ABOUT US

Auryeth International is an eco-focused agricultural company committed to nurturing nature while delivering high-quality agricultural products to global markets. With our own farms and a strong network of trusted farmers, we actively participate in every stage of the agricultural journey—from cultivation and harvesting to processing and supply. Our approach is rooted in sustainability, ethical farming practices, and long-term environmental responsibility.

We believe that true quality begins at the source. That's why we emphasize responsible sourcing, soil health, water conservation, and minimal use of chemicals across our farming operations. By working closely with farmers, we ensure fair practices, consistent standards, and complete traceability, allowing our customers to trust the origin and integrity of every product we deliver.

At Auryeth International, innovation meets tradition. We combine modern agricultural techniques with time-tested farming wisdom to produce crops that meet international quality benchmarks. Our processing methods are designed to preserve natural value while maintaining safety, hygiene, and freshness.

Herbal & Superfood powder

Natural Moringa Powder

Our natural moringa powder is produced from carefully selected moringa leaves, shade-dried and finely milled to retain natural nutrients, aroma, and color. Ideal for health supplements and food formulations.

KEY FEATURES

- Organic & Natural
- No additives or preservatives
- Fine green powder
- High nutritional value
- Export-ready quality

Wheatgrass Powder

Wheatgrass Powder is produced from young wheatgrass shoots harvested at peak nutrition and dehydrated using low-temperature technology to preserve enzymes and nutrients. It is widely used in detox and wellness products.

KEY FEATURES

- Rich in Chlorophyll
- High Antioxidant Content
- Detox Support Ingredient
- 100% Natural and Vegan
- No Artificial Additives

Herbal & Superfood powder

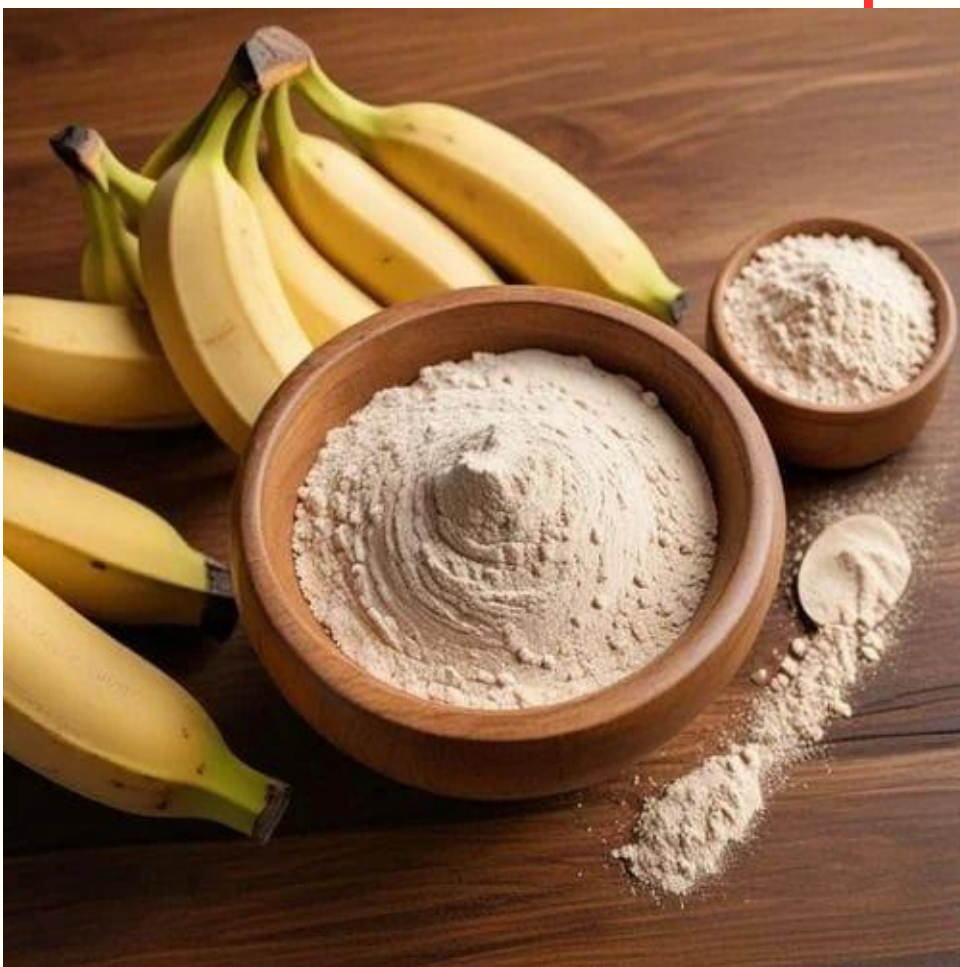

Banana Powder (RAW)

Banana Powder (RAW) is produced from carefully selected unripe green bananas that are cleaned, sliced, dehydrated, and finely milled under hygienic conditions. It is rich in resistant starch, dietary fiber, and essential nutrients, making it widely used in health foods, baby foods, and functional nutrition products.

KEY FEATURES

- 100% Natural and Plant-Based
- High Resistant Starch Content
- Rich Source of Dietary Fiber
- Gluten-Free
- No Artificial Color or Preservatives

Banana Powder (RIP) ***Ripe Banana Powder***

Banana Powder (RIP) is made from naturally ripened bananas that are dehydrated and processed into a smooth powder. It offers natural sweetness, flavor, and nutritional value, making it suitable for beverages, desserts, and bakery applications.

