

Cloud-based Access Control Solution

Secure, flexible, convenient

For small and medium-sized business (SMB) owners—such as those with shops, offices, warehouses, and gyms—implementing an efficient and user-friendly access control system is a worthwhile investment. Simple and smart access control systems improve on-premises security while offering employees a seamless experience.

Common Challenges

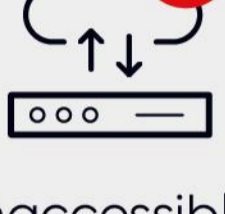

Of Conventional Access Control Systems

Inflexible door control

Lack of video evidence

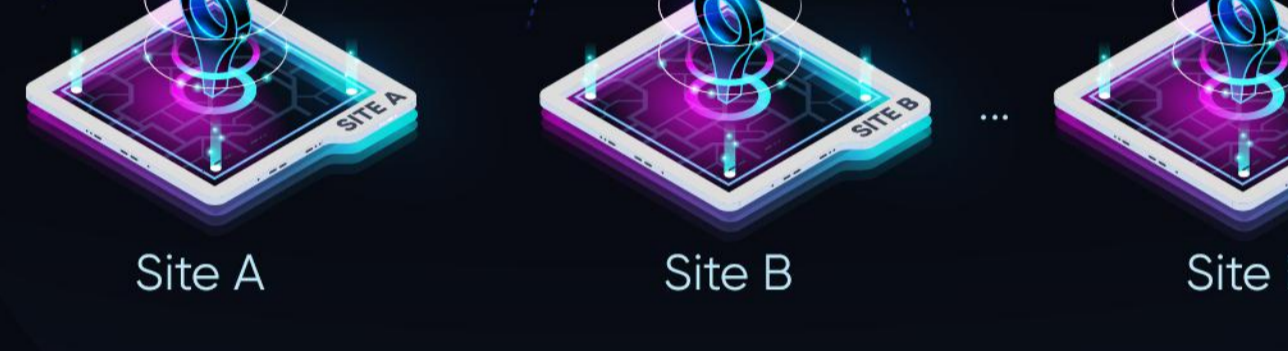

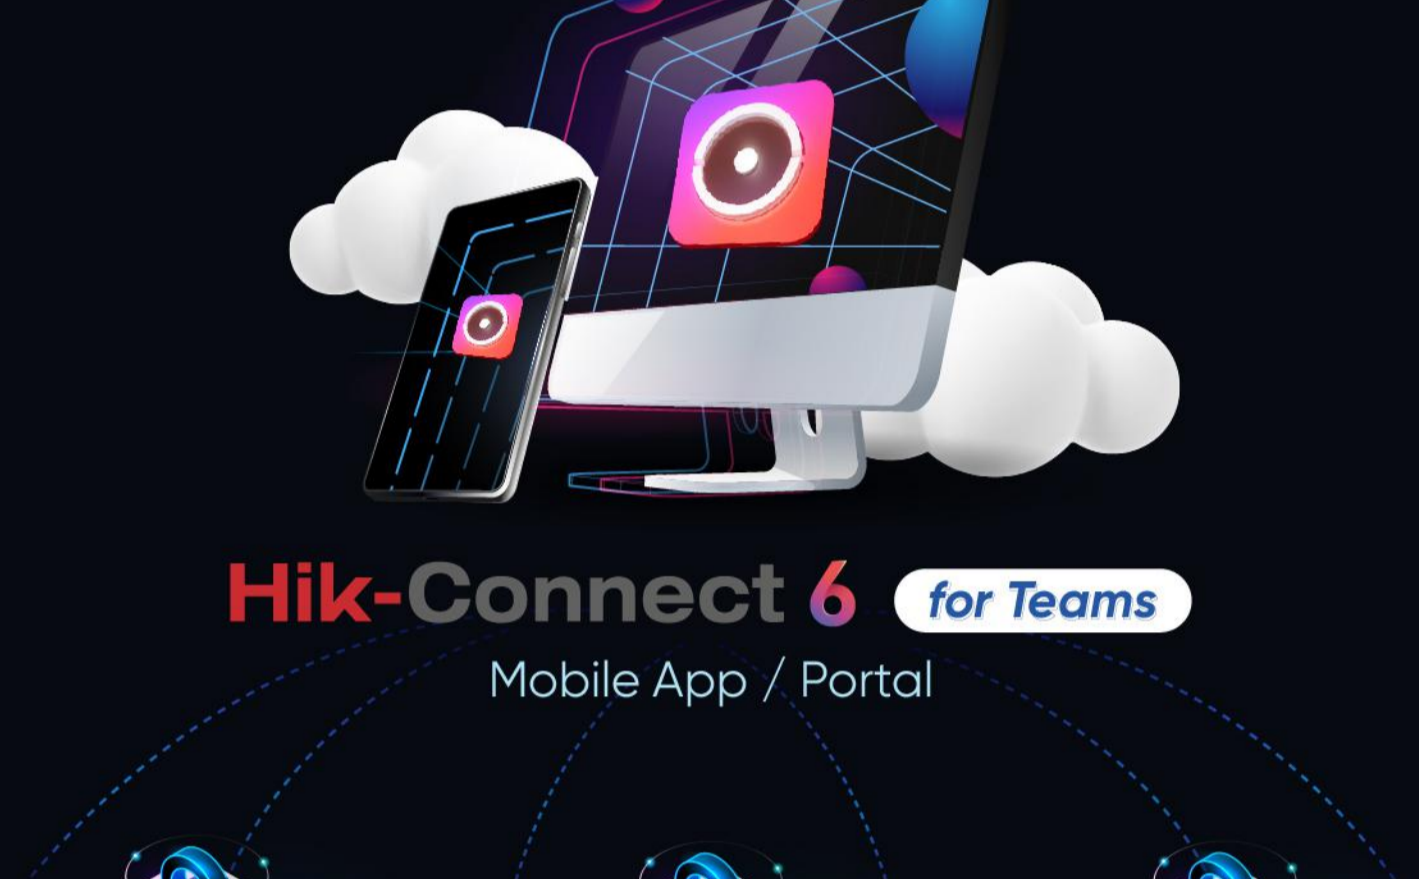

Inaccessible data

What We Offer

Hikvision's cloud-based access control solution offers secure and flexible access management for SMB owners. With remote management capabilities, it provides a convenient and reliable solution for controlling access to your premises.

