TULI'S®

Our Tuli's brand was developed by a leading podiatrist who patented our trademark multi-cell, multi-layer design that scientifically replicates the cellular pattern naturally found in your feet to maximize **shock absorption**. We use the longest-lasting and best-performing materials available to confidently back Tuli's with industry-leading warranties. Nothing works better or lasts longer than **Tuli's!**

TULI'S®

So Soft[®] HEEL CUPS

Heel Pain | Achilles Tendonitis | Shin Splints

Soft fabric and Heavy Duty GEL Heel Cups meet to create our most comfortable heel cup.

Tuli's So Soft Heavy Duty Heel Cups are exclusively formulated to be lighter, softer and more resilient than other heel cups. Soft cloth material combined with softer heels means better shock absorption and increased comfort with or without socks.

Soft Fabric Lining - Reduces the occurrence of sweat and provides added comfort.

Low Profile Back - Fits more shoes styles.

Multi-Cell, Multi-Layer Design - Absorbs shock and returns energy for immediate relief.

Maximum Shock Absorption

So Soft Cloth Material

Low Profile Design

Low Profile Design

Allows for ease of wearing in almost any shoe

So SoftTM INSOLES

Sore Feet | Tired Feet | Aching Feet

Soft fabric infused atop full length TuliGelTM insole to provide all day comfort for sore, tired feet.

Tuli's So Soft Insoles are fabric-covered gel insoles that provide cushion from heel to toe. Tuli's incorporates a multi-cell design that absorbs shock and returns impact energy just like the system naturally found in your feet. This shock absorption and cushion provide relief from heel to toe for sore, tired feet. It's like having a personal shock-absorbing mat wherever you go!

Soft Fabric Lining - Covered in a soft cloth material making them comfortable for all-day wear.

