ROBUST MOUNTS

ARKON'S ROBUST DOUBLE-BALL MOUNTS

Arkon's Robust Mount Series is built tough for commercial and enterprise applications. Made of the highest quality composite or metal materials, Robust Mounts last and can endure everyday use as well as extreme weather. Our Robust Mount Series features a modular design, with a full assortment of compatible components. 25mm (1 inch), 38mm (1.5 inch), and 57mm (2.25 inch) components are interchangeable with those from third-party manufacturers, including RAM® Mounts.

All products in Arkon's Robust Mount Series feature four distinctive components, each working with other parts to provide rugged protection, whether on the road or on the job.

HOLDER – Our range of universal device holders help protect and keep your device safe. Holders can be found on pages 33-34 and 101-109.

ADAPTER – The ball adapter fits into the Robust Shaft to provide double-ball positioning (along with the base), and a solid connection between the Robust Shaft and holder. Choose the rubber or metal adapter that is compatible with your device's holder. Our assortment of adapters can be found on pages 22-25 and 110-128.

SHAFT – Arkon's distinctive Robust Shaft facilitates durable heavy-duty double ball adjustment, and is available in both metal and composite in sizes ranging from 2.75 to 8.5 inches. Find out more about our Robust Mount Shaft Arms on page 20.

BASE – The mount's base provides stability and versatility, and is available in 4-Hole AMPS or other drill base, suction, seat rail, headrest, clamp/handlebar, cup holder, or other base options. Our selection of composite and metal mount bases can be found on pages 22-25 and 110-128.

Security options are available for your Robust Mount. See page 18 for our security hardware.

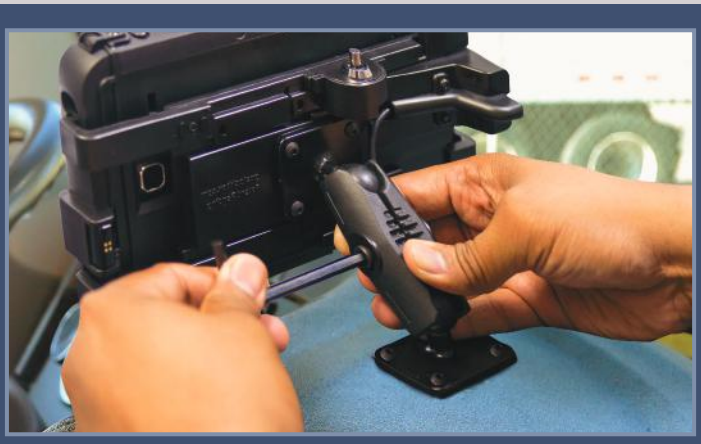
Lock It Up

Arkon's Robust Mounts Shaft Arms can be upgraded with locking hardware to secure your devices. Simply replace the shaft knob with the new screw using included hardware. This simple but effective substitution deters theft and provides a clean solution for your mount.



STEP 1:

Unscrew the Robust knob and remove the existing bolt.

STEP 2:

Replace with socket head screw/bolt.

STEP 3:

Tighten with Allen key/hex bit.

Electronic Logging Devices (ELDs) are making a significant impact on HOS (Hours of Service) compliance in the United States, according to the US Federal Motor Carrier Safety Administration (FMCSA). Transport Canada has also instituted a similar ELD mandate.

Both US and Canadian mandates allow drivers to use a portable tablet or phone as their ELD, as long as it is mounted in a fixed position during commercial motor vehicle operation and visible to the driver from a normal seated driving position.

Arkon Mounts offers a wide range of quality, heavy-duty tablet and phone mounting solutions that can help you comply with these ELD mandates. Our locking tablet mounts (pages 31-32) and powered tablet mounts (pages 28-30) are essential for commercial truck fleet carriers or operators using a portable ELD.

SECURE MOUNTING FOR TOUGH ENVIRONMENTS

Arkon's Forklift Mounts are designed for mounting and securing tablets, phones, barcode scanners, radios, or other devices to a forklift, pallet jack, or other warehouse vehicle. Consisting of two steel plates with black powdercoat finish and accompanying stainless steel mounting hardware, these forklift mounts are made with heavy-gauge steel construction to last in tough environments, including construction sites, factories, and warehouses.

Mounts are available in two sizes:

Forklift Mounts (pages 38-41): Each of the mount's steel plates weighs just over 3 pounds and measures 10" x 7" x 1/8" (254 x 178 x 3.2mm). Multiple size holes (4.9mm, 5.7mm, and 8.5mm) as well as hole patterns are pre-drilled into the plate, including 4-Hole AMPS, VESA 75, and VESA 100 for mounting multiple types of devices.

Forklift Pillar Mounts (pages 42-45): Each of the mount's steel plates weighs just under a half a pound and measures 4" x 2.75" x 1/8" (102 x 70 x 3.2mm).

Installation is easy with no drilling required.

Featuring a variety of tablet and phone holders, our forklift mounts also are available with Robust shafts of various lengths and materials to meet your unique requirements.

4-PRONG MOUNTS

The 4-Prong mounting pattern is compatible with Herbert Richter IGRIP™ models and selected iBOLT products. The mounts on this page represent only a fraction of the mounts that can be created with Arkon's unique modular mix-and-match product line. Use Arkon's 4-Prong pattern adapters found on pages 111 and 116 (and footnoted below) to convert Arkon or other third-party 17mm, 22mm, and 25mm (1 inch) compatible mounts to a 4-Prong pattern.

We ARE The Tablet Mounting Specialists®

Tablets have become the de facto device for business. Besides being affordable and portable, tablets can improve workforce mobility and can take the place of larger, bulkier, more expensive devices, such as payment terminals and monitors.

Arkon's exciting new line of forklift mounts can help warehouses, fulfillment centers, factories, and other industries utilize tablets for use with inventory and other material handling systems. See our forklift mounts on pages 37-45.

Commercial truckers can comply with the Electronic Logging Device (ELD) Mandate by using a tablet mounted to the dash, console, or seat rail of their rigs, providing security and charging capabilities. Our powered tablet mounts can be found on pages 28-30.

There are as many communities creating live video for apps such as YouTube, Instagram, and Facebook Live as there are interests. Arkon Mounts was one of the first manufacturers of mounts made specifically for live streaming. See our popular Pro Stand and Remarkable Creators Phone and Tablet Stand models on pages 91-99.
