

NON-TOXIC

# MOSQUITO TRAPS

ATTRACTS & KILLS MOSQUITOES THAT MAY CARRY DISEASE

NON-TOXIC

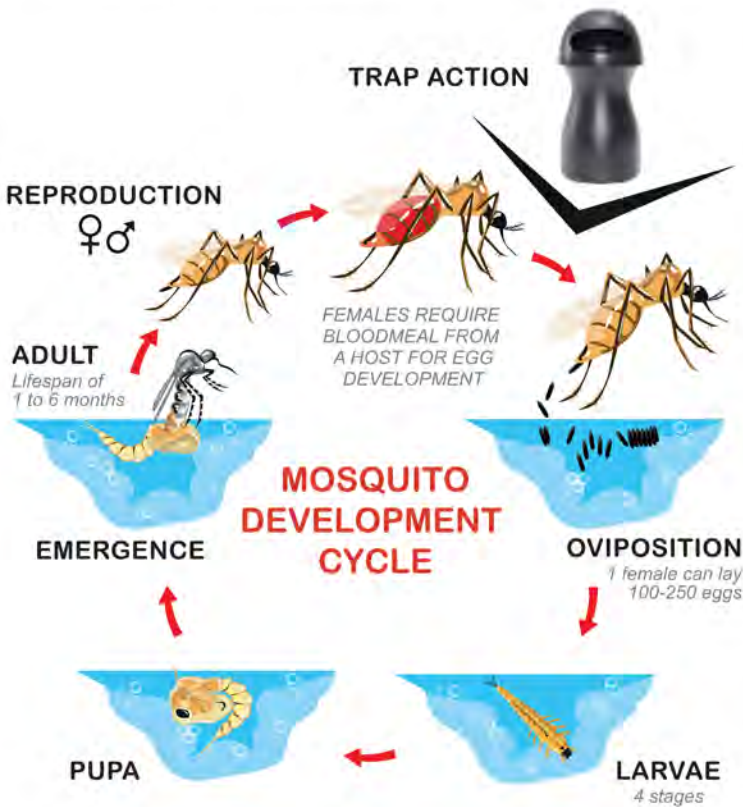

# STUCK MOSQUITO TRAPS

ATTRACTS & KILLS MOSQUITOES THAT MAY CARRY DISEASE

## BREAK THE CYCLE

STUCK® Mosquito Traps help interrupt the reproductive cycle of mosquitoes. Female mosquitoes needing to lay eggs become stuck on the Sticky-Screen™ as they descend to the water reservoir. Any eggs deposited are also caught in the screen.

## LAB-TESTED MOSQUITOES:

- *Aedes aegypti*  
Known container breeder
- *Culex quinquefasciatus*  
Known container breeder
- *Anopheles quadrimaculatus*  
Non-container breeder  
(Remove cover for best results)

## RECOMMENDED PLACEMENT

(Traps should always be placed on or near the ground)

### INSIDE

### OUTSIDE

### HOMES

- Garages
- Bathrooms
- Kitchens
- Laundry room
- Mud room
- Potted plants

- Gardens
- Play areas
- Dining areas
- Balconies
- Porches & Patios
- Drainage areas

### SCHOOLS

- Bathrooms
- Cafeteria
- Classrooms
- Entranceways
- Locker rooms

- Playgrounds
- Landscaping
- Sporting areas
- Bleachers
- Pavillions

### BUSINESS

- Bathrooms
- Lunchroom
- Potted plants
- Lobbies

- Sitting areas
- Gardens

- Pavillions

**SAFE FOR USE**  
AROUND CHILDREN & PETS  
(WHEN USED AS DIRECTED)

**EASY-TO-USE**  
JUST ADD WATER

**ECO-FRIENDLY**  
REUSABLE & RECYCLABLE

**LAB & FIELD TESTED**  
PROVEN EFFECTIVE

# HOW IT WORKS

STUCK® Mosquito Traps mimic an ideal environment for container-breeding mosquitoes. Female mosquitoes looking to lay their eggs in water naturally find the traps attractive. As they descend to the water reservoir for oviposition, they become stuck on the Sticky-Screen™ which also catches any deposited eggs and prevents the life cycle from continuing.

## GRAVID MOSQUITO

A gravid mosquito is a female mosquito looking to lay eggs. At this time, they can transmit diseases through preying on humans by biting them.

## WATER VAPOR

Evaporating water triggers female mosquitoes to deposit eggs in that area.

## PROTECTIVE LID | DEBRIS GUARD\*

Protects hands and paws from reaching the Sticky-Screen™.

## PATENTED STICKY-SCREEN™

Traps female mosquitoes as they descend to the water to lay eggs. Any deposited eggs are also caught.

Any eggs that make it to the water and survive are caught on the underside of the Sticky-Screen™ when the adult mosquito tries to emerge.

## WATER RESERVOIR

Fill water reservoir to the maximum fill line\* and replenish as needed directly through the Sticky-Screen™.

## ANCHORING SPIKE\*

Allows for stable placement in soil.

*\*Not included on all models*

## FEATURES & BENEFITS

- Patented Sticky-Screen™ technology effectively traps mosquitoes
- Mimics a naturally-attractive dark, humid environment
- Made from recycled materials (subject to material availability)
- Non-toxic and environmentally-friendly; no harmful chemicals
- UV-stabilized; won't fade or become brittle in the sun
- Reusable, refillable, and easily portable
