# Mining

## INNOVATION THAT SUPPORTS YOUR GOALS

MICHELIN® Better Mining offers innovative solutions for safe, smart and sustainable mining. That means better earthmoving tires for all types of surface and underground mining as well as quarry machines.

Our priority is your safety and productivity. We accomplish that by focusing on MICHELIN Better Mining's four key pillars

### PRODUCT

Michelin now has seven industrial sites dedicated to the manufacture of mining tires.

### SUPPORT

Your expert product support team includes an account manager, customer engineering support and a MEMS® Service Engineer.

### SOLUTIONS

Our solutions are based on proven technology and careful data analyses.

### SERVICES

MICHELIN® Consulting & Services helps mines unleash their peak performance.

# Construction

**Durability and grip on all types of difficult terrains**

Mud, sand, abrasive, or aggressive ground, as well as versatility for road conditions... whatever your working terrain, excluding asphalt, Michelin brings you an adapted product solution. Our MICHELIN® X® FORCE™ range will be your trusted ally in your off-road operations, for both military and civilian vehicles.

# Industrial

The complexity of port and airport terminal handling environments has led Michelin to create and develop a specific range of tires designed to meet the unique requirements of these different activities. The very high usage level of vehicles such as straddle tractors and carriers, container trolleys or terminal tractors requires specifically adapted tires. The complexity of these vehicles and their extremely heavy loads require extremely robust tires that can withstand the various external aggressions and thousands of journeys on often highly abrasive terrain.

The quality of Michelin tires will enable you to maintain an ever-increasing level of productivity and hourly output for your various handling activities, so your tires won't cause problems for your smooth-running logistics.

Discover our full range of tires for port and airport handling to equip your fleet with a wide choice of sizes. Examples of the most common dimensions: 450/95R25; 310/80R22.5; 18.00R25.
