

НОВО

in a nutshell

FICTOVC

means done

**We're a software
development team...
that delivers.**

A proven **long-term partner** of both global industry leaders and young creative startups, we're not only experts in software development... we're unwaveringly passionate about what we do!

How can we help you?

We specialize in providing top-notch “outsourced” dedicated software development teams, which can help you:

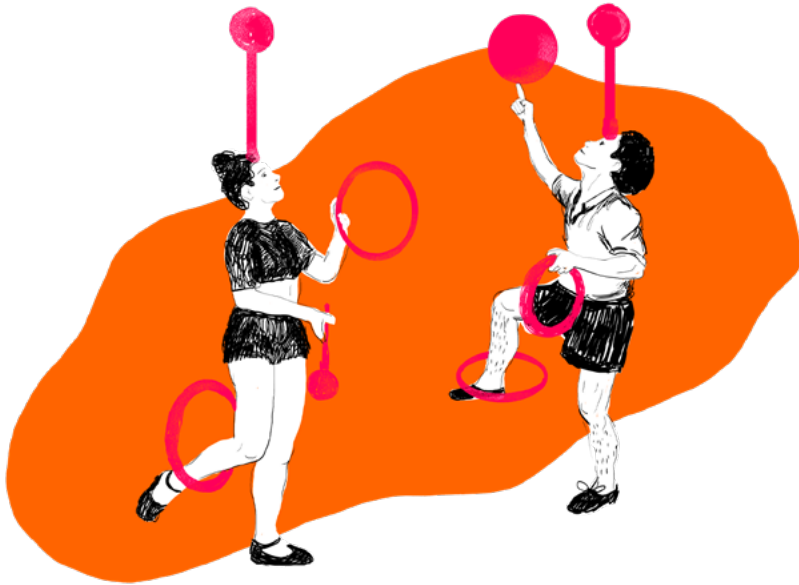

- ① Turn your idea into product.
- ② Extend the capacity of your development teams in the long run.
- ③ Overcome temporary peaks or cover immediate ramp-up needs.
- ④ Fill gaps in specific skills and know-how.

SERV

**Outsourced software
development that's
a real partnership,
from day one.**

VICES

Understanding, unity, transparency.
We deliver through an in-depth
understanding of your goals.

STARTUPS

Build and launch fast, without creating a mess you'll pay for later.

Come to us when:

- You need an MVP quickly
- You need help shaping scope and priorities
- Integrations are already required
- You want practical AI features
- You need senior engineers who lead and deliver

What you get:

- ✓ Clear scope and momentum
- ✓ Senior engineers who ship
- ✓ A foundation you can build on

ENTERPRISES

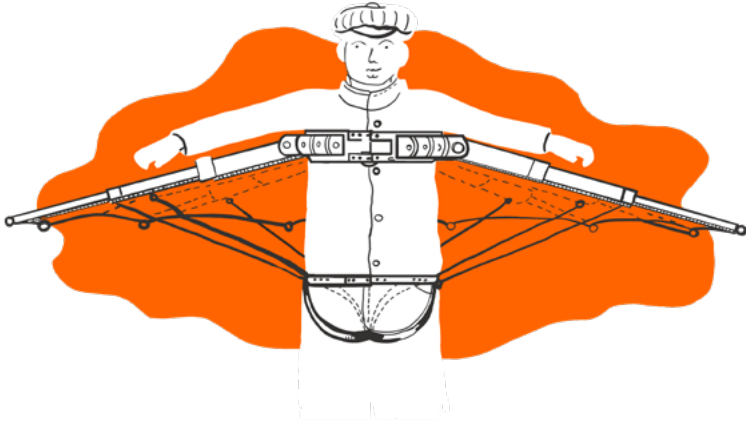

When reliability, security, and change control matter as much as speed.

Come to us when:

- Integrations sit across many teams and systems
- Legacy and new platforms need to coexist during migration
- You need automation that is auditable and secure
- Data flows are complex and business-critical
- You want AI in real operations, with governance in place

What you get:

- ✓ Integration architecture and delivery you can trust
- ✓ Automation that reduces risk & workload
- ✓ AI-ready systems built for scale & compliance

SCALEUPS

When shipping fast is the job, and your systems are starting to fight back.

