DALTRONX

BREAKING NEW GROUND

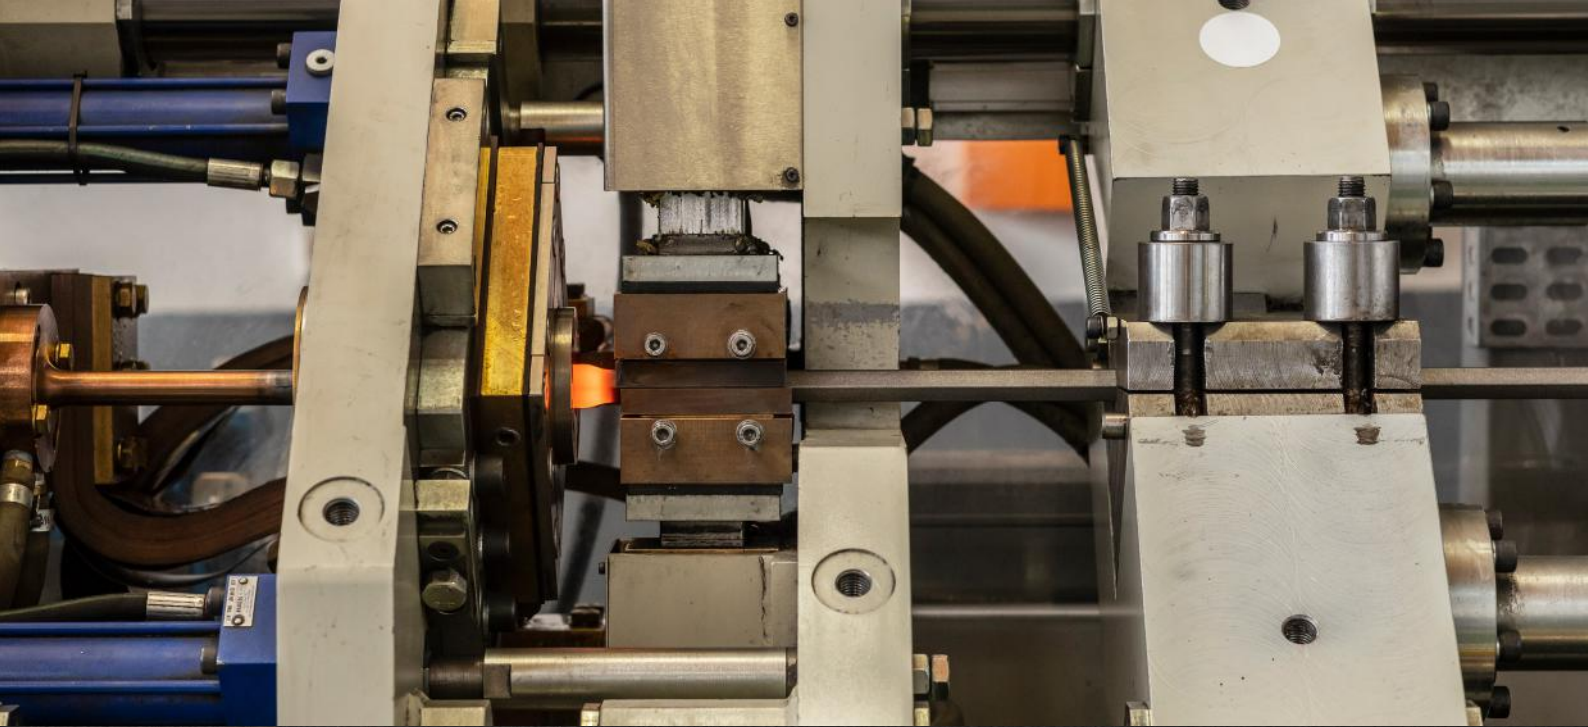

INTRODUCTION

DaltronX is a leading global manufacturing company that specialises in the production of carbide conical picks, drill bits, drill steels, drill tubes, and spinning adaptors for the underground mining sector.

Our comprehensive supply chain and strong focus on innovation ensure that our products deliver superior performance, durability, and cost-effectiveness. In the most demanding conditions, our drill steels, tubes, and spinning adaptors are the preferred choice, designed for efficient drilling operations and extended tool life.

Our key capabilities include a patented electric upsetting process and a unique 'bulb/washer' design. This innovative approach enables our 19mm Hex Drill Steel's ferrule to withstand over 100% more force compared to local competitors. This patent is a testament to our commitment to innovation and quality, pushing the boundaries of what's possible in the drilling industry.

OUR KEY CAPABILITIES INCLUDE A PATENTED ELECTRIC UPSETTING PROCESS AND 'BULB/WASHER' DESIGN, ENABLING OUR 19MM HEX DRILL STEEL'S FERRULE TO WITHSTAND OVER 100% MORE FORCE COMPARED TO LOCAL COMPETITORS.

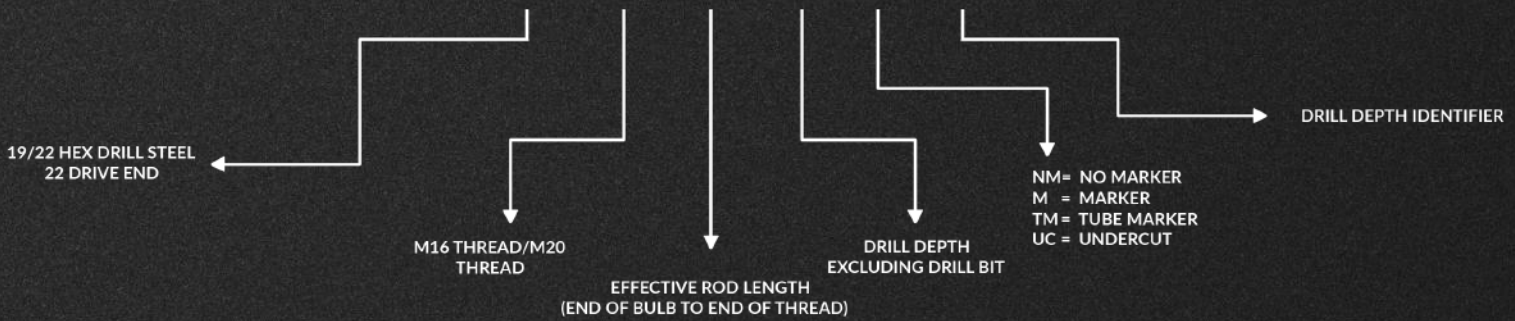

ENGINEERED TO LAST.
DESIGNED TO PERFORM.
TESTED FOR PERFECTION.
EXPERIENCE THE DX DIFFERENCE.
