Heavy Duty Impact Wrench Adaptor

- Engineered for heavy duty applications
- Impact hardened manganese phosphate adaptor
- 1/2" HD adaptor has full-forward release that reduces the risk of tool loosening during use

Code: 111120-012A

- Engineered for heavy duty applications
- 3/4" adaptor has pull back release
- Developed to work with latest generation of high torque power impact wrenches capable of generating above 1,000Nm of torque

Code: 111120-034A

IMPACT RATED

Rapid-Lock 1/2" Impact Wrench Adaptor

Rated to 650nm

Supplied with retention pin & ring

- Rapid-Lock single handed loading
- Improved quick release collar prevents accidental tool release caused by vibrations or contact with the work-piece
- Knurled collar provides ultimate grip in greasy or damp conditions
- High quality, heavy duty steel components
- Increased strength for withstanding the drive forces from the latest generation of high torque 1/2" impact wrenches
- Converts standard 1/2" impact wrenches for use with VersaDrive

Code: 111130-012A

ROTARY RATED

Rapid-Lock Mag-Based Drill Adaptor

- Rapid-Lock single handed loading
- Improved quick release collar prevents accidental tool release caused by vibrations or contact with the work-piece
- Fits all standard 19.05 mm (3/4") mag-based drill arbors

Code: 111035-01

VERSADRIVE

IMPACT RATED

ROTARY RATED

Mag-Based Drill Adaptor

- 3 x stainless steel M8 doghead grub screws supplied per adaptor
- Fits into any standard 19.05mm (3/4") mag-based drill arbor

Code: 111030-0001*

IMPACT RATED

Rapid-Lock 1/4" Impact Driver Adaptor

- Rapid-Lock single handed loading
- Improved quick release collar prevents accidental tool release caused by vibrations or contact with the work-piece
- Knurled collar provides ultimate grip in greasy or damp conditions

- High quality, heavy duty steel components
- Increased strength for withstanding the drive forces from the latest generation of high torque 1/4" hex impact drivers
- Converts standard 1/4" impact drivers for use with VersaDrive

RECOMMENDED FOR UP TO 10.0mm DIAMETER

Code: 111027-014A

IMPACT RATED

ROTARY RATED

Rapid-Lock SDS Plus Adaptor

- Rapid-Lock single handed loading
- Improved quick release collar prevents accidental tool release caused by vibrations or contact with the work-piece
- Knurled collar provides ultimate grip in greasy or damp conditions
- High quality, heavy duty steel components
- Converts all standard SDS Plus rotary hammer drills for use with VersaDrive system (in rotary mode)

USE IN ROTARY MODE ONLY

Clutched Tap Adaptor

Versatile blind hole tapping

The VersaDrive clutched tap collet system is a unique method of effectively threading blind holes.

All collets work with the full range of VersaDrive taps. When the tap reaches the bottom of the hole, the clutch system will engage and stop the tap from breaking. The tap is then reversed out of the completed hole.

This system fits a 19.05mm ($\frac{3}{4}$ ") mag-based drill arbor, or can be adapted for use with a $\frac{1}{2}$ " or $\frac{3}{4}$ " impact wrench.

- Quick change system accepts all VersaDrive taps
- Collets are pre-set to the appropriate clutch settings
- Further clutch adjustment options available
- For blind hole tapping with VersaDrive spiral flute taps
- For use with variable speed, reversible mag-based drills, pedestal drills or impact wrenches

40mm MAX. MATERIAL THICKNESS

VersaDrive TurboTip® Drill Bits are stepped tip bits that drill at twice the speed of standard bits without the need for pilot drilling while cutting a perfectly round hole.

Turbo-charge your drilling performance by using this revolutionary tool with an impact wrench or impact driver. Double-hardened and titanium coated for faster drilling and reduced wear.

VersaDrive TurboTip® Drill Bits have a patented non-slip, hex shank suitable for use in any standard 1/2" drill chuck for cordless or corded drills or used with a VersaDrive Rapid-Lock adaptor for use in a wide range of power tools such as magnetic drills.

- Specially hardened for impact wrench use
- 50% faster drilling with 30% less pressure
- Fully impact rated on structural steel
- Incredible finished hole quality
- Instant drill start with no slipping
- No 'snatch' when drill bit breaks through
- Fantastic tool life
- Titanium nitride coating reduces heat & increases lubricity for extended life
- High strength, non-slip shank design

11mm NON-SLIP SHANK

MAX. MATERIAL THICKNESS 12mm

Alpha VersaDrive is designed to meet the demanding Australian on-site industrial requirements, and remote location hole-making challenges i.e. heavy engineering, mining, plant maintenance, construction, rail, heavy industrial and steel fabrication.

Utilise the convenience and power of an impact wrench. Provides fast, efficient performance while being safer to use with minimal kickback.

VersaDrive ImpactaStep Cutters have a patented non-slip, hex shank suitable for use in any standard 1/2" drill chuck for cordless or corded drills or use with a VersaDrive Rapid-Lock adaptor for use in a wide range of power tools such as magnetic drills.

