Tips & Tricks

We've tried, we've tested and now we're sharing. These top tips will make it super easy to enjoy a delicious slushie treat.

Let it settle

Keep the slushie maker upright for at least 2 hours before first use.

Perfect balance

All inputs must contain at least 10 g of sugar per serving (233 ml). When using the **'FROSTED COCKTAIL'** preset function, all inputs must contain between 2.8% and 16% alcohol.

Sip it quick

When using the **'MILKSHAKE'** or **'ICED FRAPPE'** preset, dispense contents within 30 minutes of the cycle ending to avoid foaming.

Smooth & chill

DO NOT add ingredients that are hot or solid e.g. ice, frozen fruit, ice cream etc.

Keep it chilled

Chill all pre-made ingredients before pouring.
Chill your glasses before serving to maintain frostiness.

Clean smart

Accessories are dishwasher safe but skip the heated dry cycle - let them air dry instead.

No-prep slushies with one-touch operation.

Add in your drink of choice and pick your preset.