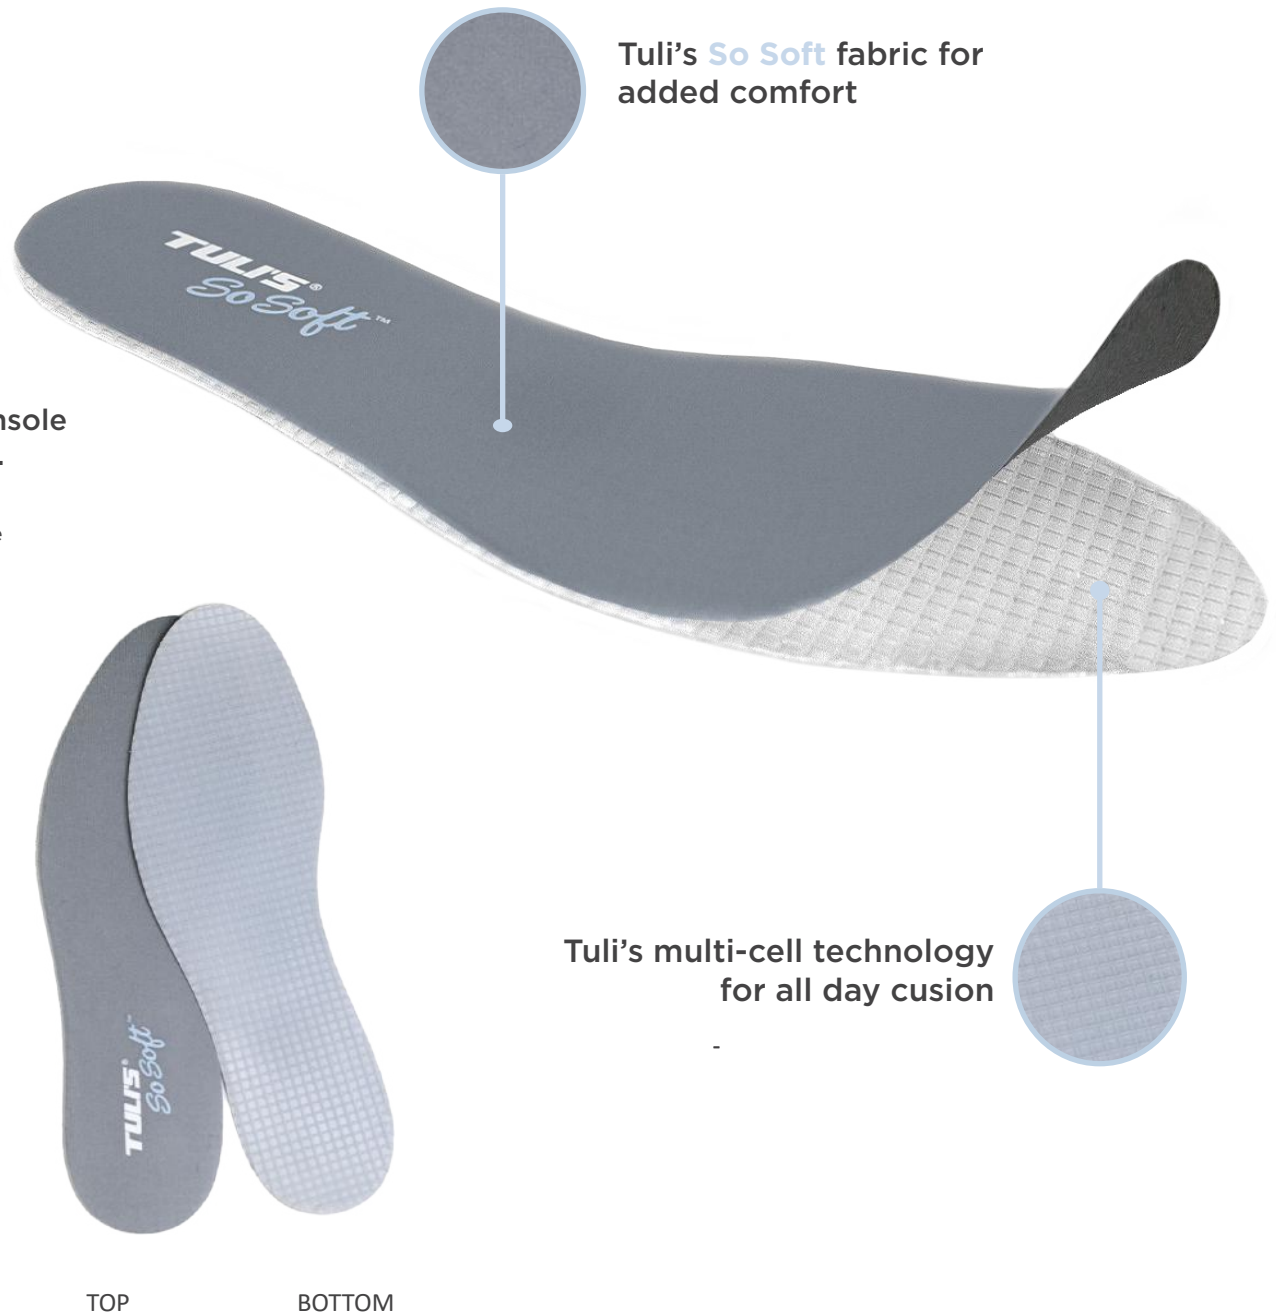

Slim Profile - Thin enough to fit in any shoe.

Tuli's Multi-Cell Design - Absorbs shock and returns energy for immediate relief.

Classic Heel Cups™

Heel Pain | Achilles Tendonitis | Shin Splints

Classic Heel Cups

Tuli's Heel Cups have a multi-cell, multi-layer design which absorbs shock and returns impact energy just like the system naturally found in your feet. Tuli's Classic Heel Cups provide immediate heel pain relief by cushioning the area of pain and elevating the heel bone. The cushion and elevation you get when you use Tuli's Classic Heel Cups takes the pressure off your Achilles tendon and allows you to regain your flexibility.

