

VERMEILLE

Preserving Fresh Nature

Established in 2005, PRESH Tech is one of the leading producers of Preserved Flowers in the world. Our products are preferred by most designers in Japan, South Korea, Germany, France, Italy, the Middle East and the United States, where expertise, demand on high quality standards and consistency of Preserved Flowers are the highest.

In 2014 we started a Joint Venture with one of the leading companies in production of Fresh Flowers worldwide, with a product portfolio of 30 types of flowers and more than 300 varieties.

STORY

We grow and harvest our flowers from our own farms certified by **Florverde® Sustainable Flowers**.

In Presh Tech, Environmental Responsibility is a main driver. We have developed an Environmental Policy that complies with international regulations and we are always looking to go beyond. We make sure to use natural resources carefully and to ensure these resources will be available for future generations.

Each member on our team has a long-term life project. We give teamwork significant value, that's why everyone has a unique and important role of great impact in our process. From the almost 100 members of our team, the majority are head household women from underprivileged families.

SOCIAL AND ENVIRONMENTAL RESPONSIBILITY

We are **RAINFOREST ALLIANCE CERTIFIED**

A blue rose is displayed inside a clear glass dome, which sits on a matching blue circular base. The entire scene is bathed in a soft, monochromatic blue light. The rose's petals are layered and detailed, and the glass dome has a slight reflection on its surface.
