Welcome to Wildes Land!

Wildes Land advocates natural and species-appropriate diets for dogs and cats. Our motto is:
Pure nature!

We produce premium dog and cat food that is fully tailored to the natural needs of our house pets. An extra portion of fresh meat for excellent acceptance, no grains or gluten for optimum tolerance, and valuable wild herbs are what set our foods apart. Inspired by our love for our pets, we deliver the essence of nature by the bowlful!

From wet food to dry and semi-moist dry food to snacks, our product assortment has everything that gets our canine friends excited – adult dogs and puppies alike.

What we stand for

Extra portion of fresh meat

All Wildes Land food varieties contain an extra portion of fresh, premium meat for species-appropriate dog nutrition.

Well-accepted and well-tolerated

Wildes Land food is outstandingly well-accepted and exceptionally well-tolerated, thanks to its high content of fresh meat.

Grain-free / gluten-free

We do not use any grains or gluten because our recipes are intended to be 100% natural nutrition for your dog.

Valuable wild herbs

Our select wild herbs such as milk thistle, dandelion, and nettle are known to be a source of valuable nutrients, and complement our product selection.

Reduce CO₂,
one paw at a time!

At Wildes Land, we deliver the essence of nature by the bowlful. Our nutrition experts have developed PawPrint to actively protect this essence: When this species-appropriate, grain-free diet was developed and produced, the ecological carbon pawprint was a major factor in its design. Of course, your dog will still find it delicious.

To help reduce the ecological pawprint, we use a variety of sustainable protein sources in our Animal Welfare, Insect, and Veggie lines: Fresh meat from animals raised under improved husbandry conditions as well as insect- or plant-based protein sources. We consistently avoid and reduce CO2 emissions. We also finance certified climate protection projects to help offset unavoidable emissions. All our packaging is also fully recyclable. This reduces the carbon pawprint** of PawPrint products. You can thus feed your pet in a sustainable and species-appropriate way – whether regularly or on individual days. Let's do something together for the environment and protect our planet.