Fits Most Closed Shoe Styles

THE X BRACE

Plantar Fasciitis | Sever's Disease | Heel Pain |
Flat Feet | Overpronation

The beauty and effectiveness of Tuli's The X Brace lies in its ease of use, simplistic design and its ability to address very complex issues with incredible success such as heel pain due to plantar fasciitis, Sever's disease and over-pronation. The unique "X" design of our patented foot brace provides support and reduces arch pressure very similar to how Low-Dye taping works but without all the expertise, time and tape necessary.

- Patented "X" Design
- Targeted Arch Support
- Low Profile Design

**MADE IN
USA**
★★★

Features and Benefits:

Unique "X" Design

Provides targeted support and reduces arch pressure very similar to how Low-Dye taping works.

Low Profile Design

Socks, shoes or barefoot, no problem; literally wear The X Brace with anything.

Targeted Arch Support

Relieves stress on the Plantar Fascia.

THE X BRACE
+ **PLUS**

Plantar Fasciitis | Sever's Disease | Heel Pain |
Flat Feet | Overpronation

Providing the same support and comfort as the original The X Brace, The X Brace Plus encompasses an additional foot strap. These straps help provide proper positioning while eliminating slippage of the strap making it easier to wear in closed-heel shoes.

- Patented "X" Design
- Targeted Arch Support
- Secure Strap Design

PLANTAR FASCIITIS INSOLES™

PREMIUM ARCH SUPPORT

Plantar Fasciitis | Heel Pain | Flat Feet

A full-length replacement insole designed specifically for plantar fasciitis. The insole provides cushioning and Tuli's multi-cell, multi-layer design supports the heel for immediate comfort. A strategically angled arch cradles and supports the foot and provides proper alignment. A metatarsal pad with Tuli's multi-cell design provides added comfort while a metatarsal arch provides additional support.

Features and Benefits:

Medial and Metatarsal Arch Support - Combined support for better relief and foot alignment.

Angled Heel Cushion and Arch Cradle - A 4-degree medial heel wedge encourages stability by preventing excessive over-pronation which can cause stress or inflammation on the plantar fascia.

Ultra-Thin and Light - Stronger and lighter material for enhanced comfort.

Stabilizes Arch

HammerRx® TOE STRAIGHTENER

Hammertoe Deformity | Toe Straightening

The Tuli's HammerRx toe straightener comfortably corrects and relieves minor cases of hammertoe. Designed by a world-renowned foot and ankle surgeon, the Tuli's HammerRx corrective support pulls the toe down to keep the toe extensor tendons straight, reducing hammertoe pain and irritation caused by shoes, corns, and calluses. HammerRx consists of a soft, thin, and flexible toe strap and sleeve. The toe strap strategically loops around the toe for comfortable support. Its stretchy material creates the tension needed for a comfortable straightening of the toe.

2Toms[®]

Blisters, chafing, rubbing, sweat and odor can slow you down and take the fun out of any activity. That's why **2Toms®**, with the help of a Ph.D. in surface chemistry from M.I.T®, developed products that deliver the most technologically advanced **blister, chafing, moisture, and odor prevention** available so you can focus on doing what you love.

2Toms®

BLISTER SHIELD®

Blister Prevention | Hot Spot Prevention |
Callus Protection

2Toms BlisterShield Blister Prevention powder formula creates an almost frictionless surface, reducing heat build-up and blister formation, helping to stop blisters before they start! 2Toms BlisterShield's remarkable silky powder repels moisture, keeping skin dry and blister-free for lengthy periods of activity.

Features and Benefits:

Blister Prevention - Targets the friction that causes blisters. Ideal for shoes, boots, and gloves.

All Day Skin Protection - Prevent blisters from walking, running, yard work, sports, and more.

Sweatproof and Waterproof - Creates an almost frictionless barrier, reducing heat build-up, moisture and blister formation.

Designed by an orthotist, the Cho-Pat® Original Knee Strap™ helped revolutionize the treatment of knee disorders. For over 40 years, **Cho-Pat** has worked with medical professionals, including those at the **MAYO Clinic®**, to create products which provide a unique combination of support and freedom of movement. This combination has become the hallmark of the brand. Cho-Pat products come in multiple sizes, delivering the ***exact fit*** needed for support and healing.

