# VOXIE TACTICS DRAGONFEST

The **Voxiverse** is in peril, for a great threat has arisen!

**Roazzul**, a fearsome Dragon of legend, has awoken from its slumber and now plans to lay waste to all that we hold dear.

But all is not lost, for a **community of brave heroes** will need to band together to face this challenge head-on.

The scenario is simple: **Enter** the Dragonfest Arena, do as much **damage** to the Bone Dragon Boss as possible, and then **escape** with your life!

Bone Lair

But this is no ordinary challenge. You will play alone, but the Bone Dragon Boss cannot be defeated by you alone. How is this all possible? You will need to **fight together as a community**, each player contributing their own share of damage to bring down the boss.

Lava Pit

The more players that play, the more Roazzul's HP bar is decreased, leading to a **final reward** that will make it all worthwhile!

Summoner's Rise

The Bone Dragon is an **extremely challenging boss!** The Bone Dragon will stop at nothing to prevail over its enemies and will leverage a variety of poison, dark, and fire based abilities to succeed. Its fiery attacks can quickly overwhelm players, while its Necrotic Aura can send them on the path to destruction. Thinking of hiding? Think again as the dragon can reach every corner of its lair and will stop at nothing to overpower you. But that's not all, the Bone Dragon is immune to all status effects, making it one of the toughest opponents you will ever face!

New **potions** were introduced to help with the battle against Roazzul:

**Drako Blood Potion**

1.25x Damage Potion + Regen

**Drako Courage Potion**

1.5x Damage Potion + Protect

**Drako Champion Potion**

2.0x Damage Potion + Haste

You don't only chip away at Roazzul's health by damaging it. For **every 500 HP damage** that you deal to it and successfully **escaping** the Dragonfest Arena with at least 1 Voxel alive, you **earn**

**1 BONE FRAGMENT**

**Bone Fragment** is the virtual currency of the Dragonfest Event and is used to make the exclusive **Bone Chests** through the Marketplace Services, which in turn can be opened in the Arcanist's Forge to earn **rewards**:

## Major Announcements and Changes During Dragonfest

**April 6** - The high volume of activity and players, with over 200,000 boss battles, had a small impact on the Bone Fragment economy and Bone Chest mechanics. The team had to revisit the costs associated with Bone Fragments and Bone Chest conversions to tweak the economical impacts:

Bone Chest	Conversion Cost (VOXEL)		Opening Cost (VOXEL)	
	Before	After	Before	After
Lil Flame Chest	1	10	10	1
Smoldering Magma Chest	1	20	80	80
Roaring Inferno Chest	1	30	300	300

**April 13** - Rewards chances changed for Bone Chests (see page 11 for details)

**April 14** - The VOXEL cost of opening a chest has been shifted to the minting process (converting Bone Fragments to Bone Chests on Services) and Bone Chest minting was paused in order to protect the ecosystem from cheaters and exploiters.

Bone Chest	Conversion Cost (VOXEL)		Opening Cost (VOXEL)	
	Before	After	Before	After
Lil Flame Chest	10	30	1	1
Smoldering Magma Chest	20	80	80	1
Roaring Inferno Chest	30	300	300	1

**April 18** - The team released an official letter to give an update on Dragonfest and its economy. The letter referenced the actions taken on April 14 to prevent exploitation, and that they used a 3rd party tool to review all data and identify users who were exploiting the event.

They also listed their next steps:

- Dragonfest chests will be minted twice a week
- During the mint processing time, the team will be reviewing all accounts and their corresponding data to ensure only those participating fairly will receive their minted items
- VOXEL costs for chest minting will remain as changed on Friday April 14

They also reported that less than 3% of all minted chests have been exploited, which was significantly lower than planned, and that detection methods have been successful in catching a vast majority of bad actors.

**April 24** - The team announced that they have completed a full review and have banned all accounts that were found to be cheating and removed their chests that were in queue to mint. They also resumed Bone Chests minting since it was stopped on April 14. They will also update the Dragonfest leaderboards to remove all banned users.

**April 27** - The team announced that Dragonfest will be extended from May 1 to May 8 since chest minting was paused for 10 days and to ensure that everyone had ample time to participate and earn bones and chests in a fair environment. But after community feedback, they decided to close the leaderboards as originally planned on May 1, 1PM EST. The Dragonfest arena will still remain open through May 8 for those that wished to continue to battle the Dragon and earn bones and mint chests, but these battles will not count toward the leaderboards.

## New Armor Set—Dragon Bone

The Epic Dragon Bone armor items, alongside the Bone Dragon Companion Pet, are the new NFTs introduced in the Dragonfest event. The armor pieces can be obtained by opening any of the three Dragonfest chests, with a certain drop rate for each chest.

The armor design is similar to the Dragon and Black Dragon armor sets while having a bony design which is noticeable in the chest armor.

The Dragon Bone heavy armor set has decent stats when compared to the other heavy armor sets like Dragon and Robot. The Dragon Bone Claws is unique as the only heavy gloves currently available that can increase the Magic stat. The set gives 50% poison element resistance, +50 HP, +20 MP, and dominant Strength stat that Strength-focused heavy classes can take advantage of. It's worth noting that full armor sets like the Dragon Bone set will get bonuses in a future game update.