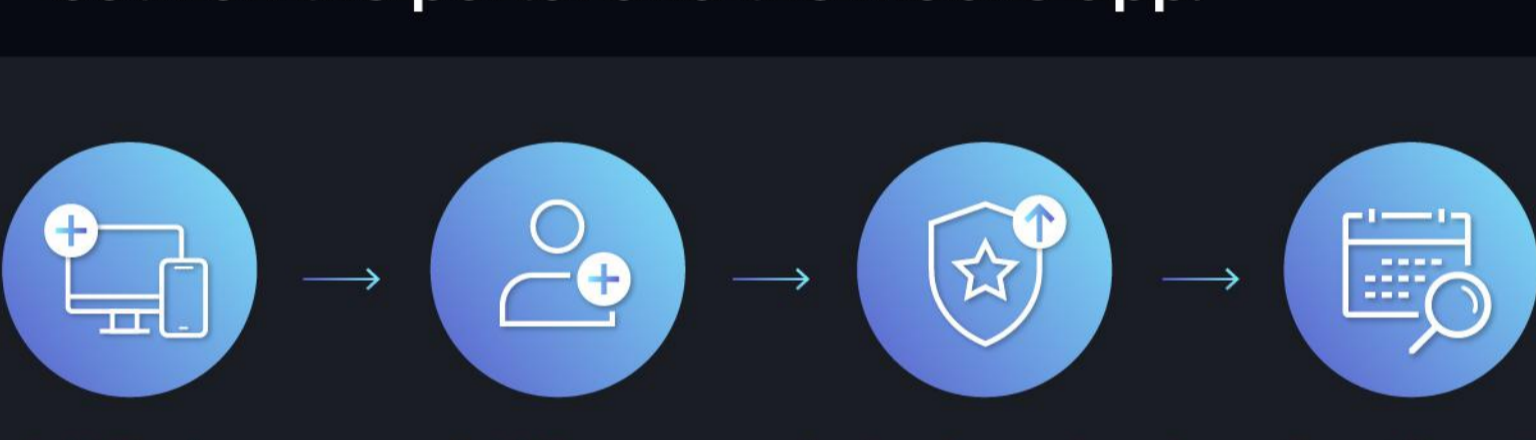

How It Works

Key Features

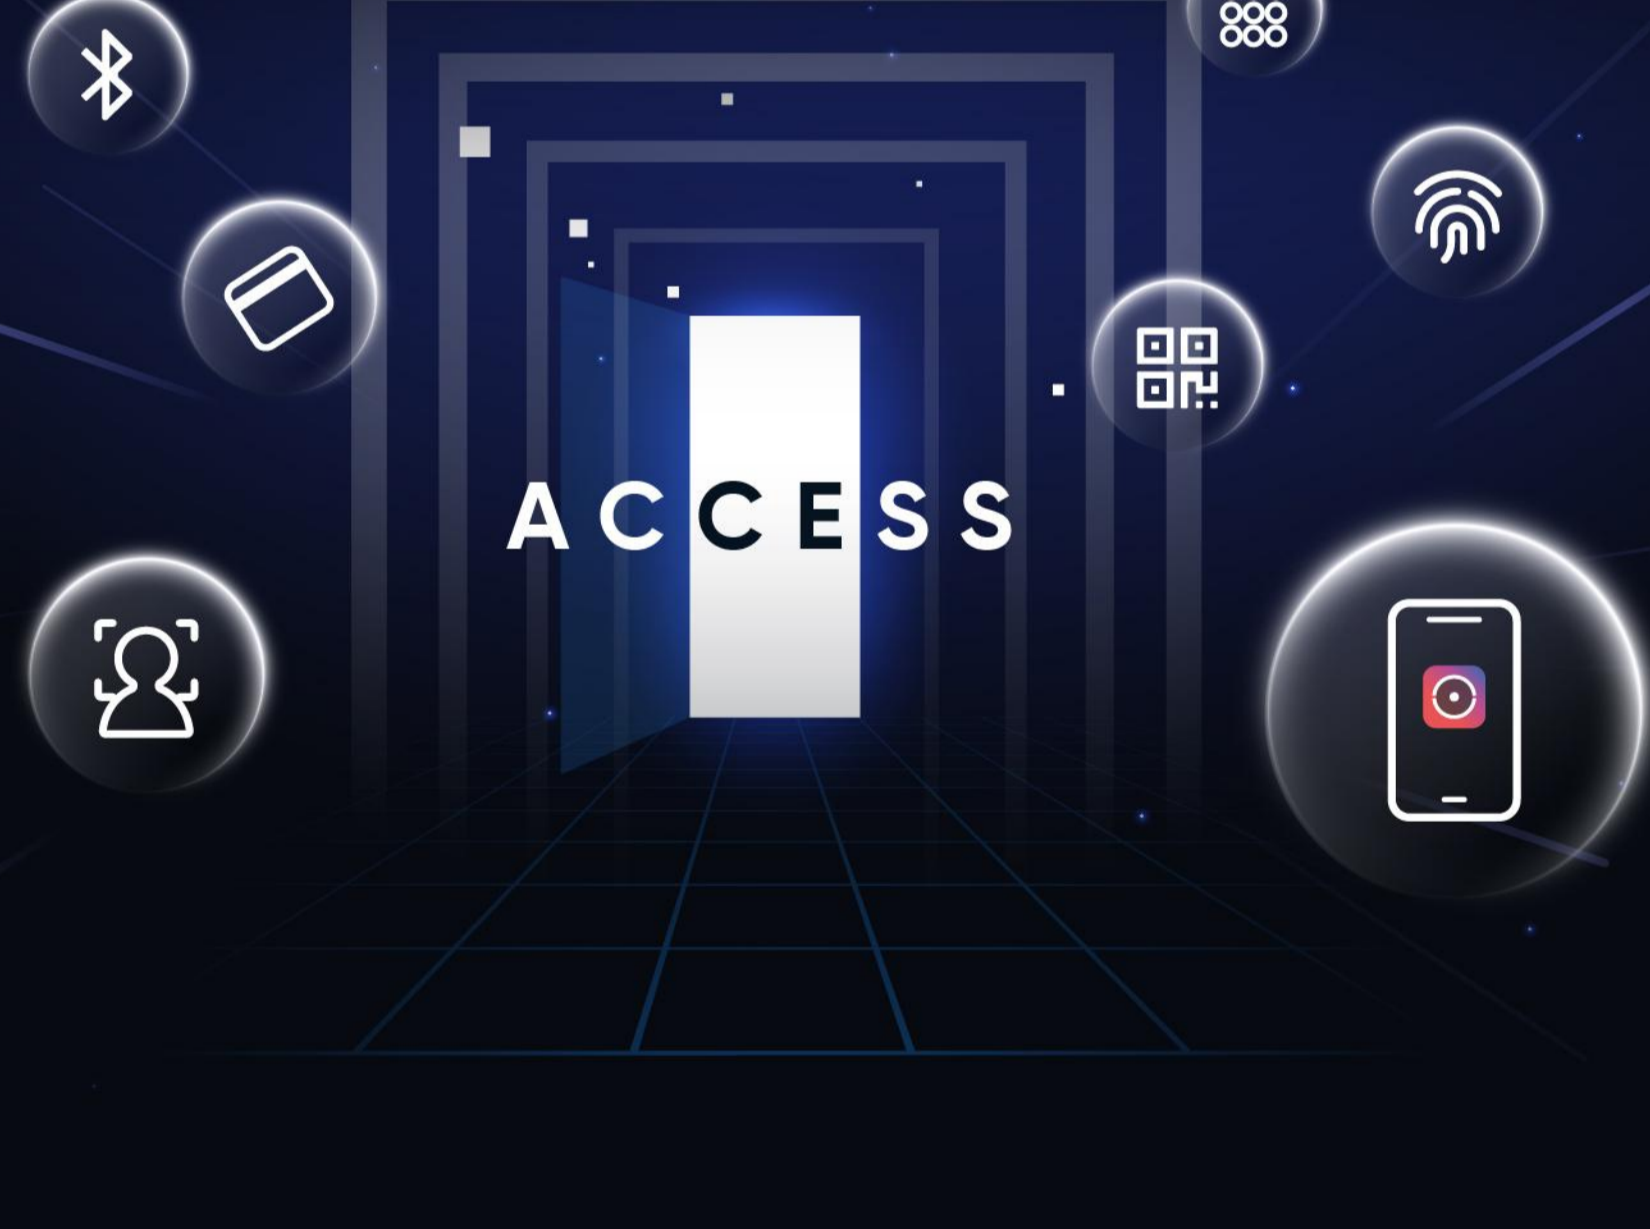

1 Easy access management for administrators

Convenient and versatile access management both on the portal and the mobile app.