Dual Action® Knee Strap

Weak Knees | Arthritic Knees | Runner's Knee
Jumper's Knee | Osgood Schlatter's Disease |
Patellar Tendonitis

The patented Cho-Pat Dual Action Knee Strap applies pressure upon the patellar tendon below the kneecap to stabilize and tighten up the kneecap mechanism, improving patellar tracking elevation while reducing the patellar subluxation. It further strengthens the kneecap mechanism by applying pressure on the tendon above the kneecap. The adjustable straps allow for full mobility while providing maximum benefits.

Features and Benefits:

Dynamic Pain Diffusion™ - Absorbs and disperses the pain-causing forces to relieve stress and reduce inflammation for maximum support and mobility.

Above the Knee Support - Reduces the force of quad muscles on the knee and lessens potential for misalignment.

Below the Knee Support - Improves tracking and reduces displacement.

Upper & Lower (Dual Action) Support

Improves Tracking and Reduces Displacement

Original Knee Strap™

Runner's Knee | Jumper's Knee |
Osgood Schlatters Disease | Patellar Tendonitis

The Original Knee Strap supports the knee as it bends and straightens, while applying appropriate pressure on the tendon below the kneecap. The strap helps guide the kneecap in the groove, improving tracking and assisting in the spreading of pressure uniformly over the surface area.

Improves Tracking

Spreads Pressure Uniformly

Achilles Tendon Strap™

Achilles Tendonitis

Developed in cooperation with sports medical professionals at The Mayo Clinic®, the medically proven Cho-Pat Achilles Tendon Strap applies adjustable pressure and consistent support to reduce stress and alleviate pain and discomfort associated with Achilles tendonitis. It decreases the tensile forces placed upon the Achilles tendon via dissemination of forces resulting from a muscular contraction. The strap also promotes an early heel rise, which helps to reduce the stress placed on the tendon.

Targeted and Adjustable Compression

Bicep / Triceps Cuff™

Bicipital Tendonitis | Tricipital Tendonitis

The Cho-Pat Bicep/Tricep Cuff with Dynamic Pain Diffusion™ prevents the pulling and tearing of tendons and muscles in the bicep area. Delivers targeted pain relief by applying pressure to the upper and lower portions of the bicep and tricep muscles. Absorbs and disperses pain and reduces the likelihood of developing bicipital or tricipital tendonitis.

PROSTRETCH[®]

ProStretch® product's unique products including **CoreStretch, Prostretch Original and StretchRite** are proven to stretch and massage muscles easier and more effectively than conventional methods. The **improved flexibility and range of motion** obtained from using these devices help relieve, rehab, and alleviate overuse injuries and sore tired muscles, as well as enhancing your overall performance. Physical Therapists, Athletic Trainers, and Athletes have recognized that ProStretch products help reduce the risk of injury when used before and after exercise.

PROSTRETCH®

NightSock™

Plantar Fasciitis | Achilles Tendonitis | Tight Calves | Runner's Cramps

The ProStretch NightSock helps alleviate heel pain associated with plantar fasciitis, Achilles tendonitis, tight calves, and runners' cramps. By keeping the foot in a slightly flexed position, it comfortably elongates the muscles and soft tissues of the calf and foot, speeding up recovery while sleeping.

Features and Benefits:

Adjustable Straps - Allows for progressive adjustment over time to prevent discomfort and injury.

Holds Foot - Keeping muscles and tendons relaxed and slightly stretched to prevent tightening and pain especially in the morning.

Exclusive Toe Support - Provides enhanced toe comfort and performance.

Hook & Loop - Low profile hook and loop fasteners won't snag sheets and blankets.

Sock Material - 3/4 length sock made of soft, lightweight, breathable material keeps foot and leg cool during the night.

