COLOUR CHART ENAMELS

SMOOTH ANTI-RUST ENAMELS

BARPSINT ALTA DECORACIÓN

- 3-4 h
- 24 h
- 10-13 m²/l

Premium decorative synthetic enamel – gloss, satin (urethane), or matt – with excellent filling power, coverage, and levelling, featuring anti-rust properties.

VIKING

- 3-4 h
- 24 h
- 12-14 m²/l
- BARPI COLOR**
TU COLOR AL INSTANTE

High-quality decorative synthetic enamel made with alkyd resins, featuring anti-rust properties, special characteristics, and high-solidity pigments. It offers smooth, adherent, durable, premium finishes.

ESMALTE ANTIOXIDANTE LISO

- 4-5 h
- 24 h
- 11-13 m²/l

High-quality decorative anti-rust enamel made with alkyd resins, special additives, and high-solidity pigments that deliver anti-corrosive, glossy, durable, adherent, and premium finishes.

MULTI-SURFACE ADHESION ENAMEL

ESMALTE MULTIADHERENTE

- 3-4 h
- 10-12 h
- 8-11 m²/l

Enamel based on special resins that provides excellent adhesion. Suitable for galvanised steel, iron, aluminium, and light alloys.

VARNISH FOR METALS

BARNIZ PARA METALES

- 30-60 min
- 12 h
- 9,5 m²/l (15 µm film)

Solvent-based clear varnish. Anti-rust protection for all types of metals, both indoors and outdoors.

HIGH-TEMPERATURE RESISTANT

ESMALTE PARA RADIADORES

- 3-4 h
- 24 h
- 12-14 m²/l

Synthetic enamel based on alkyd resins with high filling power, coverage, and levelling. Suitable for the painting, restoration, and decoration of radiators.

PINTURA ANTICALÓRICA

- 1-2 h
- 13-16 m²/l

Matt paint made with modified resins resistant to high temperatures. Easy to apply, fast drying and curing. Resistant to temperatures up to 400 °C.

DECORATIVE EFFECTS

OXIFER

- 5-6 h
- 24 h
- 10-12 m²/l

Decorative forged-metal-effect enamel made with modified alkyd resins and high-solidity pigments.

OXIFER MARTELÉ

- 10-15 min
- 6 h
- 8-9 m²/l

Hammered-effect metallic enamel, direct-to-metal, glossy, with a highly decorative texture that also hides surface imperfections.