- 5 drill bits in one
- Enlarge holes in material up to 12mm thick
- Safety breakthrough collar to prevent injury & damage
- Fast, smooth drilling & reaming with minimal kickback
- Specially hardened for impact wrench use
- Titanium nitride coating reduces heat & increases lubricity for extended life

VersaDrive Reamers are the perfect hole alignment and enlarging tools for metalworkers and steel erectors for keeping the job moving when a hole is misaligned or the incorrect size for the fixing.

Featuring a specially designed 6-flute cutting geometry and Titanium coating, VersaDrive Reamers are fully impact-rated and perform fastest when used with an impact wrench providing ultimate cutting performance with virtually no power tool kickback.

VersaDrive Reamers have a patented non-slip, hex shank suitable for use in any standard 1/2" drill chuck for cordless or corded drills or used with a VersaDrive Rapid-Lock adaptor for use in a wide range of power tools such as magnetic drills.

- Specially hardened for impact wrench use
- Precision 6-flute design for smooth cutting
- Safer reaming with minimal kickback
- High grade tool steel for high accuracy & long life
- Titanium nitride coating reduces heat & increases lubricity for extended life
- Use on impact or rotary
- High strength, non-slip shank design

FAST PERFORMANCE

LONG LIFE

To maximise tool life do not attempt to increase the existing hole diameter beyond 2-3mm. If a larger, finished hole size is required, then the next size reamer should be used to 'step up' until the finished hole diameter is reached.

VersaDrive ImpactaTaps® are the first and only range of taps that are suitable to be driven by impact wrenches and impact drivers, providing at least 15x faster performance than tapping by hand.

A specially designed twin-lead, cutting geometry - the dual hardening process with Titanium coating provides a fantastic solution for tapping holes in steel.

VersaDrive ImpactaTaps® have a patented non-slip, hex shank suitable for use in any standard 1/2" drill chuck for cordless or corded drills (up to M10) or used with a VersaDrive Rapid-Lock adaptor for use in a wide range of power tools such as magnetic drills. They can even be used by hand in a socket wrench.

- Specially hardened for impact wrench use
- Precision ground for high accuracy to create the perfect tapped hole
- Safer tapping with minimal kickback
- High grade tool steel for high performance & long life
- Titanium nitride coating reduces heat & increases lubricity for extended life
- High strength, non-slip shank design

LONG LIFE

MAG BASED DRILL	PEDESTAL DRILL

VersaDrive Combi Drill Taps are a time-saving solution for pilot drilling and tapping in one easy operation. The Titanium coating provides wear resistance and faster-cutting performance.

VersaDrive Combi Drill Taps have a patented non-slip, hex shank suitable for use in any standard 1/2" drill chuck for cordless or corded drills or used with a VersaDrive Rapid-Lock adaptor for use in a wide range of power tools such as magnetic drills.

Recommended for use with impact drivers for high drilling and tapping productivity.

- Specially hardened for impact wrench use
- Drill & tap in one easy operation
- Safer tapping with minimal kickback
- Ground flute twist drill & spiral tap creates the perfect tapped hole
- High grade tool steel for high accuracy & long life
- Titanium nitride coating reduces heat & increases lubricity for extended life
- High strength, non-slip shank design

Heavy Duty ImpactaTaps® Drill Taps

ROTARY RATED

Drill & Tap in one
easy operation with

**RIGID MACHINE
TOOLS**

IDEAL FOR

FAST PERFORMANCE

LONG LIFE

VersaDrive Heavy Duty ImpactaTaps® Drill Taps are an industrial metalwork or fabrication tool for drilling and tapping heavy steel in one easy operation.

Primarily they are designed to be used with a reversible magnet drill, although they can also be adapted for use with an impact wrench to enlarge and tap existing holes.

With a drill point optimised for use in fixed drilling machines like magnetic drills or pillar drills, these are not recommended for use in a cordless drill. Where they are used with an impact wrench to enlarge and tap holes, pilot drilling is recommended with a separate drill bit.

- Specially hardened for impact wrench use
- Drill point optimised for use in fixed drilling machines including mag-based drills & pedestal drills
- Unique dual-point starting angle for easy alignment & fast cut
- Fast tapping with minimal kick-back
- Straight flute chipbreaker action for automatic chip clearance when impact tapping (check application guide)
- High-grade tool steel for high accuracy & long life
- Titanium nitride coating reduces heat & increases lubricity for extended life
- High strength, non-slip shank design

**ULTIMATE
PRECISION**

for Drilled & Countersunk Holes

IDEAL FOR

FAST PERFORMANCE

LONG LIFE

Combination DrillSinks

The VersaDrive Combination DrillSink is an innovative combined drilling and countersinking tool to save metalworkers time and increase hole accuracy by drilling and then countersinking, fixing holes in one operation.

This combination tool provides perfect countersinking accuracy every time by locating the drilled hole in perfect alignment to the countersink. This helps prevent tool chatter and blunting, commonly found with standard countersinks.

