THE ENGINEERED APEX

GRIZZLY

The brand was born and named after the Grizzly Bear, a highly intelligent, fast, apex predator. The top of their food chain, the grizzly bear uses their immense strength and speed to succeed in their environment.

THE DNA

The GRIZZLY SAFETY PRODUCTS division of the Bend-tech Group is dedicated to supplying intelligent solutions that maximise safety and efficiency, fast. The GRIZZLY division is at the apex of the engineered manufacturing industry. Enabling you to evade danger through proactive, engineered tough solutions that create safe maintenance scenarios, GRIZZLY SAFETY PRODUCTS are safety, on your side.

E-HUB EFFICIENCY WORK MINI STATION

The E-Hub Mini is a mobile workstation that allows an operation to harness efficiency and boost safety to the workshop floor. Saves on lost productivity, reduces risk of injury, and allows improved control of the workshop.

Material:
Steel

Finish:
Grizzly Orange

Dimensions:
1940mm H / 1200mm L / 580mm W

GRIZZLY WORKBENCHES

Introducing Grizzly's standard range of workbenches designed for all sites and workshops.

Available in a range of size options including 1200mm, 1800mm, 2400mm and 3000mm these work benches have a 2-tonne load limit and are certified and compliant with Australian standards.

Our standard workbenches provide an affordable solution that promotes both safety and productivity.

We understand the importance of customisation, and that's why we offer a range of fit-out options to tailor to the needs and requirements of your workplace. Lockable castors, forklift pockets, drain trays, and more can be incorporated, providing added convenience and functionality.

GRIZZLY TRESTLES

Suspended load safety is critical on-site and ensuring maintenance personnel are operating with equipment that ensures their safety should be top of mind.

Grizzly's range of workshop trestle stands are engineered and certified to AS4100 and AS1170. They are designed to be used for workshop duties such as plate cutting and supporting machinery or engineering components.

Grizzly trestles come in 2T,5T and 10T working load limits and are available in a range of sizes to ensure you have the gear you need to perform the maintenance required.

650mm H / 2400mm L

GRIZZLY STEEL RACKS

The safe and efficient storage of materials and equipment is critical to personnel safety on your operation. Suspended loads create a significant hazard if not handled correctly with certified equipment.

Grizzly's range of standard general-purpose equipment and material racks are certified to AS4100, AS1554 and AS1170 to ensure they outperform your requirements and eliminate the hazards associated with suspended load storage.

Our range of general-purpose equipment and material racks have a 3T per shelf working load limit and are available in 6m, 7.5m and 9m configurations.

