MAHORABA

Creating the most lovable place for those we encounter is the theme of our company. In our lives, we all need a place where our hearts can rest. We define this place as the space where we connect with our family, friends, lovers, or those we cherish more intimately. From our perspective as furniture makers, we can also portray this place in various forms: the chair beneath the sun that a husband once cherished, a desk where one pursues dreams at night, a table awaiting an old friend, a bed that hears the sounds of breakfast. Furniture like this is designed with a mindset that emanates warmth and floral charm.

By the way, when we, the Japanese, discuss such places, there is an analogy we consistently invoke: Mahoraba. This term, written as 真秀等場 in Kanji, appears in a poem penned by Yamato Takeru no Mikoto, a mythical hero of Japan. In this verse, he eloquently portrays the profound sentiments of the Japanese people, stating, “Yamato wa kuni no Mahoraba tatanazuku aogaki yamakomoneru wa shiuruhashi,” signifying a place of true excellence. The suffix “ra” indicates directional pronouns, such as “there” and “here.”

Now, the challenges of our organization, AREA, are expanding worldwide. Amidst this, we have turned our thoughts to the word “Mahoraba,” the main theme for this year, as it embodies the essence of the Japanese heart. Our aim is to share the roots of Japanese culture with people around the world through furniture. Additionally, we hope that our associates will act as anchors in their respective countries. Please anticipate the artworks and events presented by AREA this year, all crafted under the theme of “Mahoraba.”

MELT

DAIKON

MEIJI

table SLAB

The legs attached to a wooden tabletop, a masterpiece of natural art, resembles frames that hold paintings. Whether simple or complex, everything should be in 'harmony' with the tabletop.

MELT	Taking after a melted dango skewer, this piece certainly evokes a more traditional Japanese imagery rather than a Western one.
DAIKON	Named "daikon legs" for its stable appearance, the legs bear a resemblance to the sturdy shape of a daikon radish.
MEIJI	The table legs, normally featuring carved designs, are elevated with a touch of Taisho Art Deco style.
UROKO	The table legs, normally featuring carved designs, are elevated with a touch of Scandinavian Deco style.
SHIKAKU	Simple square legs. Perfect choice for those who would like their tabletop to stand out.
MARU	Simple straight round legs, yet imbued with a mysterious charm that subtly reveals itself over time.
KONOJI	Angles and curves. A harmonious blend of sharpness and softness. This refined balance of simplicity is what makes it so cherished.

table SLAB HASHIRAMA

A table made from large trees that have lived, staring at the world, far longer than any person alive.
The lines of grain that have endured so many long years of wind and snow are dramatic, and almost defy human understanding.
The legs made of rectangular boards and thick round rods further this world view.

table STONE AGE

An ambitious creation in which two slabs of marble or granite are combined for a symmetrically grained table.
The grains are not unlike paintings; no two stones are alike in these geological canvases.
Lifelong furnishings, at its best.

WOOD DECK

AREA proposes balconies that use solid hardwood from a variety of decking materials chosen for their high durability and attractive aging process.

We mill the wood with a straight grain to reduce warping and increase durability. Options include Selangan Batu known for its excellent cost performance Afzelia which has a smooth texture and is uniquely suitable for barefoot walking and Ipe which is renowned as the epitome of luxury wood decking. These materials are selected according to the usage conditions and your preferences.

KITCHEN

椿

"Tsubaki"

We offer a trinity of materials, craftsmanship, and design for lifelong furnishings and fixtures. AREA uses various materials and finishes for original items and fully custom-made wall storage systems to create high-quality, luxurious living spaces. Just like our kitchens, realized with skills and experiences cultivated as an interior hallmark, AREA's new styles can further enrich your life.

LDK style

This sideboard fearlessly unites the living and dining (LD) rooms.

Freed from the preconceived ideas between living, dining, and kitchen (LDK) spaces, this setup simplifies and takes full advantage of a singular space. Lounge on the couch, cook in the kitchen, dine at the table. Our system adds more freedom and comfort to these everyday realities.

Materials and design

From façades of solid wood from broad-leaved trees carved with the irregular rhythms of nature, to ceramic counters with alluring mineral strength, we combine high durability, attractive design, and high-quality materials. Corten steels add subtle depth.

Function and design

The alluring ceramic sink is fully integrated with the countertop as if sculpted into form. This multi-functional sink is flanked by a drying space and a sliding slab, responding flexibly to cooking and cleanup needs for a continually pristine look. Drawers are integrated into the ceramic and solid wood front panels, unifying design without compromising organizational functionality.

Kitchen and furniture

Kitchen TSUBAKI has been designed to beautifully adapt to various spaces and arrangements. For a basic style, choose between a fearlessly stately 190mm Multifunctional Sink/Counter and a more lightweight 12mm thick countertop. Storage size and layout may be changed freely upon request. Extend the lower countertop from the kitchen to the living room to be used as a TV stand, expand it into a desk or cabinet, or otherwise incorporate this kitchen system into furniture to create a unified sense of space.

Equipment and faucets

Case by case, we select and present equipment that blends into your high-quality and practical kitchen. The range hood's clean, square appearance takes advantage of its sturdy material and is coordinated with brushed dark platinum brass.

A harmony of precision and purpose.

The DORNBRACHT faucet delivers effortless, single-lever control and dual spray modes for exact flow and temperature.

Extending this precision, the GAGGENAU cooktop orchestrates modular heat zones and intuitive control—performance refined to its purest form.

With a full-size door, this dishwasher is built-in so the control panel is not visible from the front and does not interrupt the overall appearance of the kitchen.

Material selection

With Kitchen TSUBAKI, you are free to select from various materials and colors to suit your space and aesthetic.

We provide only carefully selected materials of great beauty and high performance, fit for elegant spaces.

DESIGNER &
INFORMATION

Go Noda

Executive designer of the brand

Born in Japan in 1967, Go Noda began his career as a furniture designer, driven by a passion for materials, craftsmanship, and cultural narrative.

In 2003, he founded the interior brand AREA, taking the lead as its executive designer.

His vision and design philosophy quickly gained recognition in Japan and abroad. To expand globally, AREA opened its first international location in Saint-Germain-des-Prés, Paris, in 2019, followed by a New York location in 2023—marking AREA as the first Japanese furniture brand to establish a truly global presence.

Among Noda's most acclaimed creations are sideboard Hashirama and chair Ginzan.

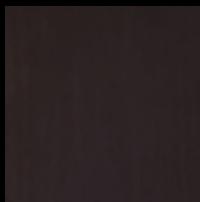

His unique method of reinterpreting Japanese culture through deep historical research and translating it into modern design has earned him a loyal following around the world.