CoreStretch®

Back | Hamstrings | Piriformis | Shoulders | Hips

Stretch safely and effectively by using the body's natural traction while keeping the back straight. It elongates the back stretching muscles, tendons, and ligaments in your back, hips, hamstrings, arms and shoulders. Originally developed for use by physical therapists, the CoreStretch was designed with the understanding that all action initiates from the body's trunk (or core). The CoreStretch provides a stretch that both allows the tissues to relax and elongate muscle groups on the back side of the body.

StretchRite®

Shins | Back | Calves | Hamstrings | Shoulders

StretchRite stretching strap makes stretching more effective, comfortable and fun! The StretchRite strap gives you a safer, more effective way to improve flexibility and get total body relief for sore tight muscles.

The key to StretchRite's effectiveness is in the ergonomically designed hangrips which allow for a comfortable and effective hold and limit tension forced on hands. Increase flexibility in stages. Includes a full body stretching guide. One-year warranty. Instructional video available online.

PROSTRETCH[®] *SHOULDER FLEX*[™]

ShoulderFlex™

The Shoulder Flex was developed to help people regain and retain flexibility in their shoulder and rotator cuff muscles. The unique design of the Shoulder Flex allows for the user to apply leverage to the arm in a variety of positions to create tension on specific muscles. This tension translates into improved flexibility for regaining range of motion due to surgery or injury and also improving performance.

Shoulder Flex allows users to stretch shoulder and rotator cuff muscles without the assistance of another person while being portable, safe, and effective.

MASSAGE STICKS

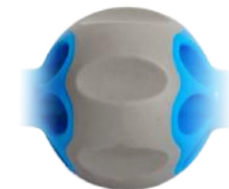

Three Different Gear Types Allow You to Enjoy Soft, Medium or Targeted Myofascial Treatment.

Skin Surface Technology (SST)

Patented design enables massage gears to accurately connect with the skin and fascia.

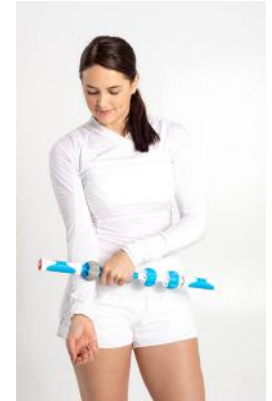

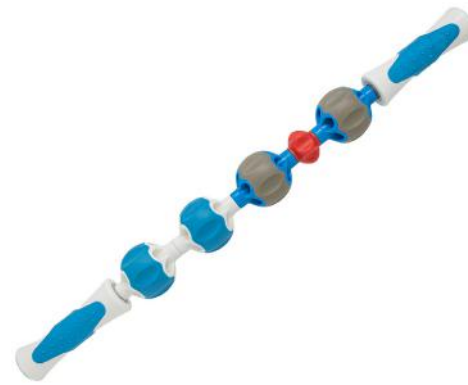

Soft SST for a more tactile feel

Medium SST for deeper penetration

Pinpoint targeting

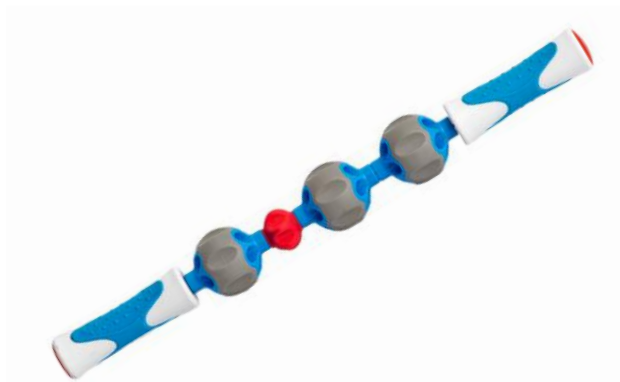

Pro Massage Roller™

The Prostretch Pro Massage Roller goes farther than other massage tools with its patented design. This tool uses 3 different gear types that allow you to customize your massage and provides pinpoint targeting to get the pain relief you need. This massage roller's uniquely designed 3-dimensional gears penetrate muscles more effectively than traditional flat massage rollers. The Pro Massage Roller is designed for massaging deep into your muscles rather than rolling just the surface.

