conveyors & Automation systems designed to enhance efficiency and streamline your material handling processes. Our diverse product lineup includes Motorised Expandable Roller Conveyors, Non-Motorised Expandable Roller Conveyors, Unloading Roller Conveyors, Loading & Unloading Systems (Truck/Container), Belt Conveyors, Roller Conveyors, and Plastic Modular Conveyors.

Motorised Expandable Roller Conveyor

Motorised Expandable Roller Conveyors best fit into many applications that require versatility, durability and quick conveying solutions

Non-Motorised Expandable Roller Conveyor

Non-Motorised Expandable Roller Conveyors best fit into many applications that require versatility, durability and quick conveying solutions.

Unloading Roller Conveyor

ALDRC Series, Width (B) - 762mm (30 Inch), Height (H) - 0.71m (28 inch), Length (L) - Closed(L1)= 2.76m(110ft) - Expanded (L2)=13.2m (520ft), Capacity (C) - 60 kg/m (40 lbs/ft)

**Loading & Unloading System
(Truck/Container)**

Our systems are meticulously designed to enhance the safety and efficiency of your loading and off-loading operations.

Belt Conveyors

Our belt conveyors can handle pallets, cartons, bins, totes, bags and other types of items which are transported during inbound and outbound operations.

Roller Conveyors

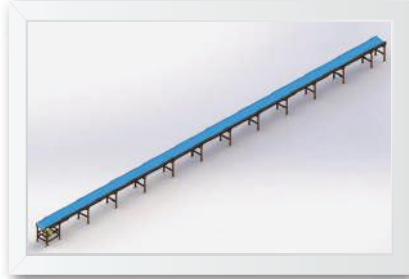

Our roller conveyors can help transport boxes, crates, totes, pallets and polybags providing a fully automated material movement system in your warehouse or fulfillment centers.

Plastic Modular Conveyors

It helps in automated material transport inside the warehouse and DC. As it is Modular structure, any damages for the conveyor can be easily replaced without disrupting the operations for long hours.

Straight Plastic Modular Belt Conveyors

This conveyor used for conveying material in straight direction but parcel loading and unloading is allowed in lateral direction.

Curve Plastic Modular Conveyor

The curve modular belt conveyor is used for the transport of unit loads. The belt consists of plastic hinged links connected by plastic rods.

Software Solutions

Software solutions plays crucial part in managing warehouses and logistics operations efficiently. Our software solutions offer comprehensive tools used to manage inventory, streamline picking processes and optimize warehouse operations.

Our software solutions are easy to use and integrate seamlessly with your existing ERP systems. Our team of experts, liaise with you to understand business needs and provide you with a solution that is tailored to meet your specific requirements.

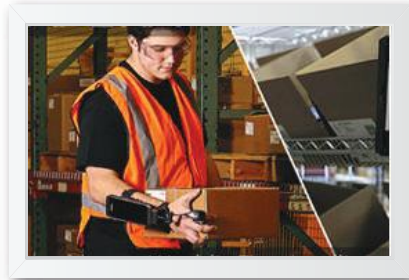

Whether you're a small business or a large corporation, our software solutions can help you improve your logistics operations, reduce costs, and increase your overall efficiency. Contact us today to learn more about our Pick Management System, Warehouse Management System, and how we can help you achieve your business goals.

PURVEY Warehouse Management System

PURVEY Warehouse management System is a comprehensive WMS that is built to scale up as you grow. Be it the volume of products or warehouse at multiple locations, purvey is built to handle all.

APORA Pick Management System

Apora's workflow that makes it easier to pick accurately and deliver fast. It helps you reduce error in picks to less than 10% and reduces walk around time by 60%. This helps in increasing the "same day deliveries" by 100%

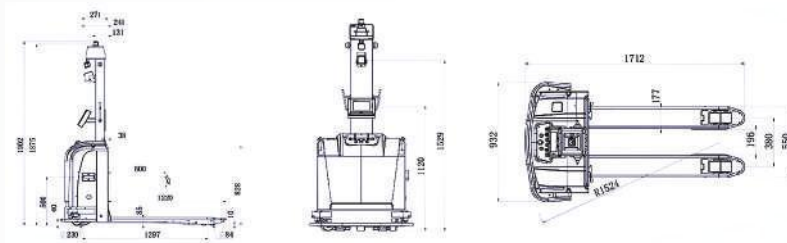

Autonomous Battery Operated Pallet Truck

With a compact structure and strong load capacity, our IZAR Autonomous Battery Operated Pallet Truck can significantly increase operating efficiency. Its built-in controller enables $\pm 10\text{mm}$ high-precision positioning. With single-point laser, 3D obstacle detection, bumper strip, and other sensors for safety protection, the AMR can protect the safety of personnel and goods during operation and ensure flexible cargo transportation within narrow spaces.