KEY FEATURES

- Naturally Sweet Flavor
- Rich in Potassium and Energy Nutrients
- Fine Texture
- Easily Soluble
- Free from Artificial Additives

Herbal & Superfood powder

Beetroot Powder

Beetroot Powder is manufactured from fresh, carefully selected beetroot roots that are dehydrated and finely ground to preserve natural color and nutrients. It is widely used as a natural coloring agent and nutritional supplement.

KEY FEATURES

- Natural Red Color Source
- Rich in Iron and Antioxidants
- No Artificial Additives
- High Nutritional Value
- Fine Mesh Powder
- Easy Solubility

Garlic Powder

Garlic Powder is produced from premium quality garlic cloves that are dehydrated and processed under controlled conditions to retain aroma and flavor. It is widely used as a seasoning ingredient across food industries.

KEY FEATURES

- Strong Natural Aroma
- Long Shelf Life
- No Added Preservatives
- Fine Free-Flowing Powder
- Hygienically Processed

Herbal & Superfood powder

Cactus Mucilage Powder

Cactus mucilage powder is derived from natural cactus plants through careful processing to retain its binding, water-retention, and biodegradable properties. It is an eco-friendly, plant-based solution suitable for agricultural, environmental, and industrial applications.

KEY FEATURES

- Natural & Plant-Based
- Biodegradable & Eco-Friendly
- High Water-Retention Capacity
- Natural Binding & Thickening Properties

Onion Powder

Onion Powder is made from fresh dehydrated onions that are carefully processed into fine powder while preserving their natural flavor and aroma. It is widely used as a convenient substitute for fresh onions in food processing and seasoning applications.

KEY FEATURES

- Strong Flavor Profile
- Fine Texture
- Easy Mixing
- Long Shelf Stability
- No Artificial Ingredients

Natural Food Products

Fresh Lemons

Our fresh lemons are naturally grown using sustainable farming practices. They are known for their vibrant color, rich aroma, high juice content, and long shelf life. Carefully harvested and sorted to meet domestic and international quality standards.

KEY FEATURES

- 100% Natural & Fresh
- High Juice Content
- Strong Aroma & Flavor
- Hygienically Handled
- Suitable for Domestic & Export Market

Jaggery and Jaggery Powder

Jaggery and jaggery powder are made by processing natural sugarcane or date palm jaggery into either solid blocks or fine powder while retaining all its natural nutrients. Both forms are easy to use and ideal for modern kitchens, beverages, and food processing industries.

KEY FEATURES

- Natural & Unrefined
- High Juice Content
- No Chemicals or Additives
- Rich in Iron & Minerals

Eco Friendly Products

Areca Leaf Products

Areca leaf products are made from naturally fallen areca palm leaves, processed without chemicals or additives. These products are strong, hygienic, and biodegradable, making them an ideal alternative to plastic and disposable tableware.

KEY FEATURES

- 100% Natural & Chemical-Free
- Biodegradable & Compostable
- Strong, Durable & Heat-Resistant
- Hygienically Processed
- Eco-Friendly Alternative to Plastic

Sal Leaf Products

Sal leaf products are made from naturally collected sal tree leaves and stitched using traditional methods without the use of chemicals. These products are eco-friendly, biodegradable, and widely used as sustainable alternatives to disposable plastic tableware.

KEY FEATURES

- 100% Natural & Chemical-Free
- Biodegradable & Compostable
- Traditionally Handcrafted
- Food-Safe & Eco-Friendly
- Sustainable & Environment-Friendly

Organic Agriculture Products

Cow Dung Cake (Dry)

Cow Dung Cake is a natural product made from fresh cow dung that is shaped and sun-dried under hygienic conditions. It is widely used as a traditional fuel, organic manure, and for religious rituals. Cow dung cakes are eco-friendly, biodegradable, and produce minimal smoke when used as fuel.

KEY FEATURES

- 100% Natural and Eco-Friendly
- Chemical-Free Product
- Biodegradable and Sustainable
- Long Shelf Life
- Low Smoke Fuel Source

Cow Dung Powder

Cow Dung Powder is produced by drying and finely grinding natural cow dung under hygienic processing conditions. It is widely used in organic farming, incense products, bio-fertilizers, and eco-friendly applications. This product is completely natural and supports sustainable agriculture practices.

KEY FEATURES

- 100% Natural Organic Material
- Rich in Natural Nutrients
- Environmentally Friendly
- Chemical-Free
- Finely Processed Powder
- Supports Soil Fertility

Organic Agriculture Products

Vermicompost Fertilizer

Vermicompost Fertilizer is a natural organic fertilizer produced through the decomposition of organic materials using earthworms. This process converts organic waste into nutrient-rich compost that improves soil fertility and plant growth. Vermicompost is widely used in agriculture, horticulture, gardening, and organic farming.

KEY FEATURES

- 100% Natural Organic Fertilizer
- Rich in Essential Plant Nutrients
- Improves Soil Structure and Fertility
- Enhances Plant Growth and Yield
- Chemical-Free and Eco-Friendly