The blue and white gears are the softest Skin Surface Technology (SST) and give a softer and more tactile feel to the massage. The grey and blue gears are medium SST for deeper penetration. The red gear allows you to target areas like the fascia, Achilles, shin, shoulders, and forearm while adding intensity to the massage.

-  Soft and Medium Density Skin Surface Technology
-  5 Gears - 3 Different SST Gears
-  Pinpoint Precision Gear

SKU	PRODUCT	LENGTH
S02100	PROSTRETCH PRO MASSAGE ROLLER	21.50 INCHES (55 CM)

Type C Massage Roller™

The Prostretch Type C Massage Roller stretches deep into the muscle fibers, tendons, and ligaments in your body for increased flexibility and optimal athletic performance. Each gear is made with our medium Skin Surface Technology (SST) to accurately allow the massage gears to connect with the skin and fascia. The red gear allows you to tackle, pinpoint, and massage deep tissue and adds intensity to your massage.

Use the Type C Massage Roller to fuel your muscles with circulation that carries the proper nutrients to your muscles for rapid growth, repair, and accelerated blood flow, helping you get back to training harder than ever before. It's easy to carry and is ideal for traveling, taking to the gym, or using before and after a workout.

Type X2 Massage Roller™

The Prostretch Type X2 Massage Roller has three different gear types that allow you to choose whether your massage feels soft or firm to give you the relief you've been looking for. This massage roller provides relief for tense, tired, and sore muscles for increased flexibility.

The uniquely designed 3-dimensional gears penetrate your muscles more effectively than a traditional flat roller. The blue gear is made with our Soft Skin Surface Technology (SST), allowing the gear to grab at the fascia and adds a softer touch to your massage experience. The gears without our SST glide to give a more firm and intense feeling to your massage.

Type A+ Massage Roller™

The Prostretch A+ Massage Roller is the perfect trigger point massage tool to help relieve signs of IT band syndrome, plantar fasciitis, hamstring strains, shin splints, lower back tightness, and glute pain. Works to treat your tired and sore muscles. This massage roller has 5 gears that work great for both upper and lower extremities. It is designed for massaging deep into your muscles rather than rolling just the surface, so you can get more from your rolling experience.

The gears have our softest Skin Surface Technology (SST) that give a softer and more tactile feel to your massage, and accurately connect with the skin and fascia, helping with muscle rehydration and the elimination of knots.

HANDHELD MASSAGE ROLLERS

Marble Massage Roller™

The Prostretch Marble Massage Roller is a handheld massage tool designed to help smooth muscle knots, tension, and soreness. Use the Marble Roller on your back, neck, arms, legs, and feet for the ultimate massage experience. This three-trigger point body massage tool effectively delivers a deep tissue massage with easy effort, effectively penetrating your muscles. The Marble Massage Roller is designed for massaging deep into your muscles rather than rolling just the surface.

The Marble Massage Roller features three magnetic spheres that stimulate blood flow throughout your muscles, which is ideal to help open up your muscles, relieving soreness and preventing serious injury.

Junior+ Massage Roller™

The Prostretch Junior+ Massage Roller works great to get in deep to relieve muscle and fascia tightness and soreness. It's the perfect manual massage tool to provide relief to tense and tired muscles with precision. This muscle knot eliminator works great for plantar fasciitis and other foot pain relief and can be used to roll out other hard-to-reach muscles.

This handheld roller features our soft-density Skin Surface Technology (SST) designed to massage like a finger, creating the perfect deep tissue massage with cross-fiber friction, providing an overall beneficial massage. It is easy to carry and designed to be held in one hand or placed on the floor for plantar relief, making it the perfect portable foot roller.

Uno Massage Roller™

The Prostretch Uno Massage Roller is a versatile 3-in-1 tool that alleviates knots, tension, and tightness. The Uno Roller can be easily held in one hand or in both depending on the amount of pressure you desire during your deep tissue massage.

