## *PVC CEILING PANEL ACCESSORIES*

### **PRODUCT TYPE: PVC CEILING PANEL ACCESSORIES**

### **MATERIALS: POLYVINYL CHLORIDE (PVC)**

#### **POLYVINYL CHLORIDE**

ØPVC comes in rigid (sometimes abbreviated as RPVC) and flexible forms. Rigid PVC is used in [construction for pipe, doors and windows.](#)

[It is also used in making plastic bottles, packaging, and bank or membership cards.](#)

[Adding plasticizers makes PVC softer and more flexible. It is used in plumbing, electrical cable insulation, flooring, signage, phonograph records, inflatable products, and in rubber substitutes.](#)

[With cotton or linen, it is used in the production of canvas.](#)

ØPolyvinyl chloride is a white, brittle solid.

It is insoluble in all solvents but swells in the monomer and some chlorinated hydrocarbon solvents

#### **PURPOSE OF PVC CEILING PANEL**

ØCeiling panels are an essential part of any building. They can be used to improve acoustics, provide insulation, and add style to a room.

There are many different types of ceiling panels available on the market, but one of the most popular is PVC ceiling panels.

**AREAS OF APPLICATION: HOTELS, COMMERCIAL BUILDINGS, HOSPITALS, SCHOOLS, KITCHEN, AND ETC.**
