Traceless

FINGERPRINT RESISTANT &
ANTIMICROBIAL LAMINATE

When we say Traceless, we mean it both ways. As the name implies, Traceless laminates leave no traces behind, be it visible fingerprints or germs that is invisible to the naked eye.

Area of Applications

Traceless's multi-attributes makes it an ideal surface for healthcare facilities, commercial and residential spaces.

COMMERCIAL

It can be as simple as visiting your favourite cafe, using a public washroom or going to the gym: in these day-to-day activities, germs can easily proliferate and transmit. In the face of the global COVID-19 pandemic, organisations are entrusted with a greater level of responsibility to provide a safe and sanitised environment for their customers and employees.

Our solution: Traceless antimicrobial laminates that offers long lasting protection against microbes such as bacteria and viruses. These robust laminates are ideal for high traffic areas as their antimicrobial properties do not diminish even with wear and scratches.

RESIDENTIAL

For lovers of dark décor, keeping your dark furnishing free from visible fingerprints does not have to be a hassle.

Both aesthetic and functional, Traceless enables homeowners to go about their daily activities without worry of leaving behind traces of unsightly fingerprints or bacteria on their homes' surfaces

Common applications: Cabinets, wardrobes, table tops, shelves, feature walls

How Antimicrobial Laminates Are Made

During the impregnation process

- The melamine resin is compounded with antimicrobial additive
- This antimicrobial additive is diluted in both the Overlay layer and in the Deco paper layer

High Pressure Laminate properties

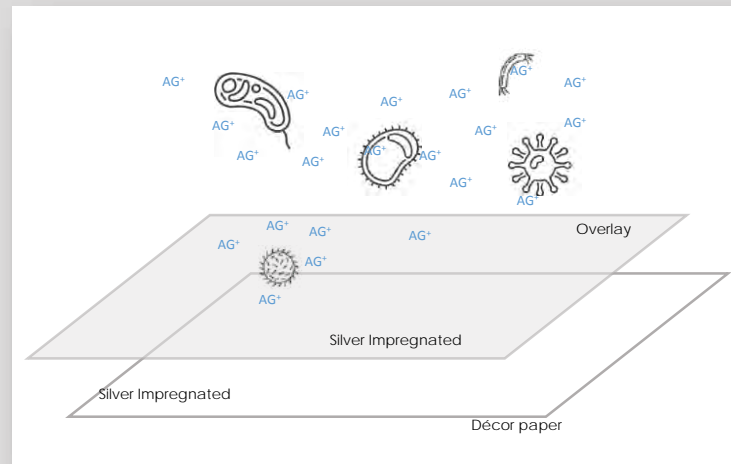

Impregnation

Antimicrobial Certification

Traceless is antimicrobial-certified by SETSCO.

Constantly active, Traceless laminates offer 24/7 protection by reacting and releasing silver ions when its surfaces come in contact with microbes.

Its unique impregnation process and uniform distribution of silver additives on multiple layers of the laminate ensure that its antimicrobial properties remain effective throughout its product life cycle, even with heavy usage.

When microbes contact the surface, the silver contents in the laminates release silver ion AG^+ to kill the germs.

Bacteria	Inoculums CFU/ml	U_0 CFU/ml	U_t CFU/ml	A_t CFU/ml	R	Antibacterial %
E.coli	4.80×10^5 (5.68)	7.50×10^4 (4.88)	5.31×10^4 (4.73)	6.25×10^{-1} (-0.2)	4.93	99.99
S.aureus	3.60×10^5 (5.56)	9.58×10^4 (4.98)	8.06×10^4 (4.91)	6.25×10^{-1} (-0.2)	5.11	99.999
P.aeruginosa	4.20×10^5 (5.62)	8.04×10^4 (4.91)	5.19×10^4 (4.71)	6.25×10^{-1} (-0.2)	4.92	99.99
B.subtilis	2.80×10^5 (5.45)	8.75×10^4 (4.94)	3.92×10^4 (4.59)	5.81×10 (1.76)	2.83	99

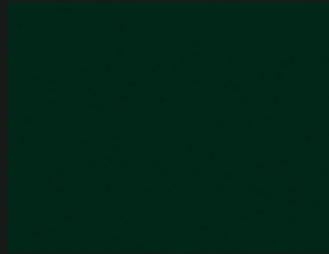

Conclusion: Traceless samples have passed the Antimicrobial Efficacy Test by obtaining log values greater than 2.0 log reductions in accordance with JIS Z 2801:2012

Hotel Chadstone - Chadstone

Architecture and Interiors:
Bates Smart

The \$130 million hotel with 250 rooms and extensive conferencing and food and beverage facilities creates a new 5-star destination away from Melbourne's CBD.

Close to 3,000 sheets of our Admira Off White Premium Leather High Pressure Laminate was used to articulate a graceful message through the art of curated joinery including tv unit surrounds, bar fridges, dining tables and ensuite cabinetry.

Products Used:

High Pressure Laminate - Group 1 Fire Rated
• Admira LS5114S Off White Premium Leather

Project/Product Requirements:

- Project required a finish that replicated real leather as close as possible
- Project required a laminate that would be stain, graffiti, impact resistant and suit high traffic conditions
- Project required a laminate that could achieve curves.

Kenny st House - Balwyn North

Architecture and Interiors:
Chan Architecture

The client's brief was for a light-filled family home that allowed all four members of the family to interact in the one main living space but to also offer various opportunities to have spaces that allowed for activities with varying levels of privacy. The result is a family home that finds the balance between form and function – whilst it makes a strong architectural statement, it is also very comfortable to live in and understands all the needs of the family who live in it.

Products Used:

High Pressure Laminate - Group 1 Fire Rated
• Admira QBL776W Dark Forest Oak (Anti-Fingerprint)

Project/Product Requirements:

- Project required a finish that replicated veneer.
- Project required a laminate that would be stain, impact and most importantly UV resistant.
- Project required a material that could achieve longevity in a family environment.
