### Vol. 4

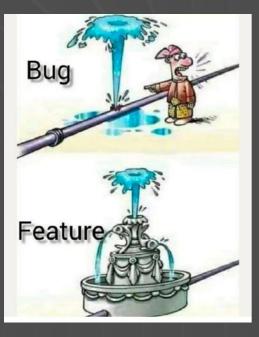

# Weekly Param Team Newsletter

"Everything we hear is an opinion, not a fact. Everything we see is a perspective, not the truth."

## Before we claim absolute Truth! Remember

We can see less than the 1% of the electromagnetic spectrum. We can listen to less than 1% of the acoustic spectrum.

As you read this, we are travelling at 220km per second on our axis AND around the sun.

The atoms in our body are 99.9999999% empty space. None of them are atoms we were born with.

We have 46 chromosomes, 2 less than the common potato. Chimps have 48 chromosomes, 2 more than us.

If the history of our planet was represented by 24 hours, human presence on this planet will be for the last 1 minute and 17 seconds.

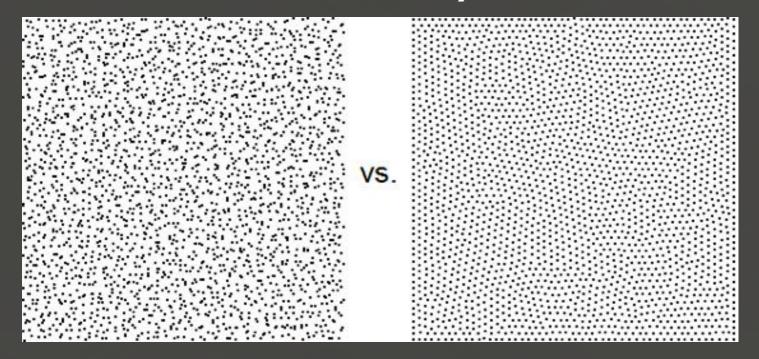

It's all about perspective. While building Param we must ensure that our perspective and the visitor's perspective align.

#### PARAM INNOVATION

# LOOK, SEE, THINK OPININATE, BELIEVE

# Randomness : Real vs human generated randomness. The easiest way to detect fraud.
