# Enhancing Homes with Excellence in Your Homes **SINCE 2002**

What sets Glaze Plus apart from the competition is not just our commitment to quality, but our deep understanding of the unique challenges faced by those in the stone industry. We comprehend that stone surfaces, be it marble, granite, or any other type, require specialized care to retain their timeless beauty. Our extensive range of products is meticulously formulated to address these specific needs, making stone care a hassle-free experience for our clients. At Glaze Plus, we take pride in offering a comprehensive product range that caters to all aspects of stone care. Whether you are a contractor working on a grand architectural project or a homeowner looking to preserve the luster of your stone surfaces, we have the solution for you. Our product catalog boasts an array of offerings, including:

- Epoxy Gel
- Granite Cleaner & Cement Remover
- Shiner
- Mastic & Hardener
- Super Darkner
- Polishing Pads

***Advanced stone*** care solutions  
built on ***innovation,*** ***durability,***  
***and trust!***

## ABOUT US

**GLAZEPLUS** is a leading specialist in the treatment and maintenance of Italian marble.

Our commitment to quality and innovation ensures your surfaces are protected and enhanced to reveal the timeless beauty of Italian marble. With expertise tailored to the unique demands of natural stone, we bring out the best in luxury and durability.

### Expert Stone Care Solutions

**Innovation in surface protection since 2002**

#### Marble Treatment

Specialist treatments to protect marble surfaces

#### Surface Protection

Advance repellents to surface tony most scars and moisture

#### Polishing & Restoration

Profession polishing and maintenance for radiant marble a crillance.

#### Advanced Sealants

High performance sealants for long-lasting protection.

- Manufacturer of stone care & construction chemicals
- Trusted since 2002
- Used by professionals
- Quality-driven

## GLAZEFIX1100

### Properties

- High adhesion strength
- Easily trowellable

### Field of application

For bonding of small and medium sized floor and wall ceramictiles, marbles, natural stones, travertine and decorative brickson cementitious renders, cementitious screeds and concrete.

Color: Grey  
Pack Size: 40Kg

## GLAZEFIX110

Polymer modified cementitious tile adhesive for fixing Ceramic tiles, Porcelain tiles, Vitrified low thickness tiles, marbles of small formats on kitchen, Bathroom and Corridor area. For internal and external use both horizontally and vertically.

### Features:

- Tile on tile application
- Long open time slip resistance

In compliance with TS EN 12004-1:2017 C1TE standards.  
IS 15477 : 2019 (TYPE 2)

Polymer modified high performance deformable cementitious adhesive suitable for all kind of climate conditions with high adhesion performance, long lasting feature and flexibility for internal and external wall cladding. For ceramic tiles, porcelain tiles, natural stones, press bricks and glass mosaics in vibration prone areas.

### Features:

- Tile on tile application
- For light and dark coloured natural stones
- Longer open time
- Mixed only with water
- Does not slip in vertical applications.

In compliance with TS EN 12004-1:2019 C2TE S1  
Flex standards. IS 15477 : 2019 (TYPE 4)

## GLAZEFIX FLEX116

(C2TES2)

Polymer modified high performance deformable cementitious adhesive suitable for anuando conditions with high adhesive performance, long lasting feature and flexibility for internal and external wall cladding in vibration prone area. For ceramic tiles, highly flexible porcelain tiles, natural stones, press bricks and glass mosaic.

### Features:

- Tile on tile application
- For light and dark coloured natural stones
- Longer open time
- Mixed only with water
- Does not slip in vertical applications.

In compliance with TS EN 12004 - 1:2019 C2TE

## MIX & FIX

**Mix & Fix** is a white synthetic polymer additive designed to enhance the performance of cement-based grouts like CEMENT POLYMER GROUT, SUPER GROUT, and WIDE JOINT GROUT. It improves adhesion strength, abrasion resistance, flexibility, and water resistance, making it an essential product for professional tile joint grouting and surface repairs

### Features:

- Superior Adhesion Strength
- Enhanced Abrasion Resistance
- High Flexibility
- Water Resistance
- Compatible with Cement-Based Grouts
- Smooth Application
- Eco-Friendly Composition

**Pack Size:**  
1Kg | 5Kg | 20Kg

## EPO-LAM-1009 (A+B)

**EPO-LAM-1009(A+B)** Epoxy resin is a water clear, low viscosity resin system for coating, doming, marble crack filler and resin art applications. It is a solvent free epoxy specifically formulated as a clear, ultra-high gloss coating system that will self-level and cure at room temperature (15°C to 32°C). The system has excellent air- release and has been optimised for extended UV stability.

### Application

The surfaces to be coated should be dry and free from contaminants. Use two clean plastic containers of equal volume to measure the correct proportion of resin and hardener.

**Pack Size: 1.5kg & 4:2kg**

SCAN FOR MORE INFORMATION

## EPO-MAX-10005 (A+B)

**EPO-MAX-10005** is two component modified, epoxy based system suitable for treatment of Italian marbles and granites. It is a room temperature curing system, having low viscous and good penetrating properties into cracks for marbles and granites. The system shows excellent impregnation and gloss properties after curing. Faster productivity can be achieved, if curing is performed at higher temperature between 40°C and 60°C. Curing at higher temperature is recommended to achieve optimum performance.

### Application

- Enhance self-colour of the granites and Italian marbles
- Good colour stability
- Good penetrating power into cracks
- High gloss
- Low shrinkage
- System can be pigmented
- Thermally stable and suitable to perform in extreme conditions
- Water and chemical resistant

It is a solvent free epoxy specifically formulated as a clear, ultra-high gloss coating system that will self-level and cure at room temperature (15°C to 32°C). The system has excellent air- release and has been optimised for extended UV stability.

