# CARTON STOCK SOLUTIONS FROM WAUSAU COATED PRODUCTS

Your pressure sensitive sheet resource.

Wausau Coated Products delivers high-quality, cost-effective pressure sensitive sheets for nearly any application—from high-volume ready-made materials to custom specialty orders.

## WE OFFER MULTIPLE PRODUCT LINES AND OPTIONS:

**Traditional:** Coated and uncoated sheets for everyday offset printing.

**Signature:** Premium face stocks for signage and industrial use.

**Digital:** Designed for Indigo, toner, and laser printing.

Need **Shelf Marking** solutions? Choose from eight stocked options or work with us to create a custom product tailored to your print method, face stock, and layout.

In a hurry? Our **Quick Ship Program** offers fast, affordable custom-size sheets—see page 14 for details.

All items are listed as width x length and sold in full cartons only.

Contact Customer Solutions at **800-345-8039** for more info.

## Our Value Promise to You

We will work through our nationwide network of distributors to provide quality pressure sensitive sheet products for a diverse range of applications. We offer a wide variety of stocked products designed to run smoothly on different types of printers and presses. As experts in “What If” we can develop custom sheets to meet your special requirements or applications.

# FAMILY OWNED AND OPERATED SINCE 1981

You can't escape a label! Wausau Coated Products has long been the preferred source of specialty and custom products in the label industry. We do the different, we do the funky, we do the special, we do the things our customers can't find anywhere else! We are often challenged to create something, solve a problem, or make a product that has never existed before. That's how we built the business and that's been our success. We are the Experts in "What if..."

Wausau Coated Products is a trusted, independent family-owned and operated leading manufacturer of adhesive-based label products, and has been for more than 40 years. We offer a comprehensive range of stocked label products to fulfill your labeling requirements for a wide array of applications.

Wausau Coated Products is your one-stop resource for premium quality stocked products and custom-engineered constructions. We are the reliable, speedy source for all of your label needs!

FSC® certification ensures responsible use of forest resources.

# VersaPly® VS. VINYL

Wausau Coated Products offers a range of shelf marking options, including VersaPly® choices and Vinyl. Below are the features and benefits of VersaPly® in comparison to Vinyl shelf marking options. While Vinyl is a traditional shelf marking product, VersaPly® has been a competitive choice for shelf edge space for over 10 years. The major difference between the two options is that VersaPly® has a reinforced paper base, whereas vinyl relies on a plastic polymer base.

If you are specifically looking for a clear top shelf marker, we recommend considering Voided VersaPly® instead of clear vinyl. By using Voided VersaPly®, you can achieve full visibility of the original marker/original price beneath it, while also benefiting from easy printing and clean removal.

## VersaPly® vs. Vinyl Comparison

VersaPly®

Vinyl

- Lower carbon footprint and PVC free
- Reduced shipping costs
- Manufactured with 75% renewable resources
- Ease of printability without top-coating
- Strong and durable
- Performs in moist and cold environments
- Premium shelf marking adhesive solution available
- Forest Stewardship Council® Certified

VersaPly® is a trademark of Wausau Coated Products, Inc.

**Look for FSC® Certified Products.**  
FSC® certification ensures responsible use of forest resources.

# QUICK SHIP PROGRAM

Deliver the value of time to your customers.

Need something really fast? Wausau Coated Products **Traditional** and **UV Inkjet** Quick Ship Program is a fast, economical way to purchase custom size sheet-fed pressure sensitive products. This quick, inexpensive alternative to custom manufacturing is perfect when time is of the essence. Oftentimes, it's less expensive than carton stock pricing and it helps reduce waste. The order quantity for this program is 1.5 mmsi up to 30 mmsi.

## Quick Ship Specifications

- **Order Quantity:** 1.5 mmsi up to 30 mmsi
- **Leadtime:** Please confirm lead time with your Customer Solutions Specialist.
- **Packaging:** Bulk packed skids except items 14 x 20 or smaller will be packed in cartons.

## Quick Ship KM-1/UV Inkjet Specifications

- **Minimum Order Quantity:** 2500 Sheets 20" x 28" or 23" x 29".
- **Packaging:** Bulk packed press ready skids.

# CUSTOM SHEETS AND CONVERSION CHART

Take advantage of Wausau Coated Products Custom Sheet Program. Mix and match to create the ideal pressure sensitive product as we offer many face stocks with various adhesive technologies and liner options. Our knowledgeable sales team and technical staff rise to any challenge related to adhesive-based label materials to quickly turn a concept into a product, and deliver a solution that will give you the competitive advantage. The minimum order for custom sheets is 2 mmsi.

