DOCK BUMPERS AND PACKERS**ULTRA HIGH MOLECULAR WEIGHT POLYETHYLENE
FACED DOCK BUMPERS****Part Number: UHMWPE.1810***MATERIAL: UHMWPE/SBR RUBBER COMPOUND***Weight: 13.5Kg**

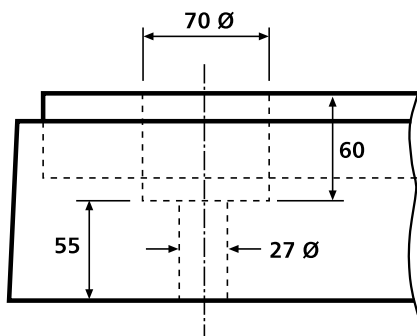

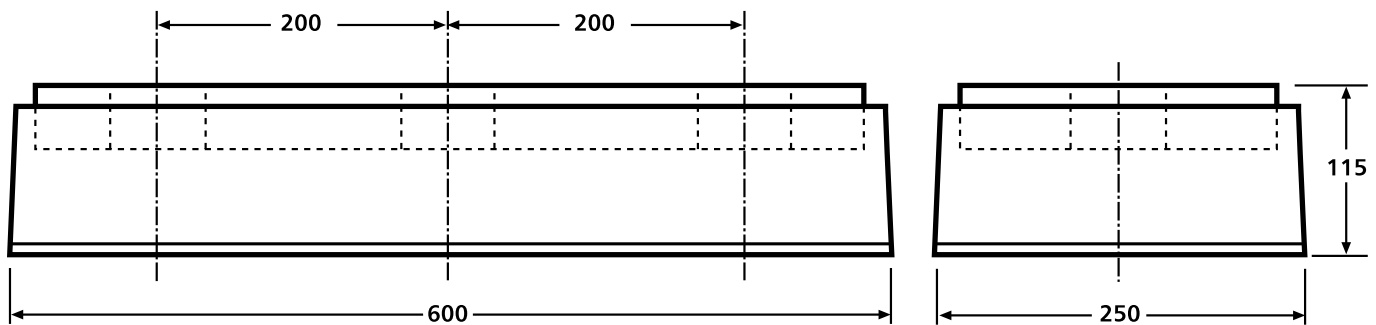

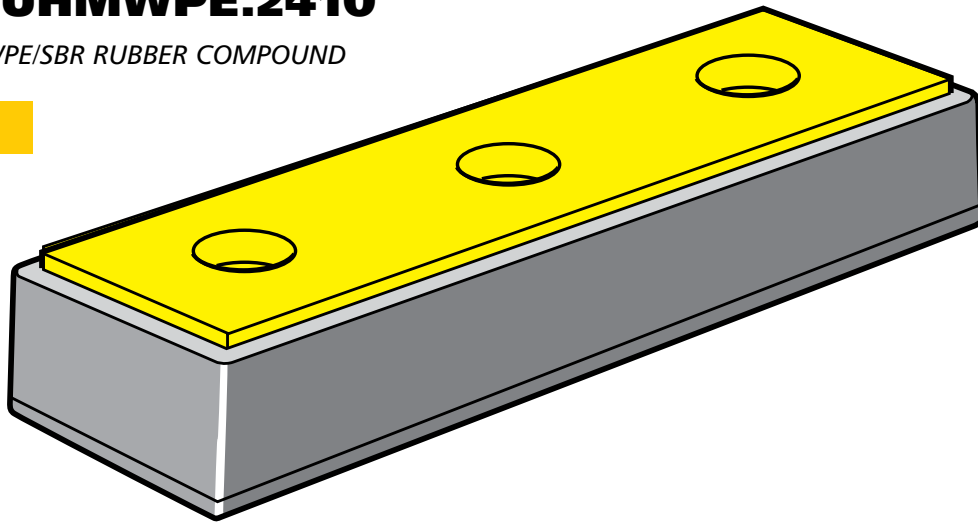

Tough High Molecular weight PE front to withstand daily punishment.

High visibility to help drivers align trailers more accurately.

Rubber backing to allow compression and save direct load onto loading bay.

