COMPANY PROFILE

PT. Mitra Mandiri Packindo

MMP

PT. Mitra Mandiri Packindo

was born from the passion for creating innovative disposable cutleries. It is our main value to create a better quality and ergonomic design for all of our products. Our story begins on 2017 where we introduced our main Brand named Victory, and now here we are! We are very proud as our product stands out in the market amidst a massive competition in Plastic Injection Industry. Together with us let's create a better food packaging and cutleries because the future of food packaging is now!

INTRODUCTION

All you need to know about us

01

About Us

We are a Plastic Injection Manufacturer that focused on creating and developing food packaging and cutlery. The manufacturer that were operating since 2017 is now growing so fast together with our thinwall, spoon, jar, and custom products. Distributing accross Indonesia, we are maximizing our distribution channel while developing value through our products.

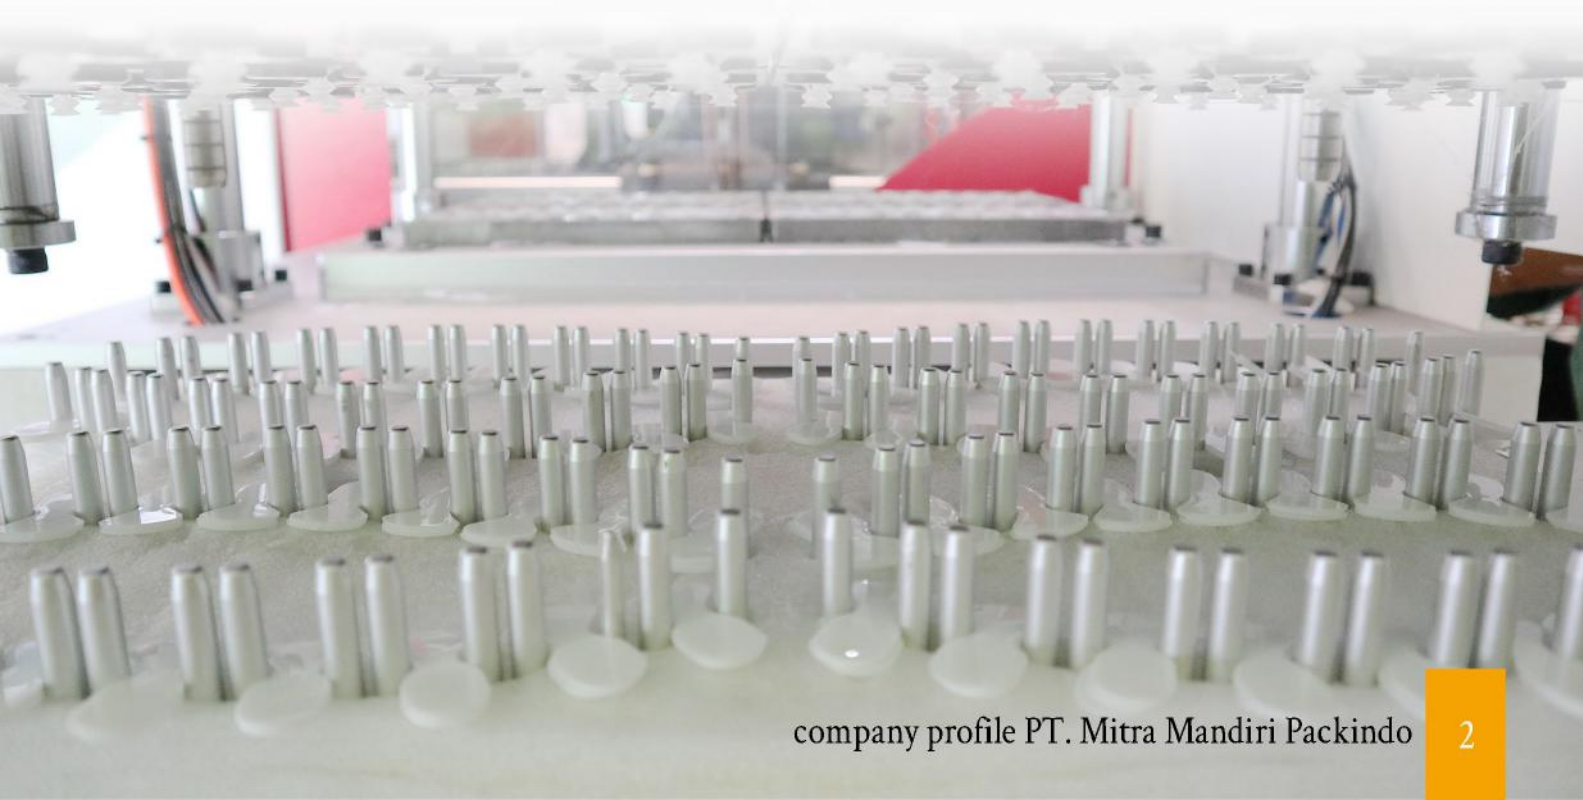

Supported by the experienced professionals, we keep thriving, innovating, and improving step by step to create a valuable

products for Indonesia and for the world.

Right now we make a breakthrough by developing Business to Business model which emphasizing cooperation between companies. We are committed to keep giving value both for our customer and the people who work with us.

“The best way to predict the future is to create it”

-Dr. Forest C. Shaklee-

Our Vision & Mission

Vision

Become the main choice and mainstay as a company that engaged in the Injecting Plastic Industry by maintaining an impressive experience in every interaction with customers.

Our Promise

It is our commitment to always provide a high quality product for our customers, so we promise our products always:

Periodically tested
by our Quality
Control

Safe and quality for
food packaging, free
from contaminants
such as dust, residual
dirt, oil, toxic, or
unpleasant smell

Have the best quality
in order to meet the
international
standard

Our Brand

Victory brand is our first brand that we introduced to the market. our first product for the brand is spoon series, along with the time goes and the demand for food packaging is getting higher so we diversificated to manufacture thinwall.

The trend of using thinwall that went up from 2015, now is getting hyped and we saw this opportunity to complement our product. Here we are with another diversification to thinwall product. Thinwall is an alternative food packaging that being used around the globe, it can be used as a substitute for paperbowl, food pail, and another food packaging. we create valuable product for the market in order to meet the market's need for a high quality food packagings and cutleries, and it is thanks to our beloved customer that we can grow as a big plastic injection manufacturer.

A close-up photograph of a person's hands holding a clear plastic container filled with a meal of brown rice, green vegetables, and shredded cheese. The word "PLANTS" is written in large, bold, blue capital letters across the center of the container. The background is blurred, showing other food items in containers.

PLANTS

This is where our awesome products are made

02

Plants
