

OLD TOWN
STEELWORX

OVER 12 YEARS

Commercial . Industrial . Residential . Retail

Who We Are

Since 2014, we have bridged the gap between structural steel and refined aesthetic design, evolving into a multi disciplinary practice that seamlessly integrates timber for unique, high-impact results. As a **family owned and operated business** based in **Mnandi, Centurion**, our core team of six full time specialists utilizes our specialized workshop and **CNC machinery** to deliver technical precision. By leveraging a vast resource network of larger teams when needed, we provide the agility of a boutique firm with the capacity to handle large scale projects for major brand names.

Our process is anchored in transparency and visual clarity, through advanced **3D drafting and conceptual design**, we eliminate guesswork and ensure the finished product aligns perfectly with your vision before construction begins. From industrial and commercial builds to bespoke retail installations, we bring a level of finesse and material expertise that has been our hallmark for over a decade.

Residential

Our residential work spans South Africa's most prestigious addresses, including **Copperleaf Golf Estate, Steyn City and Waterfall City Estate**. From large scale structural steel builds to bespoke pergolas, gates and custom shutters, we blend timber and steel to showcase luxury living.

Retail

Our retail footprint is defined by high impact installations for major brand names at South Africa's most iconic shopping destinations, including **Sandton City, Melrose Arch, and Menlyn Shopping Centre**. From complex structural work to bespoke aesthetic finishes, every retail environment we touch reflects the premium identity of the brands we serve.

Commercial

We have delivered both heavy structural steelwork and refined aesthetic installations for major entities such as **Ford, KFC, and Inospace** By utilising our 3D drafting and CNC capabilities, we eliminate on site surprises.

Industrial

We have become a trusted partner for industry leaders like RCL Foods and Nampak, in both planned shutdowns and emergency breakdowns. Our team understands that in a production environment, every minute of downtime is critical.