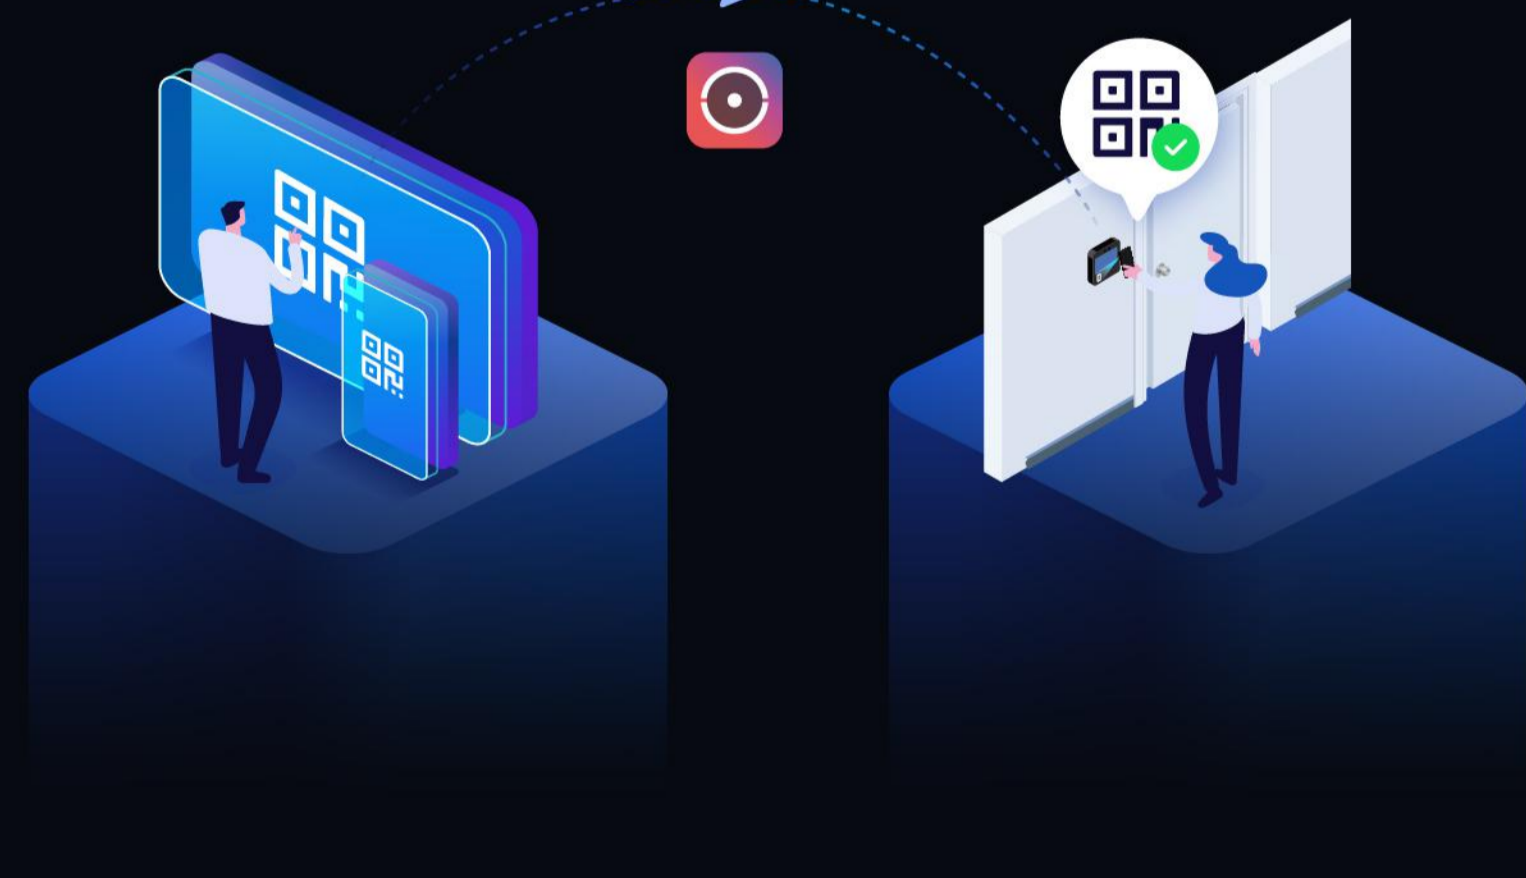

2 Flexible access for employees

Multiple authentication methods including face, fingerprint, card, PIN code, QR code, Bluetooth, and remote door unlocking via the Hik-Connect 6 Mobile App.

