About Us

Welcome to Catalina Spas™ – Where Wellness and Relaxation Meet Innovation.

For over 28 years, we've proudly established ourselves as the UK's leading experts in premium hot tubs, swim spas, saunas, wooden spas, and much more.

Whether you're looking to unwind, enhance your fitness routine, or transform your outdoor space, our diverse range of products has something for everyone. From luxurious automatic covers and stylish pergolas to bespoke wellness solutions, we tailor designs to suit any lifestyle and setting.

Did you know Catalina Spas™ pioneered innovative spa designs? Our cutting-edge features like colour-changing lighting, built-in music systems, and the UK's first Party Swim Spa continue to set the benchmark for the industry!

1997- First Installation

Catalina Spas™ CX Hot Tubs

Discover the Catalina Spas™ CX Range of affordable Hot Tubs, where innovation and relaxation come together in every model.

The CX-2, CX-4, CX-5, CX-6, and three new models for 2025 are meticulously crafted in our state-of-the-art facility with a focus on quality and luxurious comfort.

Each spa is a fusion of advanced engineering and premium materials, incorporating industry-leading components from trusted names like Balboa® and Aristech™. This exceptional range delivers outstanding performance, energy efficiency, and lasting durability, offering a therapeutic soak that combines cutting-edge hydrotherapy with superior craftsmanship.

Catalina Spas™ CX Swim Spas

Swimming and exercise are among the most effective ways to maintain both physical and mental well-being. Swimming, in particular, provides a full-body workout that improves cardiovascular health, strengthens muscles, and enhances flexibility - all while being gentle on the joints.

Regular physical activity, including swimming, boosts energy levels, improves posture, and helps manage weight. It also releases endorphins, the body's natural mood elevators, reducing stress and promoting better sleep.

Catalina Spas™ is the original manufacturer of swim spas, expertly blending the healing effects of warm water and exercise to create some of the most advanced models on the market.

Our CX swim spa range features six unique models: the Mardi Gras, Amazon, Atlantic, Medley, Freestyle and the dual-temperature Marathon. Ranging in length from 4m to 6m. Whether you're a seasoned athlete or just starting out, a Catalina swim spa offers swimming and exercise to all fitness levels, making them ideal for building strength, endurance, and overall vitality. Dive into a healthier lifestyle today!

As the official distributor for Coast Spas® in the UK, Catalina Spas™ is proud to present a stunning collection of premium hot tubs and swim spas. Renowned globally for their innovative designs—such as the signature infinity edge overflow—and exceptional craftsmanship, Coast Spas® offer an unparalleled experience in relaxation, wellness, and luxury.

Each spa is meticulously crafted to the highest standards, utilising advanced manufacturing techniques and top-tier materials to ensure durability, performance, and lasting quality. Whether you seek therapeutic relief, family fun, or a tranquil retreat, Coast Spas® offer a diverse range of customisable options to suit your lifestyle. From cutting-edge hydrotherapy features to state-of-the-art technology like integrated lighting and sound systems, every detail is thoughtfully designed to enhance your experience. Coast Spas® proudly offers the exclusive Hydro-Cyclonic Filtration System, a revolutionary technology that sets the standard for hot tub water care. This system uses a powerful whirlpool effect to capture debris and contaminants, keeping your water crystal clear while reducing maintenance and chemical use.

Beyond comfort and functionality, Coast Spas® sets the benchmark for style, featuring sleek designs that seamlessly blend into any outdoor space. With options tailored to your unique needs, these spas transform every soak into a rejuvenating escape, where relaxation meets sophistication.

Explore the world of Coast Spas® with Catalina Spas™ and redefine the way you unwind.

Holiday Park Hot Tubs

Catalina Spas™ brings over 28 years of expertise in designing, manufacturing, and servicing hot tubs and swim spas across the UK. As a pioneer in supplying spas for holiday homes, we played a key role in founding BISHTA (*British and Irish Spa and Hot Tub Association*) and contributed to the development of the HSE/HPA Spa Management Handbook, which laid the groundwork for HSG282 compliance standards, ensuring the safety and proper management of spas.

Catalina Spas™ was also among the first to integrate auxiliary heating systems such as heat pumps and biomass-compatible heat exchangers, showcasing our commitment to innovation and sustainability.

Our range of HSG282-compliant hot tubs, including award-winning models like the CX-6 HP and the CS-3 HP - recognised with a Best Buy 2024 and 2025 Award by WhatSpa? Holiday Park Magazine - is designed to enhance any holiday rental experience. A Catalina Spa™ transforms a good holiday into an unforgettable memory.

Adding a holiday park hot tub to your rental property not only elevates its appeal and marketability but also creates a profitable, self-sustaining premium feature.

