DK GREY  
2025-2  
AVAILABLE IN:  
80 x 210 and 90 x 210

### WHAT ARE MDF LAMINATES?

MDF laminates refers to a type of surfacing material that combines medium-density fiber board (MDF) and a laminate finish. MDF is an engineered wood product made by compressing wood fibers together with a resin binder under high pressure and temperature. It is known for its smooth, uniform surface and excellent stability. Laminate, on the other hand, is a synthetic material made by fusing multiple layers of paper or fabric with a melamine resin. This resin provides durability, resistance to scratches and stains, and a wide range of design options. Laminate is commonly used as a surface finish for furniture, cabinetry, countertops, and other interior applications.

## FLUSH DOORS

A Flush Door is a type of interior or exterior door known for its flat, smooth surface and simple, minimalist appearance.

**\*FEATURES:** Smooth, flat surface made with strong core construction veneered finishes.

**\*ADVANTAGES:** Clean modern look with minimal maintenance and excellent durability.

**\*BENEFITS:** Get a sleek, versatile door that fits any space—ideal for homes, offices, and commercial interiors. Durability meets design for everyday use.

## PVC DOORS

□ What is a PVC Door?

A PVC Door is a lightweight, cost-effective door made from polyvinyl chloride (PVC) — a type of durable plastic widely used in building materials.

**\*FEATURES:** Flat, smooth-surfaced door with a solid or hollow core and plain finish.

**\*ADVANTAGES:** Offers a clean, minimalist look that fits any interior while being cost-effective and easy to maintain.

**\*BENEFITS:** A practical choice for modern homes, offices, and rental properties—durable, affordable, and easy to match with any décor.

## ALUMINUM DOOR

### Features:

- \* Anti-corrosive aluminum frame with a powder-coated finish Half-glass design allows natural light while maintaining privacy
- \* Moisture-proof construction, ideal for bathrooms and toilets Lightweight yet durable, stronger than PVC doors
- \* Left and right opening options Door size: 700 x 200 cm, Thickness: 3 cm
- \* Jamb size: 67 x 200 cm, Thickness: 6 cm
- \* Available in classic white with included door knob and hinges

### Advantages:

- \* **Durability:** Built to last longer than PVC doors, resisting rust and moisture
- \* **Low Maintenance:** Easy to clean with minimal upkeep
- \* **Lightweight:** Simple to install and easy to operate
- \* **Moisture Proof:** Ideal for high-humidity areas like bathrooms and toilets
- \* **Elegant Finish:** Powder-coated surface ensures a smooth and stylish look

### Disadvantages:

- \* Higher cost compared to PVC doors
- \* Susceptible to scratches and dents
- \* Limited color and design options

### Benefits:

- \* **Enhances Aesthetics:** Sleek design adds elegance and brightness to any space
- \* **Improved Longevity:** Resistant to corrosion, ensuring long-lasting performance
- \* **Energy Efficient:** Insulated glass helps maintain indoor temperatures
- \* **Space-Saving:** Slim profile fits well in compact areas
- \* **Secure and Reliable:** Sturdy frame and tempered glass ensure safety and security
