The brand

Born in Les Genevez, Switzerland.

Proudly hand-assembled in our atelier in Switzerland, each Claude Bernard timepiece reflects the essence of Swiss-made precision — offered at an accessible price.

The Claude Bernard story

Past. Present. And an eye to the Future.

Les Genevez 1892

From goldsmiths to watchmakers — the birth of a craft

The story of Claude Bernard begins centuries before the brand itself.

In the 16th century, when John Calvin banned the wearing of jewelry in Geneva, local goldsmiths and craftsmen were forced to reinvent their trade. They turned their expertise in precious metals toward a new, more spiritual art — the measurement of time.

Seeking new livelihoods, many of these artisans left the city and settled in the Jura Mountains,

where long winters and patience shaped both character and craft. This is how

the peasant-watchmakers (“paysans-horlogers”) were born — farmers in summer, watchmakers in winter — laying the foundations of what would become Switzerland’s most admired industry.

A tribute to our roots

The name Claude Bernard was chosen as a nod to those early watchmaking pioneers — ordinary names, rooted in the region’s history, representing hard work, precision, and humility.

When the brand was founded in 1973 in Les Genevez, it embraced the same values that had built the Jura’s reputation: craftsmanship, perseverance, and authenticity.

From the very beginning, every Claude Bernard watch has been assembled by hand in our Swiss atelier, combining traditional savoir-faire with the reliability and accuracy demanded by modern life.

"At Claude Bernard, we honour traditional watchmaking values while creating contemporary, precise, and elegantly designed watches that reflect our vision of authentic and attainable Swiss luxury."

Made in Les Genevez — at the heart of Swiss watchmaking

Les Genevez, perched high in the Jura mountains, remains the home of our workshop.

Here, craftsmanship is not a slogan — it's a way of life. Every watch that bears the Claude Bernard name reflects the spirit of this place: a blend of precision, modesty, and mechanical beauty.

Our philosophy is simple — to craft watches that are both beautiful and attainable. Mechanical or quartz, each

piece is built to last, expressing Swiss reliability through pure lines, thoughtful proportions, and timeless elegance.

Today — timeless, authentic, accessible

Over fifty years later, Claude Bernard remains true to its roots.

We create refined, contemporary watches that capture the essence of Swiss design: clean, balanced, and effortlessly elegant.

Simple in mechanics yet rich in character, our watches

embody what the Jura stands for — authenticity over excess, and enduring value over fleeting trends.

At Claude Bernard, elegance is not about luxury — it's about integrity.

Our watches are made for those who appreciate genuine craftsmanship, honest design, and the quiet confidence of a Swiss-made timepiece.

Hand-assembled Swiss watches

A passion for mechanics is what makes Claude Bernard tick

“Each and every detail of each and every timepiece, whether technical or aesthetic is equally important.”

An Independent Spirit

As one of the few remaining independent Swiss watch brands, Claude Bernard continues to create timepieces assembled in our atelier in Les Genevez, in the heart of the Jura Mountains.

This independence allows us to remain true to our values — authenticity, precision, and the human touch behind every watch.

Craftsmanship with Purpose

Every Claude Bernard timepiece is crafted with precision and care, combining reliable movements with refined design and lasting comfort.

Here, there are no production lines — each watch is carefully assembled by skilled hands, ensuring that craftsmanship and attention to detail remain at the core of everything we do.

From elegant quartz pieces to automatic models with moon-phase complications, every creation reflects our dedication

to quality, balance, and enduring style.

The Essence of Simplicity

Our watches are born from a simple idea: to offer beautiful, precise, and contemporary Swiss-made timepieces that reflect genuine craftsmanship and accessible elegance.

It's this combination of tradition, clarity, and authenticity that defines Claude Bernard today.

The Claude Bernard Quality

Movements

All movements used by Claude Bernard are Swiss-made movements

Mechanical movement:

A mechanical movement undergoes several stresses in its life. To ensure it will remain functional and precise as long as possible, Claude Bernard simulates watch wearing in its own quality office for every single manual and self-winding mechanism.

Quartz

Quartz movements provide time measurement accurate to within a few seconds per year. Most of Claude Bernard watches are equipped with quartz movements.

Sapphire crystals

100% of Claude Bernard timepieces are fitted with a scratch-resistant crystal that has been cut from a polished slice of solid sapphire. Each has a triple-coated anti-reflective treatment on the internal side for better legibility.

Stainless Steel

The 316L stainless steel alloy used in Claude Bernard cases and bracelets has strong anti-magnetic properties and is optimized for toughness and corrosion resistance. It is also a good choice for consumers allergic to nickels.

Leather

All Claude Bernard leather straps are specially cut, stitched and padded by expert craftspeople.

Various ways of tanning provide different touch and feel for the straps made of cow or calf leather. It is always important to remember that colors and suppleness of leather are subject to change with time and exposure to external factors. Daily showers or swims are not recommended. If your consumers live a very active lifestyle, especially one involving frequent exposure to salt water and heavy perspiration, we recommend a steel bracelet or rubber strap.