The Uno Massage Roller can be adjusted to three different positions depending on your needs. It features a gear with medium Surface Skin Technology (SST) that accurately connects with both the skin and fascia, providing you with a deep, yet effective feel to your massage. Take your Uno Massage Roller with you anywhere for a convenient massaging experience. The Uno massage roller won't let muscle soreness limit your success.

FOAM ROLLERS

Hexi Foam Roller™

Small and compact, the Prostretch Hexi is only 7" long and is the perfect foam roller for those on-the-go. It features a textured 6-sided design with a solid foam core and allows for a precise and deep connection to the fascia. Its compact design is perfect for rolling out the IT bands, hamstrings, forearms, biceps, quadriceps, and calves.

The Hexi features extruding circular nodules designed to mimic the massaging movement of hands and elbows for a natural feel. It's easy to carry and use on most muscles, making it ideal for travel.

Nonagon Foam Roller™

The Prostretch Nonagon is the ideal foam roller to help alleviate muscle soreness caused by lactic acid buildup and improving flexibility for active pain relief. The textured 9-sided foam roller design with a solid EVA foam core connects with the fascia with precision and allows for a deep, stable, and secure roll without lifting your entire body weight.

The Nonagon features extruding oval nodules designed to mimic fingers and elbows for a natural feel and create a greater range of pressure. It effectively connects to the fascia on your quads, hamstrings, and back. The Nonagon is made with a durable and soft foam material that is easily cleaned. This foam roller is an effective tool to add to your warm-up or cooldown routine.

Peanut Foam Roller™

The peanut-shaped design of our Prostretch Peanut Foam Roller allows you to get into targeted areas that are difficult to reach, providing a deep tissue massage for those knots that just won't go away. Use the Peanut on areas like your glutes, upper back, between shoulder blades, shins and even on the bottom of your foot to relieve plantar fasciitis pain.

The Peanut Foam Roller is made with a dense material that can withstand your weight and won't break down and adds a more aggressive myofascial release.

The Peanut is portable and was designed as a replacement for the often used "tennis balls in a sack."

MASSAGE BALLS

Footy Massage Ball™

Designed with your feet in mind, the Prostretch Footy Massage Ball features tiny knobs that connect deeply with the plantar fascia to provide relief for both muscle tightness and soreness.

The Footy is designed for massaging deep into your muscles and fascia for faster relief and healing. Although designed for feet, this massage ball can be used all over your body. Take the Footy Massage Ball with you anywhere. Get one for your home, one for the office, and one for your gym bag, so you always have the relief you need.

Trio Massage Balls™

Use the PProstretch Trio Massage Balls together or individually to release and relax all your soft tissue and various tissue sensitivities. You can target muscle groups all over your body to activate different acupressure points and relieve your muscles of tightness, knots, and soreness.

You can use these massage balls to target areas such as your glutes, upper back, shoulders, as well as your feet for plantar fasciitis. These balls can be used on the floor, in a seated position, or even against a wall. The Trio Massage Balls come in three different densities, allowing for massage personalization. They are small and portable. Keep them at home or throw them in your gym bag to take care of tired muscles whenever needed.

MASSAGE CANES

Knot Bad Massage Cane™

The Prostretch Knot Bad Massage Cane uses two hook options to tackle even the most remote muscles in your neck, back, legs, and hips. This 5-knobbed massage cane makes self-massaging easy. Its dense-flexible plastic is easy to move with your body and releases myofascial trigger points for a deep tissue massage. Three handgrips make holding the cane and delivering the desired pressure a breeze.

The Knot Bad Massage Cane's massage knobs include rounded therapy nodes for targeting knotted muscles and pressure points.

Ergonomically Designed Hook

5 Massage Knob Placements

Ultra-Light and Durable

Mini Knot Bad Massage Cane™

The Prostretch Mini Knot Bad Massage Cane works similar to the Knot Bad Massage Cane; however, it's just small enough to easily take with you anywhere. Its four massage knobs make self-massaging easy. They are rounded and great for targeting knotted muscles and pressure points. Two handgrips provide for a solid grasp and customized pressure.

Ergonomically Designed Hook