CS-3HP receives the WhatSpa? Best Buy Award for 2024 and 2025.
CX-6 HP receives the WhatSpa? Best Buy Award for 2025.

Wood Fired Hot Tubs

Our wood fired hot tubs are crafted from Thermowood, a thermally treated wood that enhances durability and insulation, offering a lifespan of up to 30 years.

Each model features an ergonomic, waterproof GRP and acrylic interior, available in a selection of colours, including white, blue, or grey. Additional options include LED lighting, bubble systems, filtration, and hydrotherapy jets for a customised experience.

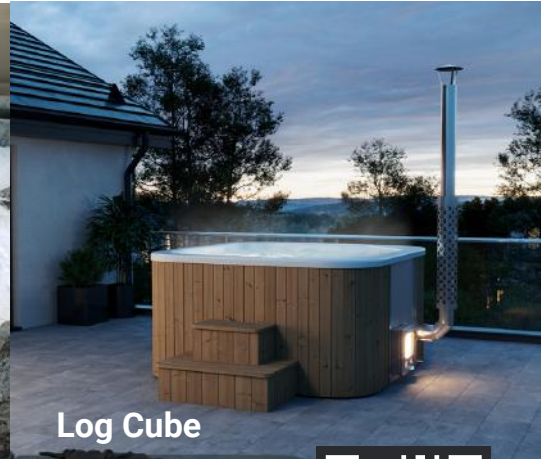

Our range combines natural wood exteriors that blend seamlessly with outdoor settings, creating a truly authentic and rustic bathing experience that is both visually appealing and affordable.

Saunas

Catalina Spas™ offers a diverse selection of saunas available in various sizes, shapes, and configurations to suit any space and lifestyle. Saunas are renowned for their numerous wellness benefits, including detoxification, improved metabolism, enhanced cardiovascular health, pain relief, and deep relaxation. Whether you're looking for a therapeutic retreat or a luxurious addition to your home, our saunas cater to every need.

Our latest models, including The Holt, The Wessex, and The Wessex 220 Vista, are designed with precision and elegance. These models feature customisable options, such as adjustable temperature controls, mood-enhancing lighting, premium wood finishes, and advanced audio systems, ensuring a truly tailored experience.

Commercial Spas

We offer a diverse range of spa shells, each expertly designed with versatile jet plumbing configurations to meet various needs and preferences. These spa shells are highly adaptable, making them ideal for both in-ground and above-ground installations. Whether for residential use, light commercial settings, or full-scale commercial applications, they deliver exceptional functionality and style.

To further enhance performance and meet specific requirements, we also manufacture custom-designed equipment packs and advanced water treatment systems. These tailored solutions ensure optimal operation, energy efficiency, and ease of maintenance in any environment.

With our spa shells and bespoke systems, you can create a personalised spa experience that seamlessly integrates into your chosen space, offering both luxury and practicality.

Marine

We are proud to partner with some of the world's most prestigious yacht builders, including Sunseeker™, Horizon Yachts, and Oyster Yachts, among others. Our expertise lies in creating bespoke spa and hot tub designs that meet the exacting requirements of discerning clients.

Each design is meticulously crafted to align with the luxurious standards of these renowned yacht builders while adhering to the strict RINA (Royal Institution of Naval Architects) specifications. We ensure every spa is not only visually stunning but also engineered to perform reliably in the demanding marine environment, with features like corrosion-resistant materials, energy-efficient systems, and tailored dimensions to fit seamlessly into yacht designs.

By combining innovation, craftsmanship, and functionality, we deliver products that enhance the luxury experience onboard, offering yacht owners and their guests the ultimate in relaxation and indulgence.

EZ Cover™ Pergolas

The EZ Cover™ Pergola range combines robust construction, stylish design, and exceptional functionality to elevate any outdoor space. Key features include hidden guttering, integrated LED lighting, and a remote-controlled, fully waterproof roof. With nine size options ranging from 3m x 3m to 5m x 6m, this range provides versatile solutions for various spaces and requirements. Optional side screens or glazed doors add an extra layer of weather protection, making the pergola usable year-round.

Built entirely from UV-protected, powder-coated aluminium, the EZ Cover™ Pergola is designed for durability and requires virtually no maintenance. Its solid construction supports snow loads of up to 250kg/m² and withstands wind speeds of up to 60m/s, ensuring reliable performance in diverse weather conditions. The pergola meets full CE and UKCA approval, providing peace of mind alongside its impressive functionality.

With its sleek design and advanced engineering, the EZ Cover™ Pergola is the perfect blend of form and function, ideal for creating comfortable, protected outdoor living spaces.

