PRIME

OPERATION MONITORING APPLICATION

Elevating Performance

PRIME is a full stack application in managing and monitoring key performance indicators (KPI) of organizations. Based on basic principle of performance merits, PRIME can diagnose and detect issues within organizational resources. It offers a range of functions that facilitate the creation and operational effectiveness of management and monitoring operations.

KPI Management

01

PRIME assists organizations in ongoing assessment of KPI data, evaluating performance against key business objectives and their operational relevance, with a specific focus on ensuring KPI analysis is specific, measurable, attainable, relevant, and time-bound.

Project Management

02

The Project Management module efficiently plans, tracks, and ensures timely delivery of tasks and projects, seamlessly integrating resource scheduling and advanced analytics functionalities.

Report Management

03

The modules offer management a comprehensive perspective on projects, resources, skills, and pertinent organizational data, along with a seamlessly integrated reporting module for generating reports with a single click.

Task Management

04

PRIME digitally records the entire task assignment process, including outcomes, challenges, and resource allocation, offering management a comprehensive overview of assignment development and shortcomings from initiation to completion.

PRIME

DELIVER HIGH PERFORMANCE
TO YOUR ORGANIZATION

05

Workload Management

The Workload Management module seeks to optimize organizational resources for maximum productivity by matching assigned tasks with the required and available resources, enabling careful long-term planning of human resources to achieve the objectives of each assigned task and project.

Key Features

>> Web Application

>> Responsive GUI Design

>> Support Database MySQL & MSSQL

>> Support Firefox, Google Chrome and Microsoft Edge

>> Using Micro Services Architecture

>> Customizable

>> Scalable
