# WHY IS A SPA COVER IMPORTANT?

---

A spa cover is essential for several reasons; heat retention, energy efficiency, cleanliness, and safety are just a few examples.

## **HEAT RETENTION**

Spa covers help retain heat within a hot tub, keeping the internal temperature of your water stable. This reduces heat loss, which in turn reduces energy costs to keep your hot tub temperature at an ideal range. By keeping the water temperature stable, the cover ensures that you do not have to continuously try to heat the water. This keeps your hot tub ready to use, without the need to wait for your hot tub to heat up.

## **SAFETY BARRIER**

A Spa cover acts as a safety barrier, especially if you have children or pets around. It prevents accidental falls into the water when the hot tub is not in use. Some upgraded covers are even load-bearing. It also prevents bugs and debris, such as leaves and twigs, from getting in your water. This helps maintain cleanliness of your water, which reduces the need for frequent cleanings.

## **WATER LEVELS AND QUALITY**

By preventing most evaporation, spa covers help preserve the quality of your water. This reduces the need to top off water levels, and minimizes the need to add more chemicals to newly added water. Additionally, by shielding the water from the sun, spa covers help inhibit algae growth. This keeps water quality high, ensuring a more pleasant experience and less cleaning required to enjoy your hot tub.

Protecting your cover will ensure it will last its full lifetime of 2-5 years, if properly maintained.

# PROTECT YOUR COVER WITH A CAP

---

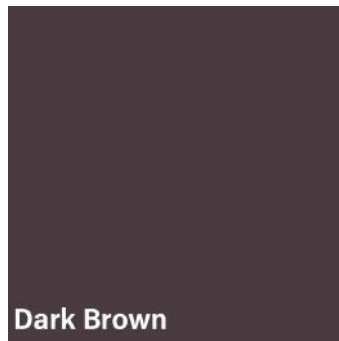

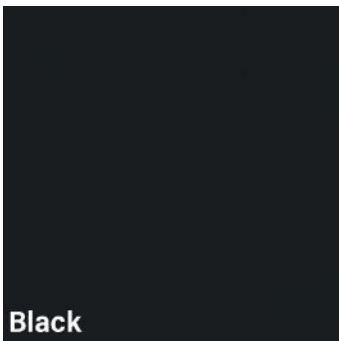

## Sun-Resistant Cover Cap

Your spa cover is meant to protect your spa when it is not in use. It keeps bugs and debris out of the water, provides a safety barrier, and retains heat levels within your spa. To lengthen the lifespan of your spa cover, we suggest investing in a spa cover cap. These fit loosely around the top of your spa cover and provide extra protection from the sun and weather.

The custom made, sun-resistant Spa Cover Cap is the perfect choice to protect your new hot tub cover from initial fading and damage, or the easiest way to add life and color back into an old or faded spa cover. Simply slip it right over the top of your spa cover and use the attached elastic cords to secure it in place.

The Spa Cover Cap instantly adds protection to your hot tub and cover from wind and weather using built-in UV and Mold Inhibitors that also make the Spa Cover Cap itself extremely durable and resistant to fading and mildew. The Cover Cap is also water-resistant.

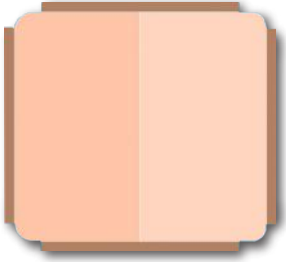

The Spa Cover Cap is available in 4 colors and custom made for any size spa.

# COVER REPLACEMENT SIGNS

---

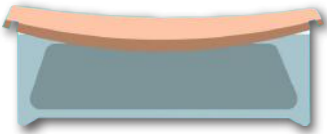

## VINYL

Check your vinyl for signs of: Dryness, Brittleness, Dirt, Tears, or Cracks. These symptoms will affect the look, safety, and heat retention of your cover.

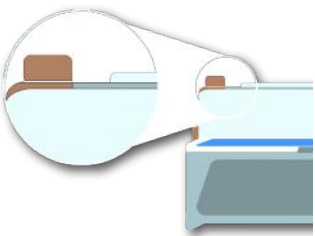

## HINGE

A torn hinge can cause heat to escape. Heat loss is increased if the tear goes beyond the hinge gaskets.

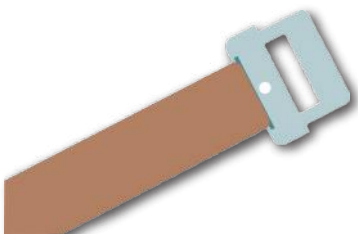

## SAGGING

Foam cores are the most important component of your hot tub cover. Damaged cores decrease heat retention, aged appearance, and safety of your cover. Sagging indicates broken cores.

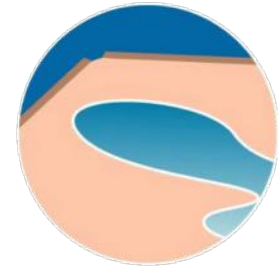

## HINGE GASKETS

Hinge gaskets, also referred to as "shoes", are small cushions on each end and center of the hinge. Torn, damaged, or missing hinge gaskets will cause heat to rapidly escape your spa.

## STRAPS & LOCKS

Torn, broken, missing, or rusted straps and locks will affect the safety of your tub.

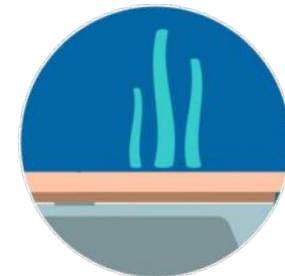

## PUDDLES

Puddles forming on your cover indicate broken or bowed foam cores.

## HEAVY

If your cover has become heavier over time, your foam cores have likely absorbed water.

## ODOR

A foul odor coming from your hot tub cover indicates your foam cores have absorbed water.

# COVER TYPES

---

When you purchase a hot tub, it comes with a factory spa cover. Cover upgrades and replacements are available at all of our locations.

## Replacement Cover

We offer genuine replacement hot tub covers for Hot Spring Spas, Caldera Spas, Sundance Spas, and Jacuzzi Hot Tubs. Whatever the dimensions are of your hot tub, we've got you covered! We offer special order covers, as well! Reach out to us to get started.

## Smartop Cover

An aftermarket cover, Smartops are efficiently designed to combat water-logging, mold, mildew, and heat loss. Mold-resistant foam, as well as a protective polymer overlay, helps keep Smartop covers weather-proof and durable. It is a load bearing cover of up to 1,000 lbs., allowing an extra degree of safety for your hot tub.

## Covana Cover

Covana covers are sleek, automated gazebos. These are the most secure, convenient, and energy efficient covers available. Operated by a key, along with having a safety hatch, the Covana covers rise and lower based upon need. Covanas are great for heavy snow or weather, and privacy screens can be added-on to help with wind and provide more privacy.

# HOW TO ORDER A NEW COVER

---

## Replacement Cover

If you're in need of a new replacement cover, and are local to The Spa and Sauna Co.'s coverage areas, we invite you to visit our website and fill out the form, or call us directly, and one of our Cover Specialists will match you with your ideal cover based on your needs.