Technical Specifications

Features

-  Small in Size but 1.5T Large in Load Capacity
-  360° Large Field of View, Multiple Security Protection
-  3+ Type of Pallet, Wide Angle High Precision Identification
-  400,000m² Large Map
-  Speed Increase 100% up to 2m/s
-  Quick Charge and Change, Dual Battery and Double Endurance

Autonomous Mobile Robots

Powered by the NIDONav & NIDOFleet software, the fleet of robots can be monitored and controlled through a user friendly interface and data can be synced with your WMS or ERP applications.

SIRIUS 100

Capable of transporting upto 100 kgs with flexible path navigation. It can pull a trolley of upto 250 kgs

SIRIUS 500

Capable of transporting upto 500 kgs with flexible path navigation. It can pull a trolley of upto 700 kgs

SIRIUS 1500

Capable of transporting upto 1500 kgs with flexible path navigation. It can pull a trolley of upto 1700 kgs

Industrial Cleaning Equipment

ATCOCLEAN, your premium destination for high-quality industrial cleaning equipment. With our extensive range of cutting-edge products, we are committed to meet the diverse needs of industrial cleaning applications.

At ATCOCLEAN, we pride ourselves on providing durable, reliable, and innovative solutions that enhance your cleaning efficiency. Experience the ATCOCLEAN difference today and elevate your industrial cleaning game. Explore our range now and transform the way you clean.

ACM30 Hand Push Floor Scrubber

Cleaning width (mm): 350 | Battery (V/Ah): 24/32
Suction motor power (w): 400
Continuous running time (h): 1-2
Theoretical cleaning efficiency (m²/h): 1350

ACM50 Walk Behind Scrubber

Cleaning width (mm): 500 | Battery (V/Ah): 24/100
Suction motor power (w): 500
Continuous running time (h): 2-3
Theoretical cleaning efficiency (m²/h): 2800

ACM60 Walk Behind Floor Scrubber

Cleaning width (mm): 500 | Battery (V/Ah): 24/100
Suction motor power (w): 500
Continuous running time (h): 2-3
Theoretical cleaning efficiency (m²/h): 3300

ACK70 Ride on Floor Scrubber

Cleaning width (mm): 750 | Battery (V/Ah): 24/100
Suction motor power (w): 500
Continuous running time (h): 2-3
Theoretical cleaning efficiency (m²/h): 5900

ACK80 Ride on Floor Scrubber

Cleaning width (mm): 830 | Battery (V/Ah): 6/200 * 4
Suction motor power (w): 600
Continuous running time (h): 3-4
Theoretical cleaning efficiency (m²/h): 6500

ACK90 Ride on Floor Scrubber

Cleaning width (mm): 900 | Battery (V/Ah): 32/200
Suction motor power (w): 600
Continuous running time (h): 4-5
Theoretical cleaning efficiency (m²/h): 7800

ACU90 Walk Behind Sweeper

Cleaning width (mm): 920
Rolling brush width (mm): 480
Side brush width (mm): 2x350
Debris hopper capacity (L): 55 | Endurance(h): All day

ACU125 Ride on Floor Sweeper

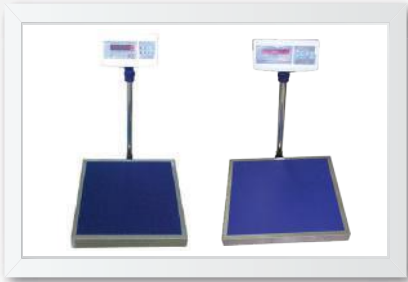

Cleaning width (mm): 1250 | Battery (V/Ah): 48/67
Suction motor power (w): 216
Continuous running time (h): 2 - 2.5
Theoretical cleaning efficiency (m²/h): 7000

ACU220 Big Out Door Sweepers

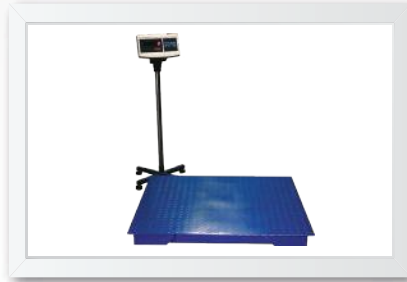

Cleaning width (mm): 2200 | Battery (V/Ah): 48/300
Rolling brush width (mm): 690
Continuous running time (h): 5
Theoretical cleaning efficiency (m²/h): 2200
