How to take a great phone photo

Follow these quick tips before you snap & upload your entry

1. Clean the lens

A quick wipe with a soft cloth will remove smudges and make photos clearer.

2. Use natural light

Position your subject to take advantage of sunlight, or use light from a window. Avoid using flash, as it can create harsh shadows and blur.

3. Steady your phone

Use two hands and keep your elbows tucked in, or lean your phone on something solid.

4. Avoid using digital zoom

Move closer to your subject instead of pinching to zoom. Digital zoom crops and stretches the image, which degrades the quality.

5. Show the product/service clearly

Make sure it's in focus and easy to identify. Make sure the background isn't too distracting and won't take the focus away from your subject.

6. Happy Snapping! Upload as many photos as possible to increase your chances of winning!
