

## **COMPLETE F NUTRITION**

## mycoACT (MYCOTOXIN BINDER)

## **BENEFITS:**

Toxin Neutralization: MycoACT effectively binds and neutralizes harmful mycotoxins in feed, preventing their absorption and reducing their negative impact on animal health.

Organ Protection: By mitigating mycotoxin damage, MycoACT helps safeguard vital organs, such as the liver and kidney minimizing the risk of

long-term harm and supporting overall organ health.

Improved Digestive Health: MycoACT supports optimal digestive function by reducing gut inflammation and enhancing nutrient absorption, leading to better overall digestive health and cleansing the digestive system of toxins, bacteria, and fungi.

Enhanced Immune Response: MycoACT helps. maintain a strong immune system by counteracting the immunosuppressive effects of mycotoxins. reducing the risk of diseases and promoting better overall health.

Increased Feed Efficiency: MycoACT aids in maximizing feed utilization by minimizing the negative impact of mycotoxins on nutrient absorption.

improving feed efficiency and reducing feed costs

## Dosage:

Cattle: 50-100 gm/day Camel: 50-100 gm/day Sheep/Goat: 5-8 gm/day Poultry: 1-2 kg/ton of feed