3 Easy pass for visitors with temporary credentials

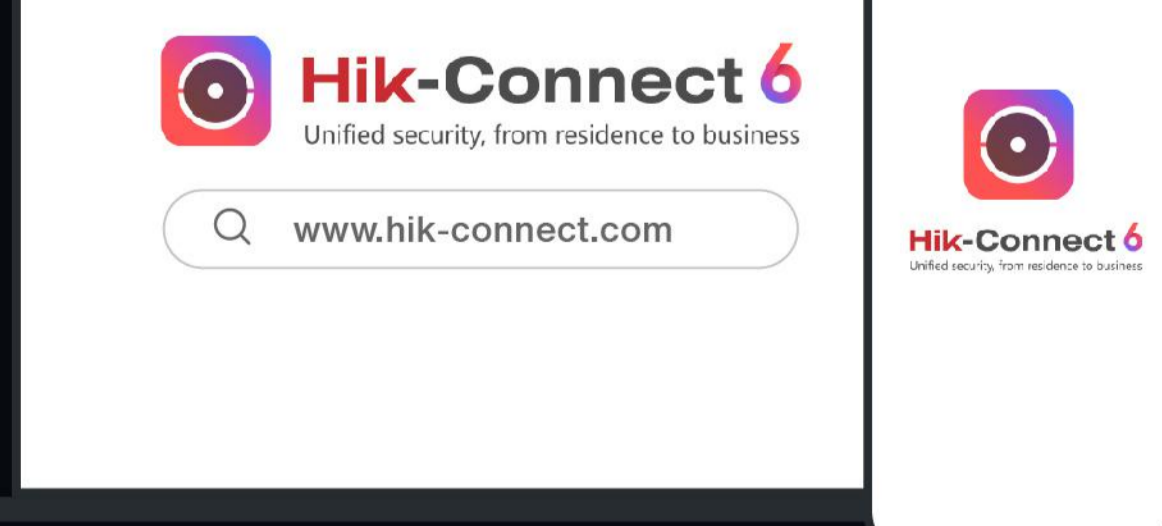

To facilitate visitor access, managers can issue temporary passes easily by sending them via mobile phone or web portal.
