Harvest 2025

The last grapes

May 2025

**Theuniskraal

April 2025 gave us a bit of everything, At least as far as weather related events were concerned.

We received rain, beautifully mild Autumn days with cooler temperatures and to remind

us that she was not done yet, Summer gave us the last of her heat.

“The only constant in life is change.” This was certainly true on Theuniskraal.

Our team of skilled harvesters made sure that with the help of the mechanical harvester no grapes were left on the vine.

The last grapes harvested were the Cabernet variants that will soon become our award-winning red wines.

As usual, on Theuniskraal there is never only one activity taking place and we have to keep an eye on a number of different crops that are ripening at the same time.

The olives have ripened and also required the attention of our team to ensure we produce the finest olives possible.

April also saw us planting a new orchard, keeping us busy, with soil preparation and ensuring

As with the wines all we can do is wait and see how bountiful the harvest from our new orchards will be.

The younger members of our team gain invaluable skills and insights about the tree planting process and the early stage orchard care from the older more experienced hands.

that the new fruit trees were properly prepared for transfer into the new orchards.

This provides us with an opportunity to teach some of the younger staff members the secrets of early stage fruit cultivation.
