HOW TO USE THE CATALOGUE

The Jonluca Neal Sales Catalogue is published four times a year. This allows increased time to plan purchases and in store promotions. Our catalogue not only demonstrates the range of products we offer, but acts as a sales tool for you! We have included plenty of information to help sales; including product attributes and background on each brand's story. We also have included a catalogue legend on page TBD, to help read the catalogue. In addition to our catalogue, we will continue to send out deals that have been customized to maximize your sales during specially themed months. We suggest using preferred pricing to conduct in-store features.

SPROUD

Sproud was born in 2018, the founders Maria, Christopher, and Nicklaus, are three people with very dynamic backgrounds. It took the team over nine months to develop the taste they were looking for, as they wanted to develop a Non Dairy beverage with the lowest possible carbon footprint, and the taste would mimic Milk. So Sproud chose pea, as it's 360 degree carbon neutral.

@besproud

ICELANDIC WATER

ICELANDIC Glacial is the Super-Premium Natural Spring Water from Iceland's legendary Ölfus Spring. Naturally balanced, environmentally kind, exceptionally pure. Home to glaciers, spouting geysers, volcanoes and raging rivers, Iceland is one of the world's cleanest ecosystems. The water is slowly and naturally filtered through layers of volcanic rock, thereby producing a natural spring water so pure that nothing is added or taken away.

PACIFIC NATURAL FOODS

Pacific makes foods that are clean and simple, using only natural and organic grains, meats and veggies. Preservatives and their packaging have never met. That's because the packages Pacific uses allow even the most perishable foods to stay fresh and tasty without chemicals or preservatives. They also require no refrigeration, which saves on energy, too. At Pacific, their ingredients are held to some pretty high standards. Long before there were USDA Organic labels, Pacific began tracing the origin of every natural and organic ingredient used in their foods.

GENUINE TEA

At Genuine Tea, we pride ourselves on leading the Third Wave Tea movement in Toronto. The purpose of the Third Wave Tea movement is to close the gap between the tea in your cup and the people who have dedicated their lives to producing it.

It is a shift in focus from convenience and quantity to freshness and quality.

LEVEL GROUND, TEA AND COFFEE

Our mission is to trade fairly and directly with small-scale producers in developing countries, and to market their products in North America, offering our customers ethical consumer choices. Since 1997, we've been all about connection.

It started with small-scale coffee farmers in Colombia, and it's grown to a community of like-minded people connected by the belief that our choices matter.

ELIAS HONEY

Imagine a world without bees. There would be no fruit, veggies, and certainly no honey! In fact, with most of the food we eat we can pretty much guarantee a bee had something to do with it.

That's why we work closely with our farmers and beekeepers to ensure good beekeeping practices are followed. We want to see our hives not just survive—but thrive

A2 MILK

A2 Milk is an A1 protein-free meaning it comes from cows that naturally produce only the A2 protein and no A1.

Research shows that some people may avoid digestive discomfort when they drink milk with only A2 protein.

a2 Milk Company is the only milk validated to be A1 protein free from COW to CUP.

EBY MANOR

Guernsey cow milk is naturally higher in Beta-Carotene, Omega 3, calcium and A2 protein (the lesser known A protein), so the cows don't need specially formulated feed to achieve these nutritional benefits. It's pure and wholesome...naturally.

These natural advantages simply create the creamiest, best tasting and nutritious dairy product we have ever tasted.

COMEBACK SNACKS

Comeback Snacks is a specialty popcorn company that challenges the status quo. After being sentenced to a four-year jail term stemming from her battle with addiction, Founder Emily O'Brien set out on the mission to get clean, transform herself, and make her time in jail as meaningful as possible. Having fostered an entrepreneurial career before her sentence, Emily birthed the idea for Comeback Snacks to create snack foods, starting with unique popcorn flavours inspired by the ones she found and curated in prison. Aware of the hardships of being incarcerated, Emily is driven to help remove the stigma surrounding people with prior convictions, as well as give them opportunities for reintegration through training, empowerment and education.

LAIKI

The secret to Laiki's taste is black and red rice from Thailand. Black and red rice pack more nutrients and flavour than white or brown rice. By keeping the ingredients to a minimum, all the flavour you get in every crunchy bite comes from the wholegrain rice itself. Laiki® Rice Crackers are the labour of love: a love of food, a love of snacking, and a love for sharing this with all of you.

PAQUI

In a world filled with “flamin’ hot” options packed with artificial ingredients, Paqui dares to be different. We believe that real heat comes from real peppers and shouldn’t be grown in a lab. From the tangy tomatillos in our Zesty Salsa Verde chips to the freakin’ hot bhut jolokia peppers, better known as ghost peppers, in our Ghost Pepper chips, we’ve got spice for everyone. As creators of the One Chip Challenge – made from real Carolina Reaper peppers – heat is what we do best.

PEACASA

An adventure through the Mediterranean led Peacasa's owners to the street markets in the South of France where they discovered the age-old tradition of wood-fired chickpea crepes called “Socca”. The simple recipe inspired them to create Peacasa – deliciously light and crispy chips made from chickpeas.

After a year of selling at Toronto Farmers Markets, Peacasa brand decided to scale their recipe to share the chips with the rest of Canada. They developed a brand new way to make chips and built their own manufacturing facility in London, ON.

PACIFIC NATURAL FOODS

Pacific makes foods that are clean and simple, using only natural and organic grains, meats and veggies. Preservatives and their packaging have never met. That's because the packages Pacific uses allow even the most perishable foods to stay fresh and tasty without chemicals or preservatives. They also require no refrigeration, which saves on energy, too. At Pacific, their ingredients are held to some pretty high standards. Long before there were USDA Organic labels, Pacific began tracing the origin of every natural and organic ingredient used in their foods.
