

DIAMOND BLADES

PRO

For professionals who make their living using diamond tools for specialist applications on a daily basis. Maximum speed and life.

Highest diamond quality, highest diamond concentration.

SEMI PRO

For general contractors who use blades frequently, such as councils, utility companies, rental yards, etc. High speed and long life.

High diamond quality, high diamond concentration.

PREMIUM

For tradesman looking for a higher quality blade for common applications. Higher speed and longer life.

High diamond quality, medium-high diamond concentration.

TRADESMAN

For construction companies who want top notch performance and rental yards where value is important.

High diamond quality, medium diamond concentration

DIAMOND CONCENTRATION

The diamond concentration refers to the proportion and distribution of abrasive diamond particles within the bond. In general, the higher the diamond concentration, the higher the machine's horsepower needs to be.

High concentration of diamond powder

Low concentration of diamond powder

FLOOR SAW BLADES

PRO RANGE

K SERIES

- highest concentration of super abrasive diamonds in our highest quality bond -

K SERIES PRO : HARD CONCRETE : HIGH HP

RBDT14	14" (355mm)	1" + DP	40x3.3x10mm	\$410.40 +
RBDT16	16" (405mm)	1" + DP	40x3.3x10mm	\$514.10 +

OUR HERITAGE

Company owners Paul Freer and Dennis Clift formed Syntec Diamond Tools in 1994. The business soon became Australia's largest diamond tool manufacturer and a leader in developing, manufacturing, and supplying the latest designs and innovative products in the diamond tool industry. Syntec Diamond Tools has a 26,000 square metre manufacturing site and offices in South Australia, a full-service facility and office in the USA.

AUSTRALIAN MADE

By investing in a fleet of the most sophisticated machines available to manufacture diamond tooling, Syntec has simplified the process, always ensuring consistent quality and allowing for competitive pricing. From the superior raw materials used in production and strict quality control standards to the finishing and packaging of the products – no detail is overlooked in the process. We are committed to quality workmanship and creating industry-leading products that differentiate us from other diamond tool manufacturers.

OUR FOCUS

With each product, our goal is to add value and performance for our customers. Therefore, all our diamond tools are manufactured with job applications in mind. Our product designers and the technical team find out specifically what is required and can custom make products for most applications.

OUR IDEAS AND INNOVATION

Syntec Diamond Tools has been at the forefront of innovation in the diamond tool industry and continues to strive to meet challenges through ongoing investment in research, development, machinery, and product testing.