Easy to fit onto existing fixtures - same hole centres as current industry standard 450mm bumpers

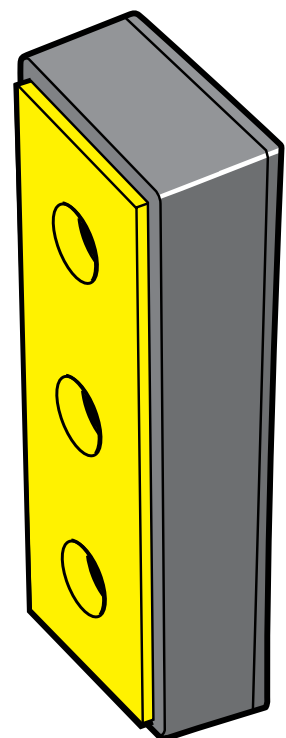

DOCK BUMPERS AND PACKERS**ULTRA HIGH MOLECULAR WEIGHT POLYETHYLENE
FACED DOCK BUMPERS****Part Number: UHMWPE.2410****MATERIAL: UHMWPE/SBR RUBBER COMPOUND****Weight: 17.5Kg**

Tough High Molecular weight PE front to withstand daily punishment.

High visibility to help drivers align trailers more accurately.

Rubber backing to allow compression and save direct load onto loading bay, or dockside as see below.

MODULAR COLOURED COVERS FOR CIRCULAR BOLLARD CORES

MATERIAL: DURABLE AND FULLY RECYCLABLE POLYETHEYLENE

BollardSAFE modular coloured covers are a unique solution to improving your facilities appearance and increasing brand presence. The modular coloured covers are an off-the-shelf alternative to expensive powder coating or repeat painting. Rusty, chipped and unsightly bollards can be given a new lease of life within minutes!

The modularity of the system enables you to customise rings of colour and are fitted unseen with any other bollard protection product. The plastic covers eradicate the expensive preparation and painting process and will also protect vehicles from glancing impact damage.

FEATURES:

- Quickly improve the appearance and presence of your building;
- Labour cost savings;
- Quick installation compared with painting rings of colour;
- No surface preparation of existing cores;
- Protects the steel core from the adverse effects of weather;
- Multiple colour combinations available - surface fixed or potted;
- Security fixed to the steel core;
- Recess in the cap for the addition of reflective tape;
- Manufactured from durable and 100% fully recyclable Polythene.
- **Suitable for surface, fixed or potted cores**

The BollardSAFE product range will suit new installations and retro-fit programs and can be fitted in minutes. The covers are self aligning to the bollard core and can cater for any height of bollard. The bollard covers can be further enhanced with the addition of

50mm reflective tape applied to the cap. A recess has been specifically designed to cater for this to ensure consistent alignment and to maintain clean aesthetic lines.

Refresh and enhance your property!! A sample of colour combinations.

SITE SAFETY AND TRAFFIC CONTROL

APPLICATIONS:

- Black and Yellow 'hazard' stripes;
- Red and White/Black/Yellow for 'awareness';
- Green and White to highlight 'emergency exit' routes;
- New and old bollard cores;
- Car parks - Company branded colours;
- Service yards - to stop minor impacts causing the core to rust;
- Warehouse doorways - increase visibility;
- Internal and external rack end protection;
- Property entrances.

Part Number: **EQWELLI BOOT**

MATERIAL: HEAVY DUTY TREATED CANVAS & REINFORCED FLEXIBLE PVC

Weight: 300g per Boot

The all weather turn-out boot made from heavy duty treated canvas with a reinforced flexible PVC base.

Available in three sizes Large, Medium & Small - Special sizes can be made to order.

Many thanks for the **EQWELLI BOOT**. It is doing a good job of keeping Capten's foot clean & dry, & enabling him to be put out each day to graze & exercise. In fact he is feeling so much better that he canters about freely!

The **EQWELLI BOOT** can be done up very securely & is so safe. Thank you for full instructions & help with correct fitting.

I was in despair as to how to keep the mud & muck out of his damaged hoof after veterinary treatment & poulticing.

Here is a photo of Capten, 6th day of wearing the **EQWELLI BOOT** (I remove the boot, change the dressing when I put him in at night). Thank you, again for all your help.
