

# Redefine Your Fax Experience

SecureFax delivers HIPAA-compliant encryption for your businesses' important documents from any device.

## Effortless Faxing. Anytime, Anywhere.

Send and receive internet faxes with ease, using your computer, tablet, or smartphone. No hardware required.

## Fax Like It's the 21st Century

**Mobile  
Friendly**

**99.9%  
Delivery Rate**

**Multiple  
Recipients**

**Voice/Fax  
Detection**

**Network Fax Server  
(Optional)**

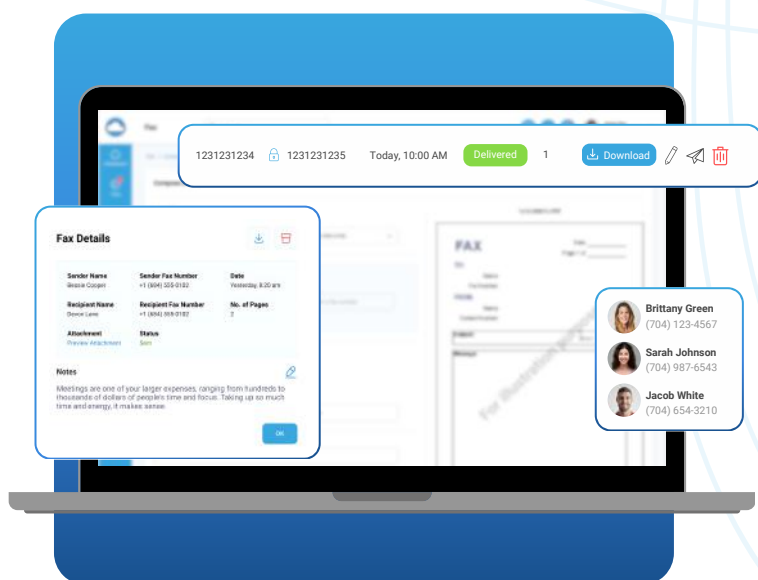

**Onsite Fax  
Devices Available**

## Fax-To-Email And Email-To-Fax

Have a dedicated phone number to send and receive faxes via email. An email notification will alert you whenever a new fax has been received. Tailor your security controls to thwart unwanted faxes and transmit faxes security via an encrypted TLS connection.

**A more efficient workflow is just a click away.**  
Send secure and reliable faxes with no downloads required.

Simplify your document management with OneCloud Connect's integrated SecureFax feature. Send and receive faxes directly within the app, keeping your sensitive information protected with advanced encryption. No more juggling multiple platforms—OneCloud Connect™ keeps your communications seamless and secure.
