

Office Plants

design office 2023

Welcome to the future of replica plant technology

Bullock and Bosson's artificial planting range represents the leading edge of replica plant technology.

Almost impossible to distinguish from real plants, the only way to be sure is to touch them.

About our replica plants

Bullock and Bosson's planting range can brighten up any interior. Suitable for use in the shade, or high heat areas where living plants are not appropriate, there's no reason why you can't add greenery to your space.

Unlike many plants on the market, our range is ready to display straight from the box in a wide selection of styles and types that will suit your space and your budget. What's more, our plants mean no construction or finishing is required and they are simple to keep clean and look after.

Why buy our replica plants?

Realistic

We only use the highest quality and realistic foliage and stems.

Continuous construction

Featuring fully bonded components from base to tip, our plants do away with the unreliable joints many competitor ranges feature.

Ready to go out of the box

Open the box, remove the packaging and your new plant is ready to display - no need to assemble components or even dress the plant.

2 YEAR guarantee

We are confident in the resilience of our plants. However, in the unlikely event of any replica plant display deteriorating within two years due to faulty workmanship, we will replace it for free.*

** Within two years, general wear and tear is not covered with the guarantee.*
