LETT

is a film made by levi raeburn
which was filmed over the time
period of september 2023 -
december 2023 and was released
in july 2024 digitally and on dvd.

some highlights from the film are:

FOR HOME

for the movie, i made intros for everyone (which took up basically half of the film) and i drew little characters of them for the intros. i'll put some below. if you guys are curious why letter home isn't on the propagate channel, youtube's being a bitch about it and taking down within minutes of me uploading it. I think the fact that it's only on dvd helps it with it's mysteriousness.

HOW TO SPREAD PROPAGATE !

put up paste-ups
spread the zine
stick up stickers in places
write the name on walls
send your friends our insta
etch the name into bus stops
put the youtube on in class
tell your mum about the zine
make fake ass merch and wear it in public

get the name tattooed onto your body
make your own fan videos
make a sex tape with our name branded in the vid
repost the vids onto instagram
shave the name on your head
deface your school toilets with the name
write the name into your suicide note

SONY VX1000

The Sony VX1000 was the first MiniDV camera to include a 3CCD system. The VX was considered a massive step up from regular handycams, bringing portability to a professional camera.

Skate films that were shot on the VX:

The VX was seen having extensive use during the rise of skate videos in the mid to late 90's, one of the most infamous being Baker 3. While being combined with the MK1 fisheye made by Century Optics, the VX brought a very distinct and unique aesthetic style to skateboarding that holds up today.