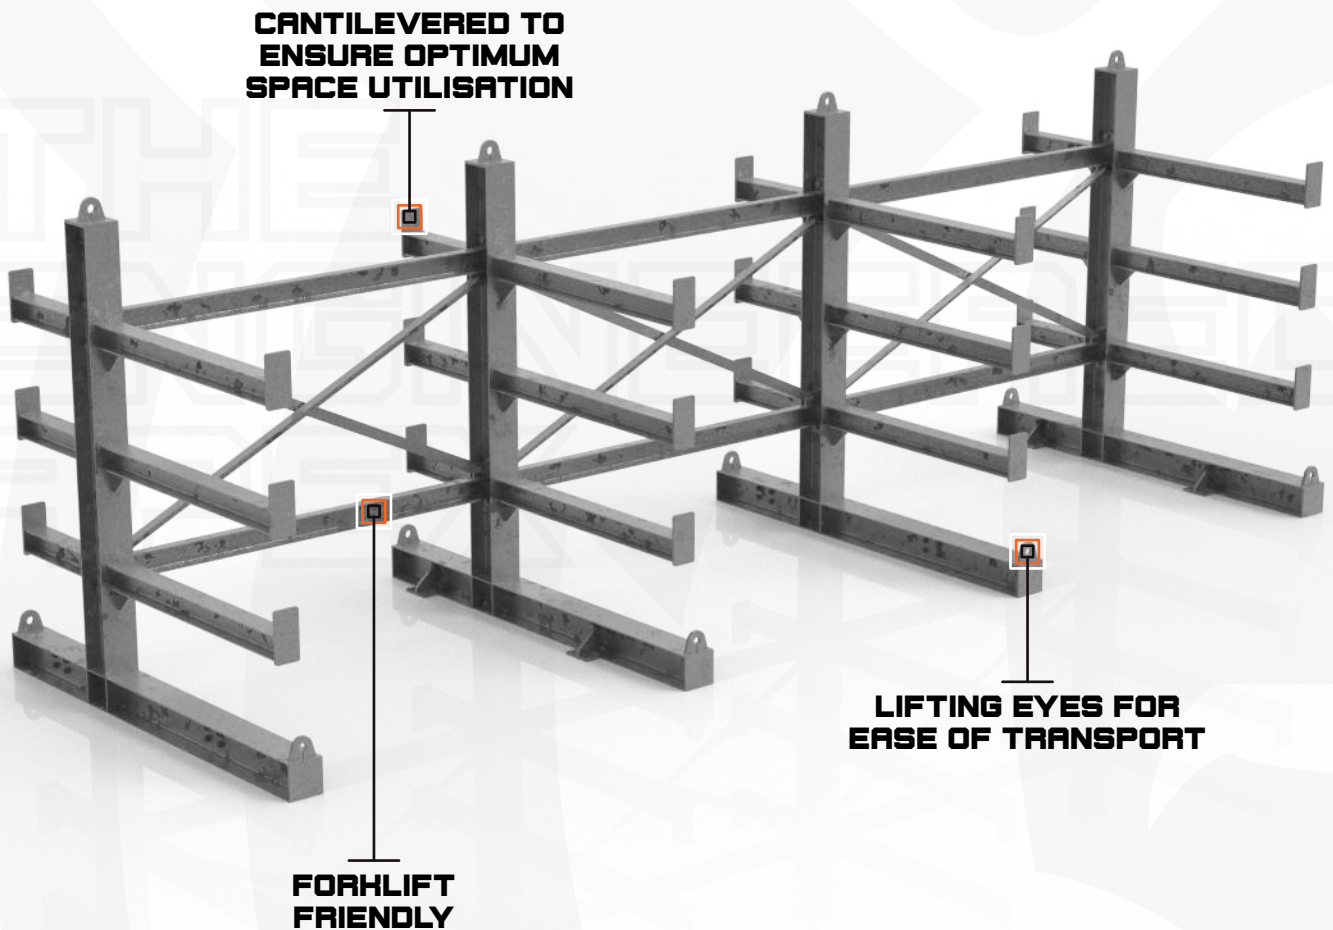

**THE
ENGINEERED
APEX**

SMALL GENERAL PURPOSE STEEL RACK

Our Small General Purpose Steel Rack is used for storing steel and equipment. Being certified and compliant with Australian Standards ensures your site will satisfy any compliance audit.

 Material: **Steel**  WLL: **3T per shelf**  Finish: **Galvanised**  Dimensions: **2000mm H / 6000mm L / 2048mm W**

