## Airborne Harness/Container System

The **Light Load Tactical** is a complete assembly of military equipment manufactured to the highest standards using the best **Military Specification** materials available in today’s market. The **LLT** is manufactured in the United States in a facility that is Federal Aviation Administration (**FAA**) certified for manufacturing parachute equipment.

The **Light Load Tactical** is designed for HALO-HAHO operations and training with a single operator carrying full combat equipment and bundles without the use of a drogue pilot chute.

The **Light Load Tactical** consists of a **Main Container** with a choice of multiple main parachutes and a **Reserve Container** with a choice of multiple reserve parachutes.

The **Light Load Tactical** may be set up for **Static Line** or **Freefall**.

It is a designed to accommodate any size jumper with any aircraft commonly used in military operations. There are seven (7) points of adjustment to the harness and three (3) easy dress-up points for quick gear-up and gear-off.