Rubber

Claude Bernard uses genuine high-grade rubber for its straps (a natural material and extremely comfortable). The rubber is silky finished and easy to maintain with the proper cleaning.

Mother-of-pearl

Resilient, and iridescent, mother-of-pearl is integrated in many Claude Bernard dial designs. It is produced inside the shells of certain mollusk shells. This is why each dial made of mother-of-pearl is unique.

Luminescence

This technology, branded under the name Super-Luminova, offers brightness in low-light conditions, thanks to a non-radioactive and non-toxic material like the tritium previously employed in the industry. Claude Bernard uses Super-Luminova for its highly functional attributes. It is applied on watch parts such as hands, numerals, bezel indices, etc.

Batteries

In compliance with global regulations and standards, Claude Bernard equips its quartz timepieces with mercury-free batteries. This is a positive step towards environmental sustainability with no effect on the watch precision and efficiency.

Open Heart

The Open Heart watches allow to view the beating heart of the watch through an opening on the dial and on the caseback and the mechanical movement can be admired.

Zirconia Stones

Claude Bernard stones are carefully selected and matched not just according to carat value but also to cut, color and clarity.

Conformity

Every component coming into our production facility in Les Genevez in the Swiss Jura is checked to ensure its dimensions, aesthetics, quality and interchangeability.

Visual and manual testing

In addition to our testing process, all timepieces are visually checked between each manufacturing step ensuring overall quality based on our own Claude Bernard standards. If a timepiece does not pass inspection, it is checked and repaired. It can only go back to the production phase if it has passed the quality check.

& more

1. Swiss Made

For a “Swiss-made” watch, at least 50% of its value has to be added within Switzerland. We go further than that. All our watches are produced at the world famous “Watch Valley” in the Jura Mountains, where our predecessors started to produce clocks over 400 years ago. All of our timepieces include a Swiss movement and are assembled and controlled by highly qualified craftsmen as well as state-of-art equipment. We take the “Swiss Made” label very serious. Moreover Claude Bernard offers outstanding value for money.

2. Accessible Luxury

Claude Bernard is one of the very few Swiss watch brands able to offer authentic Swiss Made timepieces at attractive prices.

Our motto is «Take a little less and you receive more.»

3. Hand-assembled

Claude Bernard watches are hand-assembled by qualified Swiss watchmakers. Each Claude Bernard watch is checked and controlled over a long period of time - by both human beings as well as special equipment to ensure optimal quality.

Making no compromises in terms of quality is a strict priority for Claude Bernard. The best quality standards are respected.

4. Design by Claude Bernard

We pay particular attention to the design at Claude Bernard. We like our watches to be mainly classical and traditional whilst remaining timeless. Every timepiece is created with a genuine passion for details. You will discover delicate guilloché decoration and refined printings on our dials, while our cases are entirely hand-polished for a luxurious, smooth feel and a remarkable shine.

SAPPHIRE CRYSTAL - WATER RESISTANT 3 ATM - 198867 - SERIAL NO. 768867
SWISS MADE - STAINLESS STEEL - CASE NO. 83014
26 TWENTY-SIX JEWELS SWISS MADE
claude bernard

Example:

80102 3 AIN

1st part:
The first 2 or 3 digits represent the Claude Bernard movement code.
The last 2 or 3 digits of this code are for internal use.

2nd part:
represents the material and coating of the case.

3rd part:
represents the color and design of the dial.

Movement	
80	please refer to the page 88

Case Material	
3	Stainless steel 316L
3C	Stainless steel 316L with leather strap
3CA	Stainless steel 316L with rubber strap
3M	Stainless steel 316L with steel bracelet
3P	Stainless steel 316L with stones
3PM	Stainless steel 316L with stones, with steel bracelet
37J	Yellow PVD coating
37JM	Yellow PVD coating, steel bracelet
37JP	Yellow PVD coating, with stones
37JPM	Yellow PVD coating, with stones, with steel bracelet
3NA	Stainless steel 316L, with NATO strap
37NCA	Black PVD coating and black bezel
37R	Pink PVD Coating
37RM	Pink PVD coating with steel bracelet
37RNA	Pink PVD coating with NATO strap
37NC	Black PVD coating with leather strap
37RC	Pink PVD coating with leather strap
37RNCA	Pink PVD coating, rubber strap
37RP	Pink PVD coating, stones
37RPM	Pink PVD coating, stones, with steel bracelet
357J	Stainless steel 316L with yellow PVD coating
357R	Stainless steel 316L with pink PVD coating
357RM	Stainless steel 316L with pink PVD coating and steel bracelet

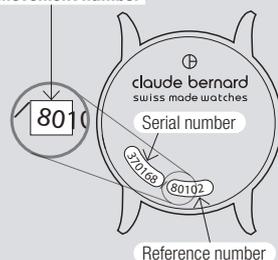

Dial Variation
