

**THE SECURITY
OF BEING
IN GOOD HANDS**

back to work® is a trademark
of ESO Società Benefit arl

back to work® is ESO's new service for the collection and recycling of work clothing, masks, protective helmets, gloves and shoes aimed at industries, bodies and companies that use personal protective equipment (PPE) for the prevention of accidents at work. The waste collected is recycled to produce materials that help preserve non-renewable natural resources.

Employers are required to provide workers with the necessary and appropriate personal protective equipment in accordance with the applicable national occupational health and safety legislation, including the Danish Working Environment Act, the Swedish Work Environment Act and the Norwegian Working Environment Act, together with the relevant national regulations on personal protective equipment.

Thanks to **back to work®**, PPE can be transformed into secondary raw material for the creation of new products. This enables companies that have already adopted, or are planning to adopt, Corporate Social Responsibility practices to divert materials from landfill and channel them into a virtuous recycling process.

Creating a positive vision for the future is an important goal to which we all have a responsibility to contribute.

Through the **back to work®** project, ESO continues along this path, promoting the culture of the "Recycling Cycle" and recognising that the environment is a valuable asset to be protected, and that waste can be turned into a resource, reducing its environmental impact.

THE PERFECT SOLUTION |

ESObOX GLOVES
cm 40 x 40 x 72 h

ESObOX APPAREL
cm 60 x 60 x 80 h

ESObOX SHOES
cm 60 x 60 x 80 h

EVEN FOR LARGE VOLUMES |

For large companies that have significant quantities of PPE to dispose of, the Industry container is available, which is big in size, robust and can be customised according to the waste to be stored with the specific interchangeable sign

ESobox HELMETS
cm 60 x 60 x 80 h

ESobox INDUSTRY
cm 80 x 120 x 99 h

**INTERCHANGEABLE
SIGNS**

EASY AND SAFE HOW IT WORKS

The **back to work**[®] ESOboxes are cardboard containers available in different sizes depending on the type of waste to be deposited.

ESObox GLOVES for gloves and face masks

ESObox SHOES for safety shoes

ESObox APPAREL for workwear

ESObox HELMETS for protective helmets

Depending on your needs and the space available at your site, you can set up the most suitable collection system. Choose between on-demand (EXP) and scheduled (PROG) collection.

We will then provide a customised quotation based on your requirements.

The **back to work**[®] service helps streamline collection and reduce disposal costs through a single-supplier solution.

**Documented
Measurable
Verifiable**

The advantage of being
in good hands.

More than collection: a concrete value for your company.

The European Regulation 2018/851/EU invites companies and organisations to separate waste in order to reach the "Zero Waste" target.

- **With back to work**[®] you can rely on a single integrated service for the collection of end-of-life work clothing, masks, protective helmets, gloves and shoes.

- **With back to work**[®] you can organise separate collection and recycling, following the basic principles of European regulations.

- **With back to work**[®] you can have, through the ESOweb portal, real-time control, across company operations, of the correct waste collection flow in your company and/or branches.

- **With back to work**[®] you can witness the adoption of a good Corporate Social Responsibility practice.

- **With the support of ESOweb, back to work**[®] can provide measurable environmental data, including CO2 savings, and the issuance of a certificate attesting the environmental benefit generated through the recycling process, based on Life Cycle Assessment (LCA) criteria. This helps companies strengthen sustainability documentation and ESG reporting.

ABOUT US |

ESO RECYCLING Danmark ApS is part of the ESO network. Founded in Italy in 1999, ESO has developed long-standing experience in waste management, environmental services and logistics. This background now supports the development of circular solutions such as back to work® in Denmark.

In 2016 ESO became a Società Benefit, a new way of operating on the market that goes beyond the mere pursuit of corporate profit and puts greater focus on responsibility, transparency, ethics and the implementation of actions of solidarity aimed at people and the environment.

Through **back to work®**, **ESO RECYCLING Danmark ApS** promotes the collection, recycling and recovery of workplace protective equipment (PPE), building on the experience developed within the ESO network and supporting companies in the transition towards more sustainable resource management.

back to work® offers companies in Denmark a structured solution for the collection, recycling and recovery of workplace protective equipment.

Established in Denmark, ESO RECYCLING Danmark ApS draws on the operational and logistical experience developed by ESO in Italy since 1999,

where the group has built an extensive service network supporting companies throughout the country with dedicated vehicles and specialised personnel.
