WEWO Palletmover

Collects & Delivers Pallets

Easy Communication

Safety

Various Models

Customization Possibilities

The WEWO Palletmover AGV is an advanced solution for seamless, automated transport of pallets and other goods with precision and speed. Its compact design ensures smooth maneuverability in confined spaces.

With a modular structure, it can be easily adapted to specific operational needs, optimizing efficiency in warehouse and production environments.

Performance Data

1.300 mm	1.300 kg	1,6 m/s
Max. Lifting Height	Max. Lifting Weight	Max. Speed

Dimensions

1.910 x 800 x 2.190 mm (L x W x H)

Specifications

Natural Navigation - Top	RAL7016, RAL1007
Navigation Method	Powder Coating
Closed Lift System	CE Standard
Lift System	Certification
Lithium-Ion	
Battery	

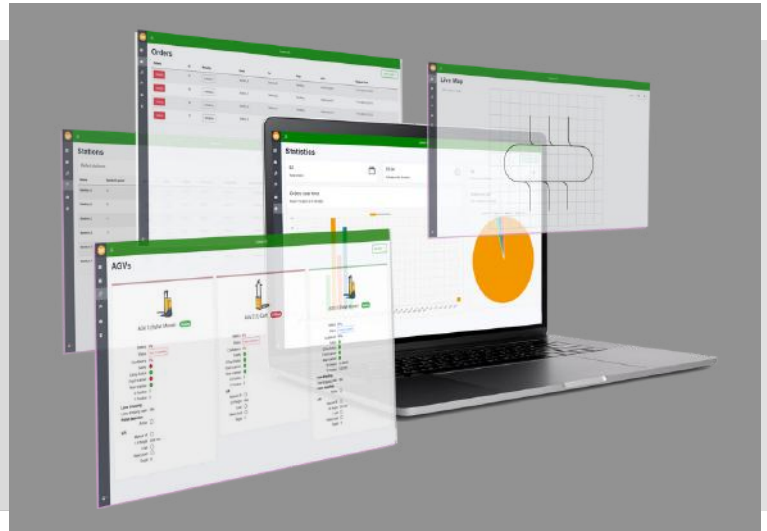

Specification

Details

-  Pallet 800 / 1.000 / 1.200 EUR format
-  Boxes Plastic / wood / metal
-  Palletboxes Plastic / wood / metal
-  Cart
-  Cages / Rollercages
-  Exeptions Carriers with closed bottom
-  Other types of carriers - inquiry to supplier
-  NB: The vehicle is not limited by plastic wrap on the pallet's foot

Fleetmanagement & WMS Application

The Fleet Management Software & MES provides all the essential tools to efficiently manage warehouse and production environments. It seamlessly controls multiple AGVs within the same space, optimizing workflow and minimizing disruption.

Task Management

Assign, monitor, and prioritize tasks effortlessly.

Alarm & Traffic Management

Prevent bottlenecks and ensure smooth operation.

Deadlock Prevention

Optimize vehicle paths for continuous flow.

System Integration

Connects seamlessly with MES, ERP, and other enterprise systems.

Comprehensive Product Tracking

Monitors product positions and data in real time.

Seamless Integration

Connects with production lines, machines, and delivery stations.

User Role Management

Ensures secure and efficient system access based on defined permissions.

Navigation Method

The Palletmover utilizes natural navigation with top-mounted laser scanning to ensure precise and reliable movement.

Equipped with a high-accuracy laser scanner, the system continuously maps the environment, detecting reflectors to determine the vehicle's exact position.

Key Advantages

Highly Accurate Positioning

Advanced laser scanning provides precise location tracking.

Long-Range Detection

The scanner covers a wide area, ensuring efficient navigation.

Reliable in Dynamic Environments

Detects across flexible objects.

Enhanced Stability

Dead reckoning technology further refines positioning for consistent movement.

Safety & Scanners

The AGVs are equipped with advanced safety systems designed to protect employees, infrastructure, and the robots themselves.

They comply with international standards such as **ISO 3691-4** and **EN1525**.

Energy Management

The AGVs feature automatic charging, eliminating the need for manual intervention. When the battery reaches a minimum level, the AGV completes its current task and automatically navigates to an available charging station.

With this intelligent charging system, the AGVs remain operational with minimal interruptions, ensuring maximum efficiency in warehouse and production environments.

Key Advantages

Seamless Integration

AGVs recharge without disrupting operations.

Automated Docking

The integrated power collector ensures precise contact with the charging station.

Programmable Charging Levels

Adjust battery thresholds to optimize uptime and efficiency.

Minimal Downtime

Once charged, the AGV automatically resumes its next task.