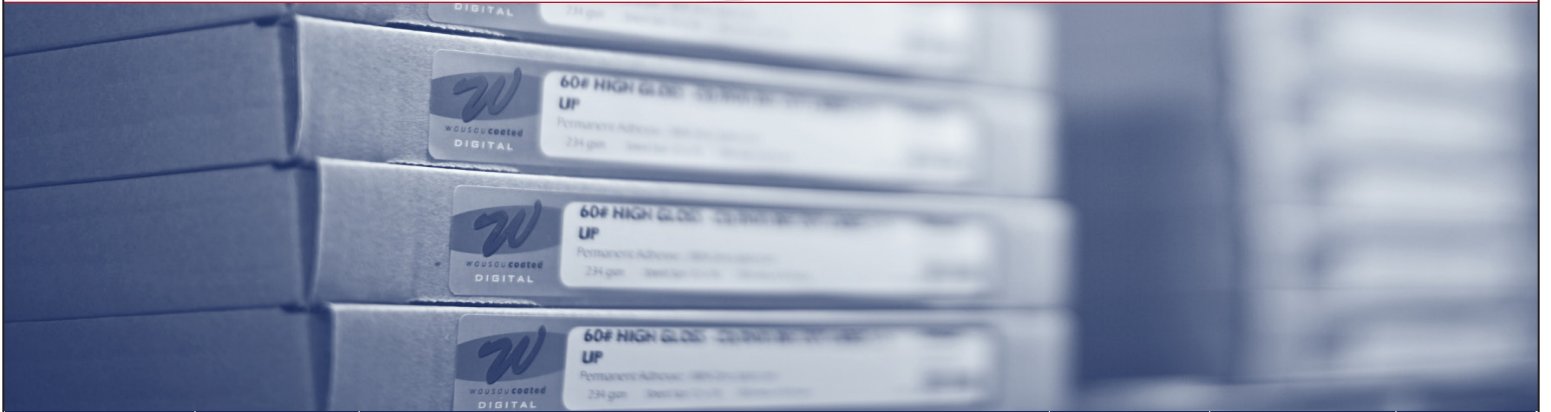

The table provided serves as a convenient guide to our program's minimum requirements, displaying their corresponding values in commonly used sheet sizes.

Total Million Square Inches Required	8 1/2 x 11 Sheets	12 x 18 Sheets	13 x 19 Sheets	17 1/4 x 22 1/4 Sheets	18 x 24 Sheets	26 x 20 Sheets	26 x 40 Sheets	28 x 40 Sheets	27 x 20 Sheets	27 x 38 Sheets	20 1/2 x 29 1/2 Sheets

# SUSTAINABILITY | PRINTING GUIDELINES AND TIPS

## Our Commitment to Sustainability

Wausau Coated Products offers a broad selection of environmentally responsible sheet products, including many with FSC® certification and recycled content. We've prioritized sustainability from the start—using primarily water-based, solvent-free adhesives—and continue to refine our practices to reduce environmental impact while delivering high-quality solutions.

## Sustainability Terms

### FSC® (Forest Stewardship Council®)

FSC® is a global nonprofit that promotes responsible forest management. Wausau Coated Products is FSC® Chain of Custody certified (FSC® C008943), ensuring materials are responsibly sourced and tracked through the supply chain. Look for the FSC® logo on our carton labels.

The mark of responsible forestry

### PCW (Post-Consumer Waste)

PCW is recycled material that has already been used by consumers and diverted from landfills. It's reprocessed into new products, reducing environmental impact.

### PCW vs. Recycled Material

Recycled paper may include:

- **PCW:** Used by consumers, then recycled.
- **Pre-Consumer Waste:** Manufacturing scraps never used by consumers.

### Recyclability

Our standard pressure-sensitive labels are not recyclable due to adhesive.

### Biodegradable vs. Compostable

- **Biodegradable:** Breaks down naturally, often in landfills.
- **Compostable:** Breaks down into nutrients in composting conditions, enriching soil.

## Guidelines and Tips for Printing

### Press Preparation

- Acclimate stock to shop conditions 24 hours in advance.
- Clean and adjust grippers/guides to prevent misfeeds.
- Fan and bend reams toward the face to avoid label separation.
- Limit press feeder stack height to 6 inches.

### Offset Printing

- Use fresh, low-tack ink; test before printing.
- Start with low press speeds.
- For non-absorbent face stocks, use oxidizing inks.
- Laser-compatible stocks require specialty inks that withstand up to 400°F.
- Maintain fountain solution pH between 5.0–5.5.
- Use thin UV varnish coats; thick layers may not cure and can cause curling.

### Laser Printing (Second Pass)

- Use inks rated for high heat and pressure.
- Avoid heavy ink coverage and spray powders.
- Ensure specialty finishes (e.g., foil, embossing) are laser-compatible.
- Do not use sheets with stripped internal matrix or non-laser adhesives.

### Laser, Copier & Inkjet Use

- Fan reams toward the face before loading.
- Follow printer settings for label media.
- Avoid damaged sheets or those with missing labels.

### Guillotining

- Use clean, sharp, double-beveled blades (24°–26° primary, 22°–24° secondary).
- Apply minimal clamp pressure to avoid deflection.
- Cut face-down to reduce adhesive drag.
- Fan reams after cutting to restore sheet feedability.
