DESIGN & TECHNOLOGY

SCHOLARSHIP

Information for Applicants

Design and Technology scholars will display a genuine passion for spending time in the workshops, furthering their own interests, encouraging others and developing outstanding work. Creative thinking, experimentation and independent learning are an integral part of this subject. There are opportunities to create, innovate, design, make and evaluate a variety of well-crafted products. Scholarship students will have an interest in the design and development of products, using the most up-to-date technologies available here at RST, but they will also be aware of traditional manufacturing techniques and skills and how these can be used strategically.

RST boasts modern, spacious and very well-equipped workshops with a wide range of industrial grade manufacturing equipment ranging from traditional hand tools to the latest Computer Aided Manufacture (CAM) facilities.

Scholarships are reviewed annually.

We expect our scholars to:

- maintain a good minimum average diligence/effort grades in all subjects;
- receive consistently good attainment and diligence/effort grades in design & technology;
- uphold the values of RST and be an excellent role model to other students in all aspects of school life, but particularly in their approach to commitment in design & technology;
- involve themselves fully in the co-curricular provision for design & technology;
- in most cases, to study design & technology as a specialist subject for IGCSE and A-Level.

The purpose of scholarship awards is to recognise outstanding ability. Scholarships may be awarded with or without fee remission attached. If the main reason to apply for a scholarship is to obtain a fee remission, please talk to the admissions department about the school's bursary scheme.

Scholars' Programme

All scholars follow a tailored programme and work closely with a specialist mentor.

Scholars will benefit from opportunities such as:

- taking part in the Scholars' Showcase;
- events which bring together scholars from each area. These events may include a formal dinner, symposium or trip;
- collaborating with fellow scholars from their subject areas to create an assembly presentation;
- the opportunity to undertake an independent research project.

Design & Technology scholars will benefit from:

- showcasing their work on websites and in specialist magazines;
- support developing their portfolio;
- attending workshops led by award-winning teachers.

Assessment Process

Applications are accepted throughout the year from students aged 11+ who demonstrate exceptional ability in their field.

Applicants must first complete and pass the standard admissions process. Following initial screening, comprising a review of achievements, cognitive tests, and an interview with the Head of School, qualified applicants may be invited to undertake further department or subject-specific assessments; plus add additional information to their application to support the application for scholarship.

To apply, please begin **HERE** or contact **<admissions@rugbyschool.ac.th>** for further information.

Please note that internal candidates (students already attending the School) must be recommended by their teachers in order to apply. Eligible current students will be notified accordingly and are encouraged to discuss this with their tutors if needed.
