HORI HORI HISTORY

With its origins rooted in Japanese sword-making, the name "hori" is derived from the sound of digging, which translates to 'to dig'. Made by using similar techniques to that of the Samurai, these tools were forged to get the job done and have stood the test of time due to their durability and versatility.

With its serrated edge, concave design, and depth scale, it can handle digging, cutting, weeding, and more. Crafted from high-quality stainless steel, it resists rusting and blunting. A must-have for every gardener, the hori hori trowel is a staple in tool sheds everywhere.

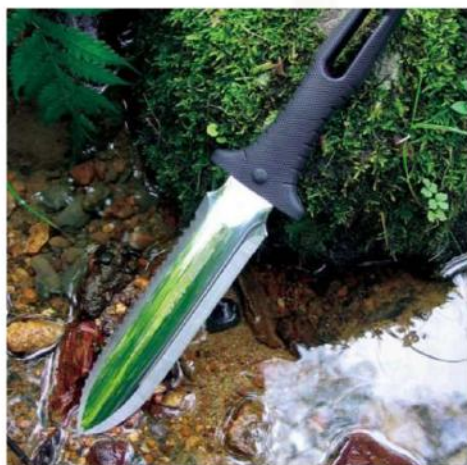

features

- * Hardwood handle in a Natural Finish
- * SK5 Carbon Steel blade
- * Smooth edged blade
- * Soil depth scale in millimeters and inches along length of blade
- * Mirror Quality highly polished blade finish

Featured HORI HORI TROWELS

The versatile hori hori trowel is the ultimate Swiss Army knife of garden tools. From planting bulbs to harvesting root crops and uprooting weeds, this tool does it all. Primrose offers a range of hori hori trowels with different lengths, steel grades, and handles, making it the perfect gift for any gardener.

Angela D

This is brilliant. I use it for a wide array of jobs around the garden. Suggested to me by an ecologist neighbour and it's been the best buy of the year.

Ann C.

This was a Christmas present for hubby so haven't used it yet but he's very happy with it. Exactly what he needs down the Allotment.

Gwydwr L

This is a brilliant tool and I wish I had had one long ago!

£ 17.99 ~~£23.99~~

HOW TO CARE FOR YOUR CHRISTMAS TREE

Step by step guide

Step 1

To keep your tree fresher for longer, try cutting about half an inch off the bottom of the trunk of your tree.

Step 2

Your tree is thirsty! Within eight hours to the prior step, your tree may need up to 3 litres of water, and regular watering every day after this.

Step 3

Do not remove any bark from the tree to squeeze it into a container. Most of the water absorption comes from just under the bark.

Step 4

Help your tree look extra lovely, some suggest putting an aspirin in the water, or perhaps fizzy drinks such as lemonade to help water absorb. **BE CAREFUL!** Skip this step if you have animals

Step 5

Place your tree in a cool place and allow your tree to rest for a while **before you decorate it**, the longer you can leave it the better, preferably twenty four hours.

Step 6

Lastly, you might find using a **Christmas tree spray**. You could also try spraying hairspray on the underside of the branches. **HOWEVER** hairspray is a flammable, so use with care.

CHRISTMAS TREES

Species of Christmas Tree

Like all plants, there are a few species of Christmas tree. Each one brings something different - they all have different levels of maintenance, but all will benefit from sitting in a bit of water or even a soil-filled pot. Each of these pictures is for illustration purposes only though - each tree is unique after all!

Nordmann Fir

The most popular Christmas tree, with a pyramid shape made of defined layers of straight twig-like branches. The dark green needles have a thick, waxy coating which makes them softer to the touch, which works well for households with children or pets. These trees don't shed needles as often as other varieties, making them a lower-maintenance option.

Fraser Fir

Named after the botanist John Fraser, this pyramid-shaped tree has strong upward-turning branches which are great for holding decorations. It has a pleasant scent and good needle retention, making it a great choice for a tree. The dark green, flattened needles have a silvery underside too for a bit of to-tone colour.

Blue Spruce

Native to the US, the Blue Spruce has a wide base and flatter branches, so better suited to lighter decorations but with plenty of space to hang them. Its blue-green (but spiky like the Norway Spruce) needles bring a differently coloured Christmas to your home, so if you like to stand out from the crowd a blue spruce is sure to make a statement.

Potted trees

Low on space or want to create your own tiny pine forest? Then we've got the perfect solution for you - either a little 4ft tree that'll fill a little corner nicely, or a little guy in a pot you can plant out when the season's over. We've got four-footers in every species, while the potted trees are blue spruce specials!

21st November to December 18th
