

## Rome

The Rome MUGA is a dynamic and broad outdoor sports facility, built to accommodate diverse sports like football, basketball, and tennis. Enclosed by resilient, anti-vandal steel fencing that stands at 1000 mm, it offers a safeguarded and consistent space for sports and games. MUGAs are often installed in schools and urban areas, providing a safe and contained environment for children and adults alike to engage in physical activities.

Detailed information in the warranty document

The MUGA is made of high-quality S235 steel, featuring vandal-proof stainless steel screws and nuts. It undergoes sandblasting for cleaning and receives a corrosion-resistant powder coating finish. Additionally, a galvanized surface option is available for enhanced protection and longevity.

Our MUGA features reinforced base plates fixed to a concrete base, ensuring stability and durability. This design can withstand intense sports activities, maintaining its structural integrity due to the solid foundation provided by the concrete base and the added strength of the reinforced base plates.

Our MUGA's post ends are sealed with injection moulded plastic, enhancing durability and safety. This feature ensures a smooth finish, reducing wear and tear while providing additional protection against elements.

The entrance panel is designed to prevent the ball from leaving the playing area. With its appropriate length and positioning, it acts as a barrier ensuring that the ball remains within the designated game space while maintaining the aesthetic appeal of the arena.

BeStrong MUGA's are designed in a modular system, offering easy customization of fence height/width, goal numbers, basketball hoops, and entrances. Tailored to your needs, they adapt to various sports activities, providing flexibility and creativity in shaping your sports area.

Our basketball hoops are designed with a curved shape, available in white color, and coated with weather-resistant fiberglass plastic. The basketball hoop is positioned at the official NBA height.

The MUGA goals adhere to the official size regulations set by FIFA Futsal and IHF Handball. These goals are designed to meet the specific dimensions required for these sports, ensuring a professional playing experience. Whether it's Futsal or Handball, these MUGA goals provide the perfect setup for competitive matches and training sessions.