EZ Cover™ EZ Rollover Covers Hot Tubs and Swim Spas

The EZ Cover™ Rollover Covers are specifically designed to fit Catalina spas and swim spas, as well as other makes and brands, with a variety of sizes available to ensure a perfect fit. Crafted for ease of use, these covers are made from durable, waterproof weather shield material and for added safety feature secure, locking tie-down straps. The one-piece rolling design offers exceptional convenience, making these covers ideal for both indoor and outdoor settings.

They are particularly beneficial for dual-temperature swim spas, as the design allows either end of the cover to be opened independently. This feature provides easy access while maintaining optimal protection and energy efficiency.

Engineered for durability and practicality, the EZ Cover™ Rollover Covers ensure that your spa remains protected from the elements, enhancing its longevity and performance while offering effortless operation.

EZ Cover™ Replacement Covers

Crafted from advanced Weather Shield Material, our premium replacement covers are the ideal upgrade from standard cover options, designed for both hot tubs and swim spas. These bi-fold insulated covers prevent water pooling and feature a luxurious Weather Shield finish.

- Breathable
- Wind-resistant
- Durable
- Soft and lightweight
- UV-protected
- Flame-retardant
- Lockable

Scan to view the range on our website.

Available in grey or brown, our replacement covers come in standard hot tub sizes: 193x193 cm, 205x205 cm, 213x213 cm, 221x221 cm, and 236x236 cm. Swim spa sizes include 12ft, 14ft, 16ft, 18ft, and 21ft. Custom sizes are also available.

EZ Cover™ Automated Covers

Our Automated Covers are designed for pools, spas, and swim spas up to 3.5m wide and 12m long.

Featuring anodized aluminium guide tracks that run the length of the spa, the cover operates with an external motor, which can be installed above or below ground level.

With the simple press of a button, the cover smoothly extends or retracts, providing both an effective heat-retention solution and an added safety feature when closed.

- Requires a 220VAC power supply.
- Drive motor operates on 24VDC.
- Available in brown or white slats.
- Fits swim spas, spas, or pools up to 12 meters long and 3.5 meters wide.
- CE and UKCA approved.

This automated cover combines convenience, safety, and energy efficiency, offering a seamless solution to keep your pool or spa protected, insulated and easy to use.

Catalina Spas™ Water Treatment Pro

The Catalina Water Treatment Pro simplifies chemical maintenance for hot tubs, swim spas, and pools. Developed in collaboration with Hanna Instruments™, it integrates advanced water testing and automatic chemical dosing into a durable, weatherproof unit. Equipped with the Hanna BL-122-20 system, it ensures consistent pH and chlorine levels, while offering the convenience of online data logging through the Hanna Cloud app. This feature allows you to monitor and manage your water treatment remotely, making it ideal for both domestic and commercial use.

Compliant with HSG282 guidelines, the Catalina Water Treatment Pro is a perfect solution for holiday parks, resorts, and any setting requiring consistent, reliable water quality management. It streamlines maintenance, ensuring clean, safe water for every user.

Catalina Spas™ is proud to offer a selection of InAir™ products, providing high-quality ventilation, dehumidification, heat pumps and air purification solutions designed specifically for enclosed spaces, wet rooms, showers, spa rooms, changing rooms, pool areas, wet display areas, as well as homes and offices.

InAir™ systems are engineered to significantly enhance indoor air quality by effectively managing ventilation and removing airborne pollutants. These advanced systems not only improve airflow but also create healthier, more comfortable environments for any space.

Equipped with state-of-the-art HEPA filters, InAir™ units capture 99.97% of airborne allergens and contaminants, including pollen, mould spores, dust, pet dander, microbes, smoke, and other harmful particles. This makes them an excellent choice for anyone looking to improve the air quality in a residential setting, a commercial space, or a high-humidity environment such as spa areas and pool rooms.

Whether you're looking to enhance the air quality in your home, office, or wellness facility, InAir™ products deliver reliable, energy-efficient performance, ensuring a consistent supply of cleaner, fresher air. Designed for ease of use and low maintenance, they offer long-term benefits for health, comfort, and well-being.

Heat Pumps

Our range of heat pumps is specially engineered to provide efficient and cost-effective heating for small to medium-sized outdoor pools, swim spas, and hot tubs.

Designed to deliver reliable performance in a variety of climates, these advanced heating systems utilize energy-efficient technology to reduce heating costs by up to 70% compared to traditional methods. Ideal for both residential and commercial use, Catalina Heat Pumps ensure that your pool or spa is always at the perfect temperature, allowing you to enjoy your water features comfortably throughout the year while minimising energy consumption.

Durable and environmentally friendly, these systems are the smart choice for those seeking high performance, savings, and sustainability.

Our Heat Pump range includes: Balboa® Clim8Zone Heat Pump, Catalina 4kW Eco Hot Tub Heat Pump, Dantherm Heat Pumps, Spawer IceSpa Heat Pump, and the Spawer O'Spa Heat Pump.
