Create your own personalised shopping bag

With handle bags, you can design fully customised shopping bags, choosing materials, colours and finishes to create a unique product.

Every detail can be customised

1 Logo

Print, embroidery or custom design

2 Materials

Cotton, jute, non-woven fabric, polyester and other materials

3 Handles

Long, short, double or reinforced

4 Colors

A wide range of colors available

5 Dimensions

Base, height and bellows made to measure

6 Finishing touches

Zips, Velcro, pockets and customised details

7 Packaging | Polybags, labels and bespoke packaging

Bespoke manufacturing, direct import

Thanks to our experience in manufacturing and direct importing, we produce bespoke shopping bags, overseeing every stage of the project with care and attention to quality.

100% bespoke orders sourced directly

Certifications and sustainability

Our bags are made using carefully selected materials and responsible production processes. Our certifications guarantee transparency throughout the supply chain, high-quality materials, and respect for the environment and people.

Our certifications

International standard for the traceability of recycled materials

Promotes fair and sustainable working conditions

Global standard for organic textiles and responsible processes

Certifies that the fabrics are free from harmful substances

01.

Cotton

Many eco-friendly solutions

Cotton tote bags are practical and versatile accessories; two of their most significant aspects are the sustainability of the material and its reusability, which reduces the use of disposable products and, consequently, minimizes waste.

Made of natural fiber, these bags are sturdy and ideal for shopping, work, or leisure. Available in various designs and sizes, they are available in a variety of materials with different sustainable characteristics:

Recycled cotton

Made from recovered cotton fabrics, it reduces the demand for new resources and limits textile waste

Organic cotton

Grown without the use of pesticides and chemical fertilizers, it has a lower environmental impact than conventional cotton

Natural cotton (not dyed)

It retains its raw color, reducing the use of chemicals and water in the production process

Cotton in its various forms can give your brand an image of strong responsibility, sensitivity to the theme, and quality, conferred by the durability of the items.

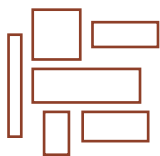

Recycled cotton

A new lease of life for fibres

Recycled cotton is a sustainable solution that helps reduce textile waste and environmental impact. Produced by recovering and processing cotton waste, it retains the quality and durability of traditional cotton, whilst requiring far fewer natural resources (to allow our recycled cotton to maintain the same quality and resistance as traditional cotton, we have added a small amount of recycled polyester to the yarn).

The use of recycled cotton promotes a circular economy model, reducing the need for new crops (thereby reducing water consumption and soil depletion) and limiting the production of textile waste. For our recycled cotton shopping bags, we have calculated the percentage of CO₂ saved compared to the same product made from virgin cotton.

From recycling to a new bag - The production process for a recycled cotton bag

01

Waste collection

Textile waste sorted by colour and composition

02

Fibre regeneration

The fabrics are shredded and turned into new fibres

03

Spinning

The regenerated fibres are processed into new yarns

04

Bag production

The fabric is cut and sewn to create the shopping bags

Why choose recycled cotton

Choosing recycled cotton means opting for a more responsible and sustainable solution. It reduces the consumption of natural resources, minimises textile waste and helps to promote a textile industry that is more mindful of the environment and people.

Customise your shopping bag

Handle Bags are the perfect way to showcase your brand. Thanks to a range of printing techniques, each model can be customised to suit any marketing requirement.

Printing techniques

1 Screen printing

Ideal for logos and graphics with up to 5 colours. It guarantees excellent results and long-lasting durability.

2 DTF (Direct to Film)

Ideal for multi-coloured images and complex graphics, offering great colour flexibility.

Available print positions

1 Front*

2 Back*

3 On pocket*

With Handle Bags, every detail becomes an opportunity to create unique shopping bags and strengthen your brand identity.

*You can check the printing techniques, positions and corresponding print areas available for each item on our website.

Organic cotton

Grown with respect for nature and people

The Global Organic Textile Standard (GOTS) certification guarantees that the cotton comes from organic farming and that the entire production process complies with strict environmental and social criteria.

At least 70% of the fibres must be organic, and harmful chemicals are prohibited. GOTS promotes fair working conditions, protects workers' health and ensures transparency and traceability throughout the supply chain.

A close-up photograph of a textured, brown fabric, likely jute, with a white text overlay. The fabric is draped and folded, creating deep shadows and highlights that emphasize its coarse, woven texture. The color is a warm, earthy brown. The text is in a clean, white, sans-serif font.

The background consists of several overlapping sheets of paper. The top sheet is a light grey color, while the sheets underneath are various shades of brown, from light tan to dark chocolate. The sheets are layered diagonally from the top-left towards the bottom-right, creating a sense of depth and texture.

05.

R-pet

From bottle to textile fiber

R-PET is a material obtained from recycled plastic bottles. Through a recovery and transformation process, the plastic is regenerated and transformed into new textile yarns.

This process reduces plastic waste and gives new life to materials that would otherwise end up in the environment.

From fiber to the new bag - Production process of an R-PET bag

01

Plastic collection

Plastic bottles are collected and sorted for recycling

02

Shredding

The bottles are washed and reduced to fragments called flakes

03

Yarn regeneration

The flakes are melted and transformed into recycled polyester filaments

04

Production of bags

The resulting fabric is cut and sewn to make the bags

Why choose R-PET bags?

Choosing a bag made from r-PET means helping reduce plastic waste and reuse resources.

Recycled polyester offers the same performance as traditional polyester, ensuring strength, durability, and quality, with a reduced environmental impact.

Shopping bags

24110

Como

70 g/m² heat-sealed recycled PET shopper bag. Long handles.

Material: Recycled PET (TNT R-PET) 70 g/m²

Size: 36 x 40 cm
