COMPANY PROFILE

Kitchens, BICs, vanities, studies, and bars,
as well as wall cladding.

Luxury you deserve, at a price you love.

OUR PROJECTS

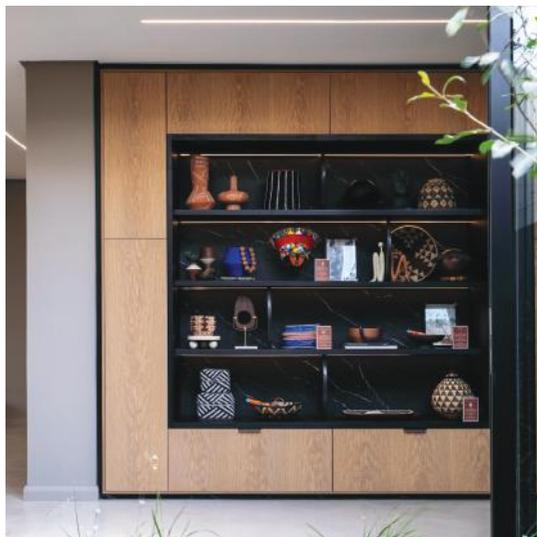

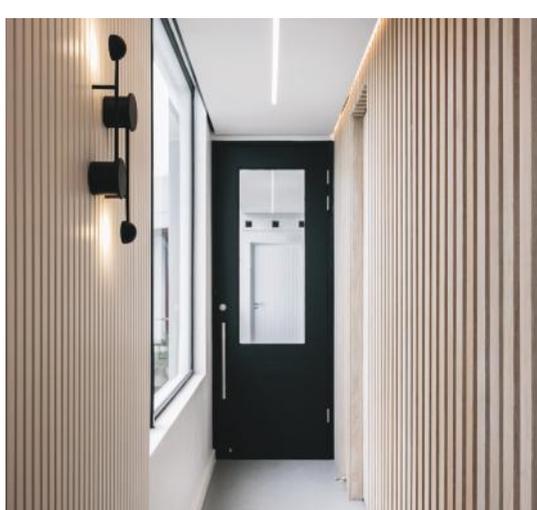

A curated selection of our recent work.
Tailored, tactile, and timeless.

Every detail tells a story.

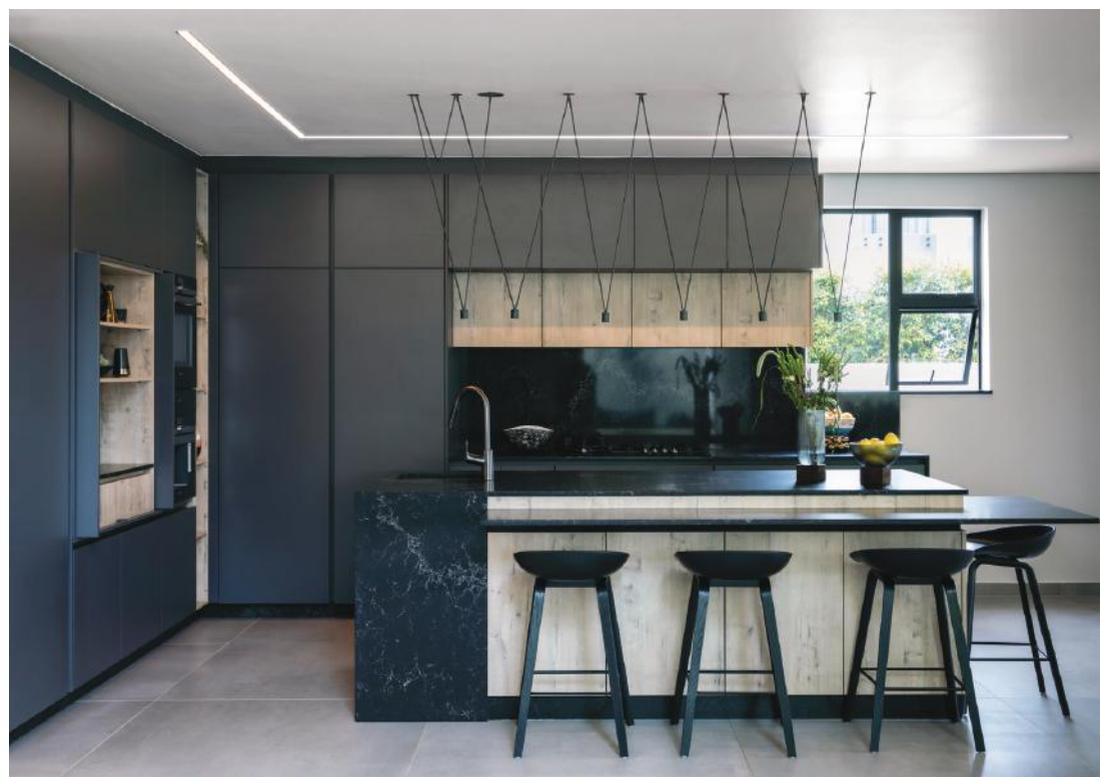

From bold kitchens to refined TV units, our work is driven by purpose, personality, and precision. Each project reflects a unique collaboration between our team, our clients, and the spaces we help bring to life.