### Feature:

- Concentrated, fast acting
- Can be diluted with water to desired ratio
- Easy to use, reduced odour Provides clean surroundings
- Effective against efflorescence and cement haze

## EPO-TECH 9090:9096

**EPO-TECH (9090:9096)** 1:1 RATIO is multipurpose epoxy based, moisture tolerant structural adhesive with extra clear transparent look with 1:1 mixing ratio. It features high bonding strength and bearing capacity with molecular flex and toughness. It is ideal for freeze/thaw conditions and can withstand vibration and shock load during transportation. It is easy to use. Suitable for filling, bonding, reinforcing, repairing and sealing. It has excellent chemical resistance. 100% UV resistant with non-yellowing feature. Suitable for horizontal and vertical applications.

### Application

- Bonding of natural stones like marble, travertine etc.
- Bonding of surfaces like concrete, granite, tile and wood.

**GP-R101** resin is a modified epoxy resin. **GP-H201** is suitable to cure epoxy resin at ambient temperature. It is also suitable for bonding a variety of materials including metal, ceramic, and concrete where relatively high strengths are required.

## Benefits

- High shear and peel strength
- Good electrical insulation properties
- Long working time
- Long open time
- Easy to apply
- Water resistance

## PROFAST

PROFAST is a two component epoxy adhesive ideal for general purpose applications. This two component epoxy adhesive cure fast at room temperature and when fully cured, the epoxy is resistant to a wide range of chemicals and solvents, and acts as an excellent electrical insulator. It is used for epoxy casting and designed specifically for encapsulation

## Feature

- Short pot life
- Clear appearance

- Fast drying
- Strong colour intensification
- High degree of gloss
- Stable to yellowing
- Water and dirt resistant
- Especially easy to care

## SUPER CRYSTAL (SOLID WAX)

**SUPER CRYSTAL SOLID WAX** is a fast-drying, solvent-based solid wax to polish and restore surfaces without foot traffic, such as walls, tops and work surfaces. Its formula, containing top-quality paraffin, gives an excellent shine to the surfaces on which it is used and at the same time, it enhances the tone and look. **SUPER CRYSTAL SOLID WAX** also stands out for its quick, easy application, thanks to its fast-drying action. A surface treated with **SUPER CRYSTAL SOLID WAX** is also protected against water and stain penetration, thanks to its water and oil-repellence, which also make successive cleaning and maintenance operations easier. **SUPER CRYSTAL SOLID WAX** is generally used on natural stone surfaces but it can also be used on cotto, terracotta, cement agglomerates, cementine and terrazzo tiles.

**Pack Size :** 750gm

## GP-999

SCAN FOR MORE INFORMATION

**GP-999** is a high performance polishing powder for any type of marble or agglomerate, including the most “difficult” ones, such as marble-resin compounds. Its special formulation has been developed to quickly produce a high vitreous thickness. Compared to other powders of GP-999 in GLAZE PLUS, this powder also provides a greater vitreous look and a much more shiny surface seen against the light, even on poor materials with difficult areas to be polished. The product reacts with the material providing an excellent sheen and a good resistance to traffic marks and stains. It does not contain any waxes.

**Pack Size: 1kg | 5kg**

## POLY SHINE (CRYSTAL BLAST)

**Poly Shine Crystal Blast : Fluorosilicic Acid-Based Spray Crystallizer for Calcareous Stone Floors**  
Poly Shine Crystal Blast is a fluorosilicic acid-based formulation designed for the efficient spray crystallization of calcareous stone surfaces, such as marble. This product produces a smooth, high-gloss finish without building a film. It strengthens the stone through crystallization, enhancing wear resistance and reducing sensitivity to acids. Poly Shine Crystal Blast is ideal for both new maintenance and re-crystallizing previously treated floors, ensuring long-lasting protection and enhanced appearance.

## PRO DARK

### Application

**PRO DARK** is used for enhancing and protecting absorbent natural and artificial stone surfaces in interior and exterior applications. It is suitable for kitchens and countertops after full curing, bathrooms and sanitary areas, floors, staircases, window sills, terraces, facades, and monument stonework. The product is compatible with granite, marble, limestone, slate, terrazzo, concrete, sandstone, quartz-based surfaces, and cotto, and is especially effective on dark and black stones where deep color enrichment is required.

Pack Size: 1000ml | 5000ml

## DURA SEAL

### Application

**DURA SEAL Natural Look Stone Impregnator** is used on absorbent natural and mineral stone surfaces where long-term protection is required without altering the original appearance of the material. It is suitable for both interior and exterior applications on floors, walls, façades, terraces, balconies, staircases, and other architectural stone surfaces. The product is ideal for use in residential and commercial environments, including living areas, kitchens, bathrooms, outdoor spaces, and high-traffic zones. It can be applied on natural stones such as marble, granite, limestone, sandstone, as well as on concrete, concrete ashlar, and brick surfaces.

## NANOSEAL

Outstanding impregnation on the basis of high-quality

### Application:

Application: A special impregnation which strongly repels water, grease and oil. Used to protect flooring, table tops and working surfaces made of absorbent natural ant artificial stone (s.a marble, solnhofer stone, sandstone, fine stoneware). For indoors and outdoors. Prevents the stone from staining spots or makes removing of spots much easier, the stone remains capable of breathing. The protective effect already begins after some minutes and is full effective after 2-3hours. Normally the color of the stone remains unchanged. Special substances work against a laminar wetting through liquid drops. Ball-shaped liquid pearls which lie only selectively on top of the stone surface,