HORIZONTAL STEEL PLATE RACK

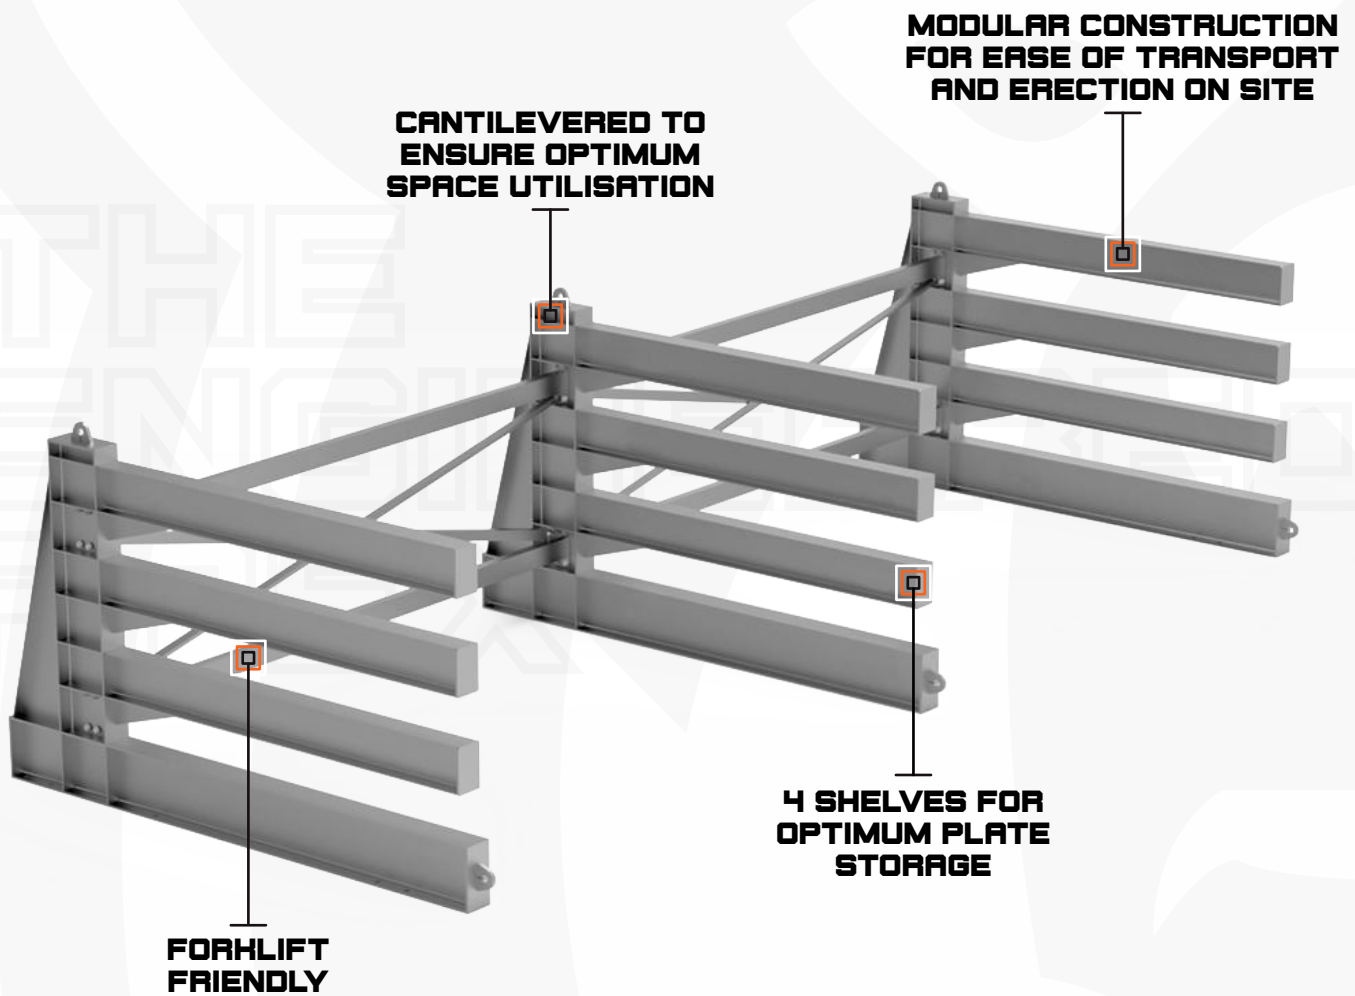

A designed and engineered mobile steel plate rack for safe and efficient maintenance. Certified and compliant with Australian Standards.

 **Material:** Steel  **WLL:** 6.5T per shelf  **Finish:** Galvanised  **Dimensions:** 2004mm H / 3000mm L / 3328mm W

HORIZONTAL PLATE STORAGE RACK 8M

Our Horizontal Steel Plate Storage Rack is designed to store full size steel plates and sheeting. Engineered and certified ensures your site will comply with any safety audit.

 Material: **Steel**  WLL: **6.5T per shelf**  Finish: **Galvanised**  Dimensions: **2004mm H / 8000mm L / 3329mm W**

CERTIFIED COMPLIANT 
WITH AUSTRALIAN STANDARDS 

PART NO. 5003285

STEEL FREE STANDING STORAGE RACK

Our Steel Free Standing Steel Storage Rack is designed and engineering to be used for the storage of long length steel and tooling and will ensure your site complies in the event of any safety audit.

 Material: **Steel**  WLL: **4.8T per shelf**  Finish: **Galvanised**  Dimensions: **2250mm H / 6000mm L / 2400mm W**

TAKE NOTE

BRAND STORY

We are excited to announce the redefined identity of our engineered safety products division. The transformation reimagined due to the sustained commitment to enabling and empowering maintenance professionals to succeed, safely.

ORIGINS

Our safety parts division offers an intelligent range of engineered safety solutions. The origins are steeped in a curious understanding of what heavy-industry professionals need to maximise safety during maintenance. With a deep-seated connection to the bespoke engineered solutions the Bend-tech provide through consulting, designing, engineering and manufacturing, GRIZZLY SAFETY PRODUCTS have been standardised to provide and answer to suspended loads, lifting and handling, working at heights, falls from height, equipment and material storage and falling objects.

EVOLUTION

The GRIZZLY SAFETY PRODUCTS range has grown into its own beast of an offering. With solutions that enable the evasion of danger and risks associated with all facets of maintenance, we knew the division required its own identity. We have been at the apex of the industry for many years, we are the go-to solution provider for heavy-industrial safety. The re-brand is an evolution of the offering our customers love.

VISION

Our new identity is an affirmation of our commitment to our mission – to be the apex provider of intelligent, engineered safety solutions. We imagine all of our current and future heavy-industrial customers operating in a proactive environment where safety and efficiency is maximised and maintenance associated danger is evaded.

PROMISE

GRIZZLY SAFETY PRODUCTS are designed, engineered and manufactured beyond the relevant safety standards. Our promise is to provide intelligently designed solutions that are manufactured in our state-of-the-art facility in Western Australia. These solutions eliminate risks associated with maintenance are extensive, the GRIZZLY range is all encompassing when it comes to enabling the evasion of danger and empowering personnel to perform safely.