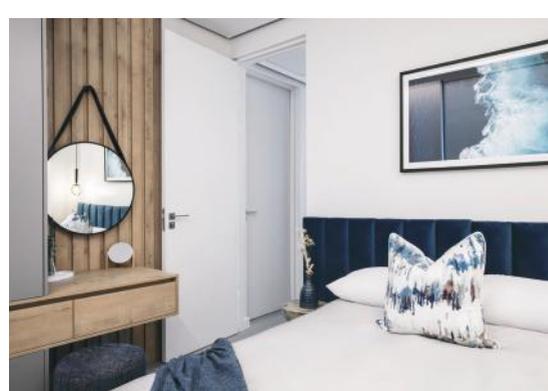

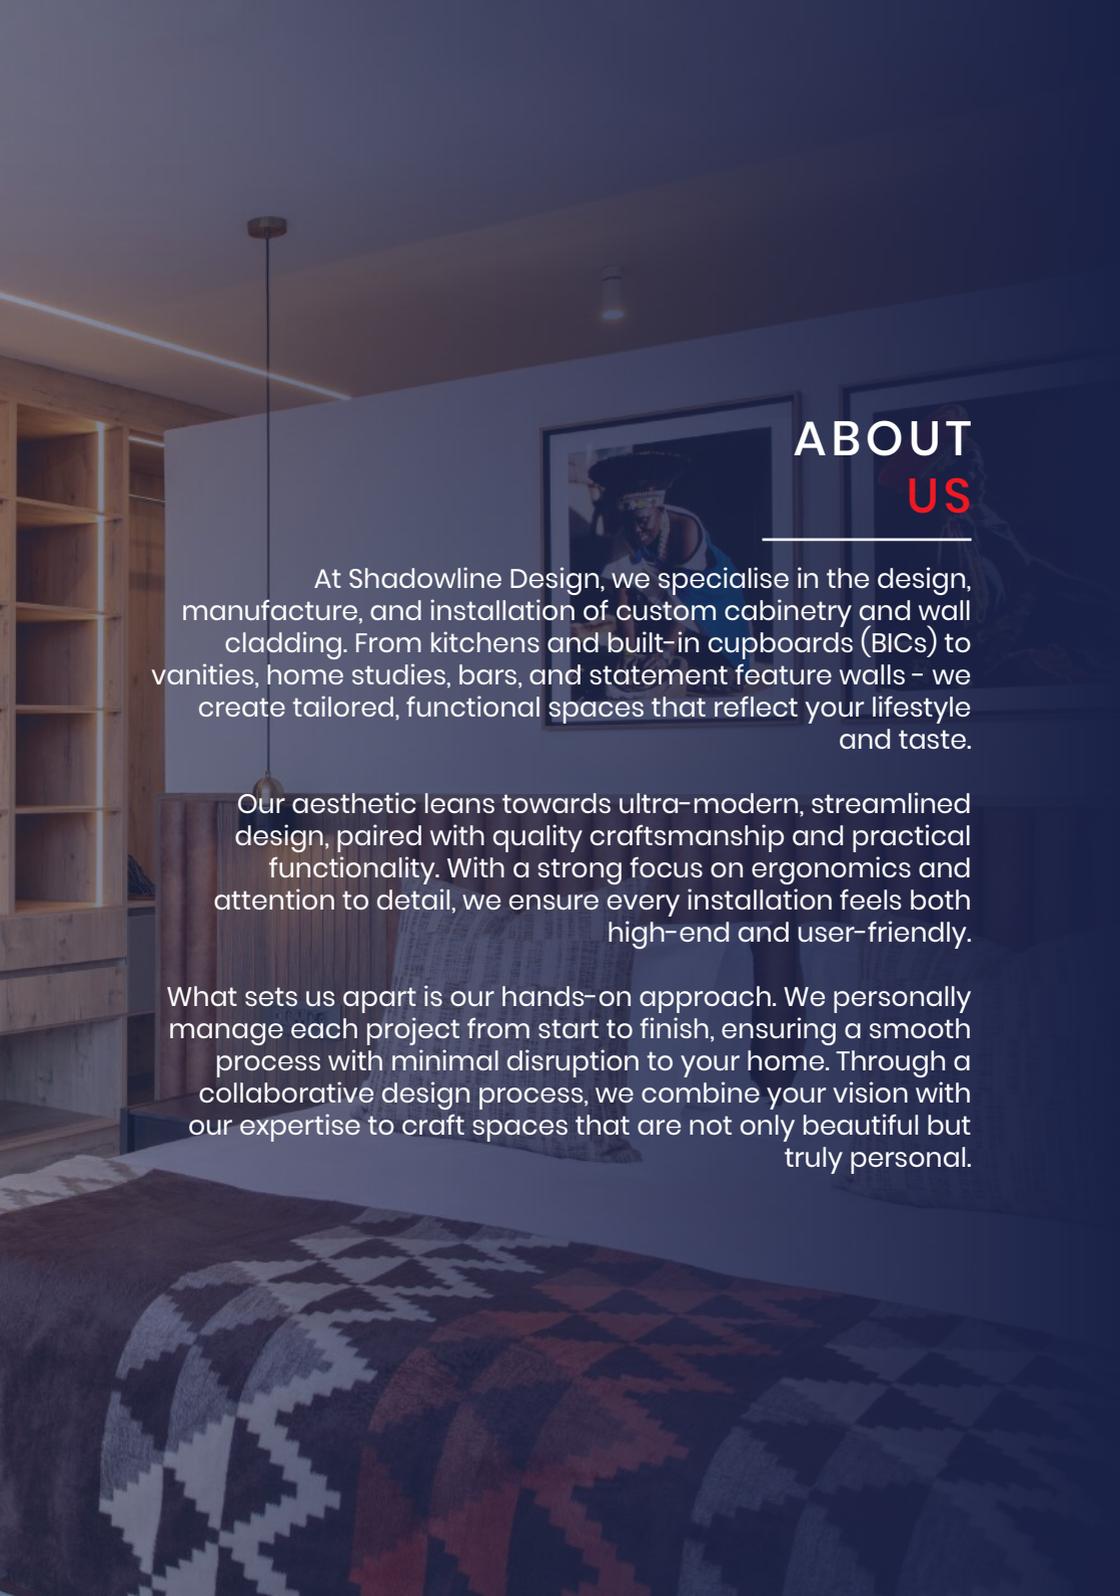

ABOUT US

At Shadowline Design, we specialise in the design, manufacture, and installation of custom cabinetry and wall cladding. From kitchens and built-in cupboards (BICs) to vanities, home studies, bars, and statement feature walls – we create tailored, functional spaces that reflect your lifestyle and taste.

Our aesthetic leans towards ultra-modern, streamlined design, paired with quality craftsmanship and practical functionality. With a strong focus on ergonomics and attention to detail, we ensure every installation feels both high-end and user-friendly.

What sets us apart is our hands-on approach. We personally manage each project from start to finish, ensuring a smooth process with minimal disruption to your home. Through a collaborative design process, we combine your vision with our expertise to craft spaces that are not only beautiful but truly personal.

OUR PROCESS

From idea to installation...
This is how we bring your space to life.

1.

PLANNING & FABRICATION

Where every great project begins and takes shape.

We take the time to understand your needs, vision, and space. This phase includes concept development, layout planning and creative direction. The big-picture thinking that sets everything in motion.

From there, our in-house team works with a wide variety of finishes, from premium melamine ranges to iconic stone. With years of experience and a clear understanding of what works, we craft each piece with precision, combining materials that suit the client's taste and the design vision.

2.

ELEVATIONS & RENDERS

See it clearly. Visualise it fully.

With floor plans and brief in place, we develop detailed elevations and high-resolution 3D renders. This gives you a realistic view of the design, including finishes and how the space will feel.

3.

TECHNICAL WRAP-UP

The final prep before we bring it to life.

This is where we finalise the specs, confirm your selections, and prepare all documentation — from quotes and approvals to timelines and sourcing. We keep it smooth and stress-free.

4.

FINAL PRODUCTION

Building with care and precision

Everything comes together. From bespoke joinery to on-site fittings, our team ensures every piece is crafted and installed to match the design down to the millimetre.

5.

HANDOVER

Your vision, fully realised.

The final result is a beautifully finished space — delivered with care, ready to live in, work in, and enjoy. We're only done when it feels just right.

WE LOOK FORWARD TO HEARING FROM YOU