VersaDrive Combination DrillSinks have a patented non-slip, hex shank suitable for use in any standard 1/2" drill chuck for cordless or corded drills or used with a VersaDrive Rapid-Lock adaptor for use in a wide range of power tools such as magnetic drills.

- Drill & countersink in one easy operation
- Concentricity creates the perfect countersink & leaves no sharp edges
- Unique combination prevents chattering
- Precision ground flutes for high accuracy & long life
- High-grade tool steel
- Titanium nitride coating reduces heat & increases lubricity for extended life
- High strength, non-slip shank design

3 Flute Countersinks 90°

The VersaDrive Countersink is a premium quality countersink with fully ground flutes and Titanium coating to help reduce wear and blunting.

VersaDrive Countersinks have a patented non-slip, hex shank suitable for use in any standard 1/2" drill chuck for cordless or corded drills or used with a VersaDrive Rapid-Lock adaptor for use in a wide range of power tools such as magnetic drills.

Utilise the convenience and power of an impact wrench to quickly deburr and countersink holes up to 16.5mm with minimal torque kickback against the operator.

- Specially hardened for impact wrench use up to $\varnothing 16.5\text{mm}$
- Safer use with minimal kickback
- 90° point angle for countersunk bolt heads
- High-grade tool steel for high accuracy & long life
- Titanium nitride coating reduces heat & increases lubricity for extended life
- High strength, non-slip shank design

ROTARY RATED

TCT Hole Cutters

10x
LIFE

than standard holesaws

IDEAL FOR

FAST PERFORMANCE

LONG LIFE

11mm
NON-SLIP
SHANK

VersaDrive TCT Hole Cutters are a high performance solution for cutting larger diameter holes quickly and effectively.

These are rapidly becoming the go-to alternative solution for fabricators and steel erectors needing to drill through heavy steel in locations and on projects where a rotary drill is more convenient and possibly safer than a magnetic drill.

VersaDrive TCT Hole Cutters have a patented non-slip, hex shank suitable for use in any standard 1/2" drill chuck for cordless or corded drills or used with a VersaDrive Rapid-Lock adaptor for use in a wide range of power tools such as magnetic drills.

- Massive 70mm reach with 55mm depth of cut
- Premium grade Sandvik tungsten carbide teeth for the highest performance
- Perfect for drilling in remote locations
- Ideal for use with cordless drills, drill presses & mag-based drills
- One piece design includes arbor & (replaceable) pilot drill / pin
- Can be combined with a MultiSink® to broach & countersink in one operation (see MultiSink® Combination Tools pg 44)
- Triple cut carbide teeth
- High strength, non-slip shank design
- Spring loaded pilot drill: centres & stabilises cutter during drilling & ejects metal slug upon completion

than standard holesaws

11mm
NON-SLIP
SHANK

IDEAL FOR

Extra Long reach version of the popular VersaDrive Hole Cutter.

Ideal for applications where a metal plate is encountered amongst wood joists or where both sides of a steel beam require drilling.

These are rapidly becoming the go-to solution for fabricators and steel erectors needing to drill through heavy steel in locations and on projects where a rotary drill is more convenient and safe than a magnetic drill.

- Massive 120mm reach with 100mm depth of cut
- Premium quality tungsten carbide teeth for the highest performance
- Perfect for drilling box section with inaccessible sides
- Ideal for use with cordless drills, drill presses & mag-based drills
- One piece design includes arbor & (replaceable) pilot drill / pin
- Can be combined with a MultiSink to broach & countersink in one operation
- Triple cut carbide teeth
- High strength, non-slip shank design
- Spring loaded pilot drill: centres & stabilises cutter during drilling & ejects metal slug upon completion

MultiSink® Combination Countersink Tools

ROTARY RATED

For countersinking bolt holes from 16 - 26mm diameter. Use MultiSink® with variable speed magnet drill. The speed must be reduced when countersinking.

LONG LIFE

MAG BASED DRILL

The MultiSink® is a worldwide unique new Combination Countersink Tool designed and developed for use with magnetic drills.

The tool is designed to combine with the VersaDrive product range to broach and countersink, drill and countersink, tap and countersink or even drill, tap and countersink in one operation - providing huge time-saving benefits.

The MultiSink® is available in HSS and TCT (Tungsten Carbide Tipped) versions. The HSS MultiSink® features a Titanium nitride coating which reduces heat and increases lubricity for extended life whilst the TCT version is specifically designed for countersinking Inox and the hardest structural steels.

- Innovative combination countersinking tool
- Save time completing countersunk holes
- Broach & countersink in one operation
- Operations involving tapping require a magnet drill with variable speed & reverse features
- For pre-drilled holes, the MultiSink® should always be used with a pilot to avoid damage
- When used to drill or broach & countersink or for multiple operations e.g. drill/tap/countersink, it is important to use the correct RPM for each separate operation
- Drill & countersink in one operation
- Tap & countersink in one operation
- Drill, tap & countersink in one operation