Come to us when:

- You are scaling a product and the architecture is under pressure
- Manual workflows take up too much of your team's time
- You want AI features, but you need them to be reliable and measurable
- You need senior people who can plug in fast and own the outcomes

What you get:

- ✓ Clean, scalable product work
- ✓ Rock-solid integrations & automation
- ✓ Practical AI that supports the product

Our expertise

- **system integration**
- **custom development:
web, desktop, mobile**
- **AWS microservices**
- **automation**
- **MuleSoft Anypoint**
- **Oracle OIC**
- **Atlassian**
- **industrial networking**
- **API/ABI design**
- **electronics: ICs (integrated
circuits), μ Controllers**
- **PCB (printed circuit board) prototyping**
- **consulting**
- **graphic design**
- **product development**

Our methodology and tools

- **Agile:** SCRUM, Kanban, XP
- **Collaboration:** Jira, Confluence, BaseCamp, Trello, Azure DevOps
- **Source control:** Git, Bitbucket, SourceTree, Gitflow
- **Continuous delivery:** Bamboo, Jenkins
- **App monitoring:** Prometheus stack
- **Support:** Jira Service Desk

Our tech stack

- **AI integrations:**

Generative AI, LLMs, RAG solutions, OpenAI, Langchain, Unstructured

- **Web Applications:**

React, Angular, Vue.js, Ionic, Next.js, Progressive Web Apps, Server Side Rendering, Material UI, Angular Material, Ant Design, PatternFly, Bootstrap, HTML5, CSS, Webpack, GWT/GXT, Web Forms, Razor Pages

- **Desktop Applications:**

Hybrid HTML5 (Atom Electron + NodeJS, Java + HTML5), Java FX, OSX (Cocoa, ObjectiveC, Swift).NET (WinForms, WPF)

- **Mobile Applications:**

Native (iOS, Android), Cross Platform (Flutter, React Native, Progressive Web Apps)

- **Backend Solutions:**

REST (Spring / Micronaut Controllers, Jersey), Non-J2EE (Spring Boot, Micronaut), J2EE (MicroProfile, Paraya, Quarkus), Nest.js, Express.js, Jetty, Tomcat, Netty, Node.js

- **Mule Solutions:**
MuleESB, CloudHub, API Gateway, Custom connectors, API policies, RAML
- **Deployments:**
Configuration / Firmwares (Kubernetes, Terraform, Packer, Docker), Provisioning (Ansible, GitOps – Flux, ArgoCD), CI/CD (Bitbucket, Jenkins, Travis CI, CircleCI), AWS (EC2, API Gateway, Lambda, CloudFront, S3, DynamoDB), Others (OpenShift, LXC, LXD, Internet Of Things), Prometheus Stack (Prometheus, Alerting, Grafana)
- **Technologies:**
Languages (TypeScript, JavaScript, Java.NET), Relational Databases (PostgreSQL, MySQL, MS SQL, Oracle), NonSQL (MongoDB, DynamoDB, ElasticSearch), Messaging (ActiveMQ, RabbitMQ, HornetQ, ZMQ, MQTT, JMS, AMQP, Kafka)
- **Automation:**
Cloud automation, Industrial Computers and PLC-s, Industrial ethernet, Automation protocols (EtherNet/IP, EtherCAT, ControlNet, DeviceNet, Profibus, Modbus, DH-485), Digital Signing (HSM: Hardware Security Modules, RSA Cryptography), Device Protocols (ABI), Operator panels, I/O modules
- **Quality Assurance:**
Playwright, Cypress, Jasmine, Jest, Karma, Robot Framework

AI Integrations

We deliver cost-effective, top-notch results with AI-powered software development.

ENTERPRISE INTEGRATION PLATFORMS

MuleSoft, Boomi, SnapLogic, Oracle IDMC

MIDSIZE BUSINESS INTEGRATION PLATFORMS

Workato, Zapier, Make

INTEGRATION PLATFORMS

Microsoft Power Platform, Elastic.io, IFTT (If This Then That), Integromat

APPLICATION CREATION PLATFORMS

OutSystems, Oracle APEX (Application Express), Google Cloud's AppSheet, Mendix, Creatio, Appian, Bubble

IoT CREATION PLATFORMS

Thingier, Losant

Low-code / No-code development

We deliver cost-effective, top-notch results with AI-powered software development.
